

Part Number: DM164136 - Curiosity HPC Development Board

The Curiosity HPC Development Board is a cost-effective, fully integrated 8-bit development platform targeted at first-time users, makers and those seeking a feature-rich, rapid prototyping board. Designed from the ground-up to take full advantage of Microchip’s MPLAB® X integrated development environment, the Curiosity HPC Development Board includes an integrated programmer/debugger, and requires no additional hardware to get started. The Curiosity HPC Development Board supports all low-voltage, programming-enabled 8-bit PIC® MCUs with 28 or 40 pins.

Features

Integrated Programmer/Debugger with USB Interface

Integrates seamlessly with MPLAB X IDE and Code Configurator

Various user interface options - analog potentiometer, and physical switches

Mikrobus™ support with over 100 MikroElektronika Click™ add-on boards available
