

## Electric Shock First Aid Poster

- 590mm x 420mm Laminated
- Snap Frame available
- Clear easy to read text
- Helps first aid awareness
- Clear instructions
- Updated for 2016

These guidance posters are designed to provide both first aiders and non first aiders with the essential first aid and safety information. These posters can help raise safety and first aid awareness throughout your organisation. Each poster features fully coloured illustrations and clear easy to read text. These posters are encapsulated for superior durability and can be attached to a surface or a snap frame is available. These posters are compiled by qualified health and safety practitioners, are fully updated with the latest guidance and best practice techniques.

This poster covers the following topics:

- Danger - knowing the difference from a high/low voltage shock and action to take if it is a low voltage shock
- Response - checking to see if they casualty is conscious
- Getting Help - calling for help and emergency medical services
- Airway & Breathing - assessing the casualty and checking to see if they are responsive, breathing normally and if they are not breathing normally
- Unconscious (Not Breathing) - commencing CPR
- Unconscious (Breathing) - how to move the casualty in the recovery position
- Burns - how to deal with burns with a casualty that's responsive/unresponsive and the don'ts
- Other Injuries - muscle spasm/seizures and action to take at an event of a major seizure
