## **Vision**

*To be a preferable source of official statistics in Tanzania*

## **Mission**

*To facilitate informed decision-making process, through provision of relevant, timely and reliable user-driven statistical information, coordinating statistical activities and promoting the adherence to statistical methodologies and standards.*

## FOREWORD

The *Foreign Trade Statistics 2013* publication is the 4<sup>th</sup> in a series of publications on foreign trade. This publication provides trade statistics series in the United Republic of Tanzania (URT) from 2007 to 2013. In this publication, foreign trade statistics refer to international, foreign or external merchandise trade statistics unless otherwise stated. In this publication, the term *merchandise* has the same meaning as *goods* or *commodities*.

The recommendations of the United Nations Statistical Commission on compilation of trade statistics as contained in *International Merchandise Trade Statistics; Concept and Definitions Revision 2* published by the United Nations Statistics Division (UNSD) in 1998 provides the framework for data compilation and interpretation.

The publication contains series of Imports, Domestic Exports, Re-exports as well as the Balance of Trade for the World, East African Community (EAC) and Southern Africa Development Community (SADC). It further provides trade statistics series of major traditional and non-traditional exports, commodities classified by the Standard International Trade Classification (SITC), International Convention on Harmonised Commodity Description and Coding System (HS) as well as the trading countries.

It is my expectation that this report will continue to be a useful source of information to stakeholders including policy makers, private sector, development partners, research institutions, academia and the general public. In this regard, I am optimistic that the compiled statistics in this report will be useful for making more informed decisions.

I wish to express my sincere appreciation to the Technical Team comprised of staff from the National Bureau of Statistics (NBS) and the Tanzania Revenue Authority (TRA) for their dedication and commitment which has led to the finalization of this publication. The National Bureau of Statistics welcomes views, comments and suggestions from users for improving future publications.

Dr. Albina Chuwa  
Director General,  
National Bureau of Statistics,  
Dar es Salaam,  
**TANZANIA.**

URT	United Republic of Tanzania

## 1.0 INTRODUCTION

The *Foreign Trade Statistics 2013* publication provides trade statistics time series for the period 2007 – 2013. In order to facilitate the interpretation and understanding of the published trade statistics, the report provides an overview of the scope and methodology of data collection. An overview of foreign trade performance between Tanzania and the rest of the world as well as regional economic blocs of interest including the East African Community (EAC) and the Southern Africa Development Community (SADC) have been provided. Appended tables provide the reader with detailed insight on foreign trade over the 2007 - 2013 period.

## 2.0 METHODOLOGY

This publication deals only with international merchandise trade and therefore excludes trade in services. Foreign trade statistics are compiled in accordance with the recommendations of United Nations Statistical Commission as contained in *International Merchandise Trade Statistics; Concept and Definitions Revision 2* report published by the United National Statistics Division in 2010 which provides the framework for data compilation and interpretation.

### *Source of Data*

The main source of international merchandise trade statistics is the bill of entry known as Tanzania Single Administrative Document (TANSAD) administered by the Tanzania Revenue Authority for clearing of goods at all border stations of the United Republic of Tanzania.

### *Timing of Recording*

Imported and exported goods are recorded at the time they enter or leave the economic territory of a country. For customs based data, the time of recording is the date of lodgement of the customs declaration since it is approximated as the time at which goods cross the border of the economic territory of a country.

### *Data Capture and Analysis*

TRA has automated customs clearance process through ASYCUDA++ system in all major customs stations across the country and therefore accounting for 100 percent of all legal international trade transactions. On monthly basis, data from ASYCUDA++ are transferred and loaded into a Eurotrace database, validated and disseminated to the National Bureau of Statistics for compilation and publication of Foreign Trade Statistics.

### *Commodity Classification*

Customs data are classified according to the International Convention on Harmonised Commodity Description and Coding System approved by the World Customs Organisation. Both the Harmonised System Version 2012 and the Standard International Trade Classification (SITC) Revision 4 of 2006 have been used for classification of commodities portrayed in this report

### *Statistical Value of Imports and Exports*

Statistical value is the value assigned to goods, in accordance with the World Trade Organisation's Agreement on Customs Valuation (WTO-ACV), by the Tanzania Revenue Authority as follows:

- a) Imported goods are valued at *Cost, Insurance and Freight* (C.I.F) which includes the transaction value of the goods, the value of services performed to deliver goods to the border of the exporting country and the value of the services performed to deliver the goods from the border of the exporting country to the border of importing country.
- b) Exported goods are valued as *Free on Board* (F.O.B) at port or place of exit. It includes transaction value of the goods and the value of services performed to deliver goods to the border of the exporting country.

## **Concepts and Definitions**

Foreign trade statistics are compiled in accordance with the *General Trade System* in which all goods that enter or leave the statistical territory are recorded.

### *Direct Imports*

Direct Imports are foreign goods *including* compensating products which after outward processing change their origin from domestic to foreign, that enter the free circulation area, premises for inward processing, industrial free zones, and premises for customs warehousing or commercial free zones. In short, it includes all goods entering the economic territory of a compiling country that are directly cleared for home use and those declared for warehousing.

### *Domestic Exports*

These are goods grown, produced, extracted or manufactured in Tanzania which are exported to foreign countries, or sold as ships and aircraft's stores.

### *Re-exports*

All imported goods which are subsequently exported either under drawback or not under drawback including ships or aircraft's stores. Re-exports are exports of foreign goods which were previously recorded as imports.

### *Total Exports or Exports*

The aggregate of Domestic Exports and Re-exports

### *Partner Country Attribution*

In trade statistics by partner country, both the value and quantity of individual commodities are of significant analytical value. There is no ideal method of attributing a partner country for the compilation of international merchandise trade statistics. There are different types of partner country attributions for both imported and exported goods<sup>1</sup>. Attribution by country of origin for imports and country of last known destination for exports meets what is considered to be a priority application of international merchandise trade statistics, for matters of trade policy and related economic analysis.

### *Country of Origin*

The country of origin of a good is determined by EAC Rules of Origin. Generally, rules of origin consist of two basic criteria namely:-

- a) The criterion of goods "wholly produced" (obtained) in a given country, where only one country enters into consideration in attributing origin;
- b) The criterion of "substantial transformation", where two or more countries have taken part in the production of the goods.

### *Country of Destination*

It is a country known at the time of dispatch to be the final country of destination where goods are to be delivered.

---

<sup>1</sup> There are different types of Partner Country attribution for imports which include; - Country of Purchase, Country of Consignment, Country of Shipment and Country of Origin. Likewise, Partner Country attribution for exported goods include;- Country of Sales, Country of Consignment, Country of Shipment, Country of Last Known Destination and Country of Consumption,

### *Sensitive Goods*

These are goods on which EAC Common External Tariff (CET) rates are set higher than 25 percent in order to protect regionally (domestically) grown, produced or manufactured goods from similar goods imported from outside the region.

### *Goods Excluded from Compilation of International Merchandise Trade Statistics*

The following goods are not included in the compilation of international merchandise trade statistics:

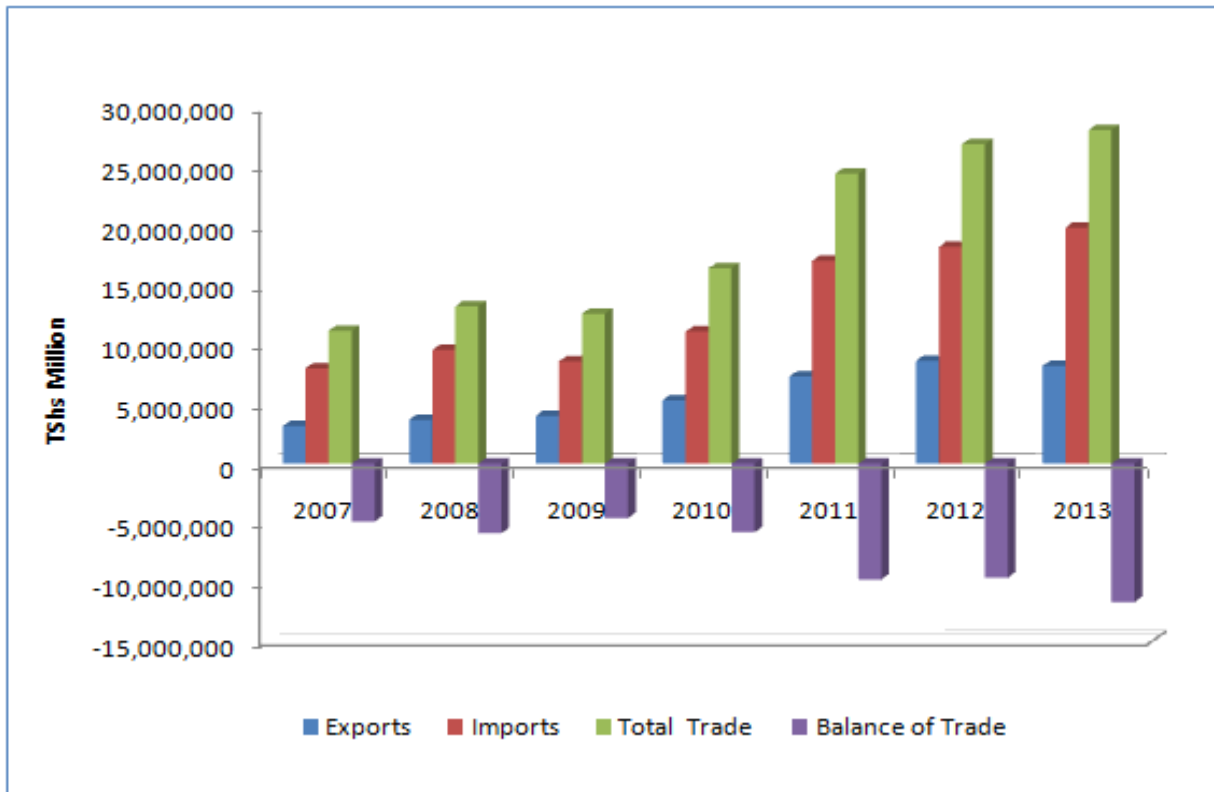

- a) Traveler's sample, except in case of goods subject to duty which are not re-exported;
- b) Motor vehicle imported on a "carnet de passage en route" unless such vehicles are not subsequently re-exported;
- c) Naval and military stores;
- d) Goods in Transit;
- e) Transactions of gold between central banks or monetary authorities which are considered as transactions in monetary gold;
- f) Issued banknotes and securities and coins in circulation;
- g) Goods temporarily admitted or dispatched;
- h) Goods consigned to and from territorial enclaves;
- i) Means of transport for commercial use; and
- j) Relief consignments.

## **3.0 AN OVERVIEW OF FOREIGN TRADE PERFORMANCE FOR THE YEAR 2013.**

### **3.1 International Merchandise Trade Performance**

In 2013, Tanzania's total trade with the rest of the world increased by 4.5 percent to TZS. 28,127,678 million from TZS. 26,929,265 million recorded in 2012. Total exports declined by 5.0 percent to TZS. 8,223,206 million from TZS. 8,653,372 million while imports grew by 8.9 percent to TZS. 19,904,472 million from TZS. 18,275,893 million. As result, trade deficit widened by 21.4 percent to TZS. 11,681,266 million compared to the deficit of TZS. 9,622,522 million in 2012.

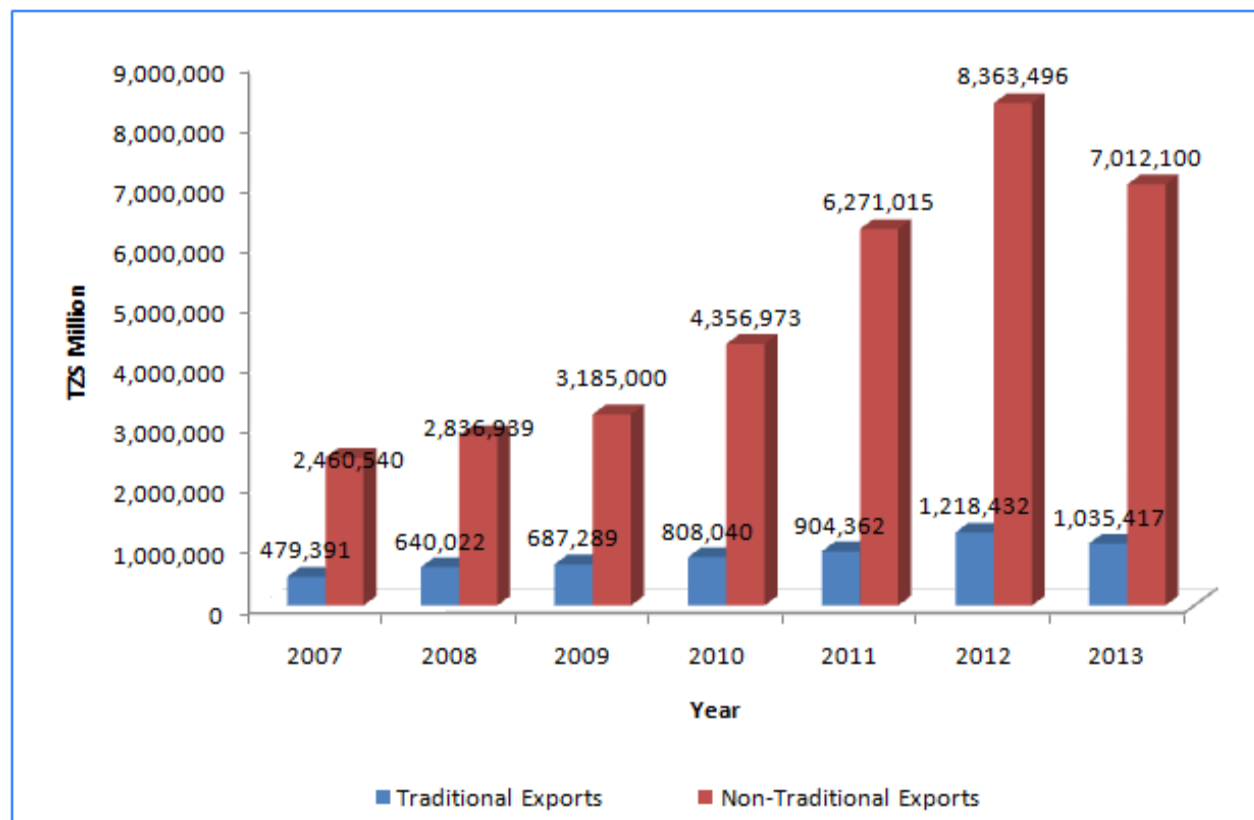

Figure 1: Exports, Imports and Balance of Trade, Tanzania, 2007 - 2013

#### *Traditional and Non Traditional Exports*

Domestic exports fall under two main categories namely; traditional and non-traditional exports. The traditional exports are mainly locally grown crops such as coffee, tea, cocoa, cotton, sisal, tobacco and cashew nuts whereas, non-traditional exports includes other agricultural , livestock, forestry, minerals and industrial products. The value of domestic exports for the year 2013 was TZS. 7,012,100 millions of which traditional exports accounted for 14.8 percent and non-traditional accounted for 85.2 percent. Figure 2 shows the trend of traditional and non- traditional exports over the 2007-2013 periods.

Figure 2: Traditional and Non-Traditional Exports, Tanzania, 2007 - 2013

In 2013, the contributions of different commodities to total domestic exports were as follows: minerals including gold, diamond and precious stones (44 percent); horticultural products (22 percent); manufactured goods (9 percent); cashew nuts and coffee products (4 percent each); fish and fish products (3 percent), tobacco and cotton (2 percent each); and other products 9 percent.

Figure 3: Domestic Exports by Commodity (Percent), Tanzania, 2013

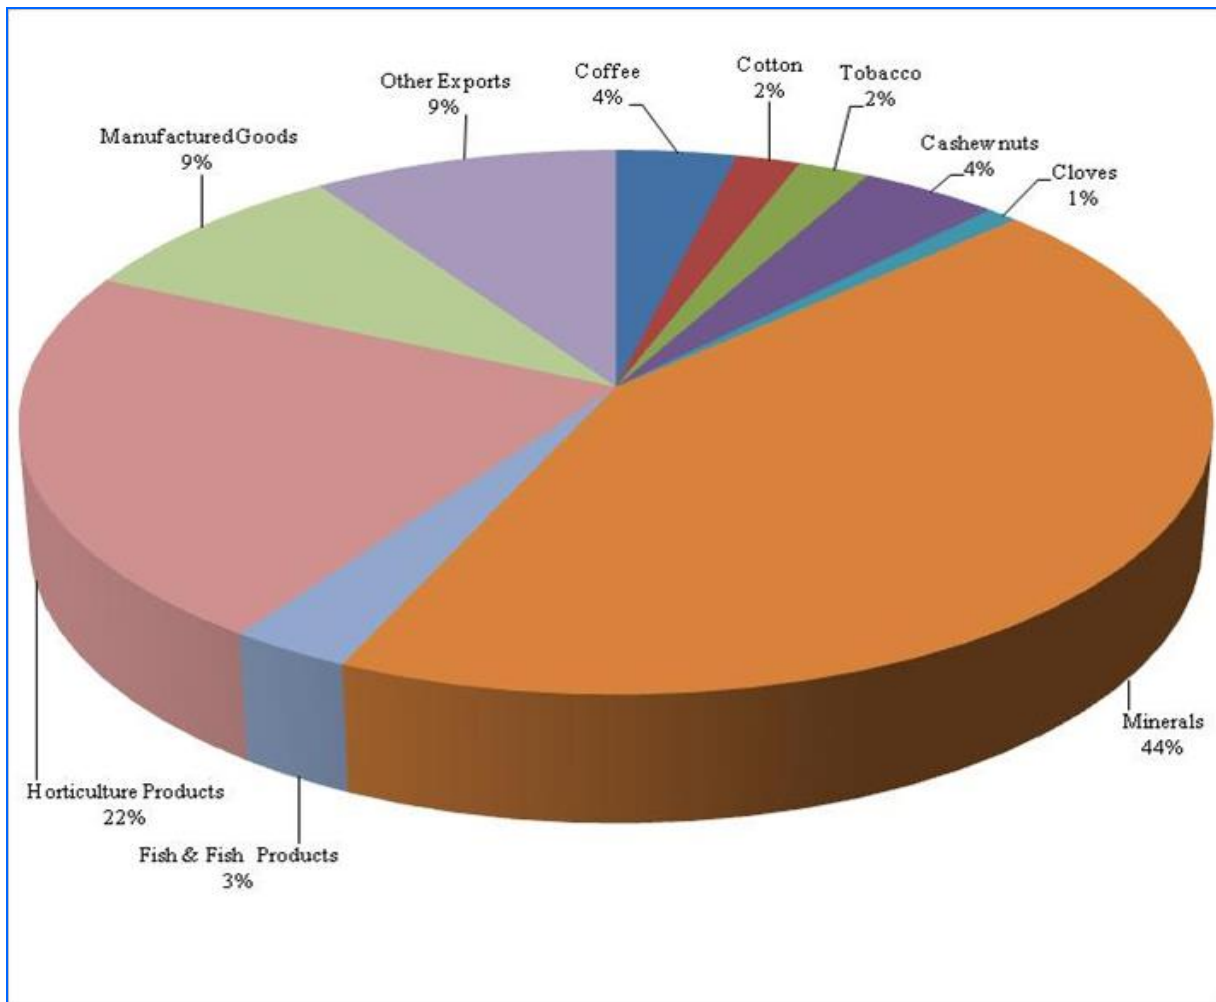

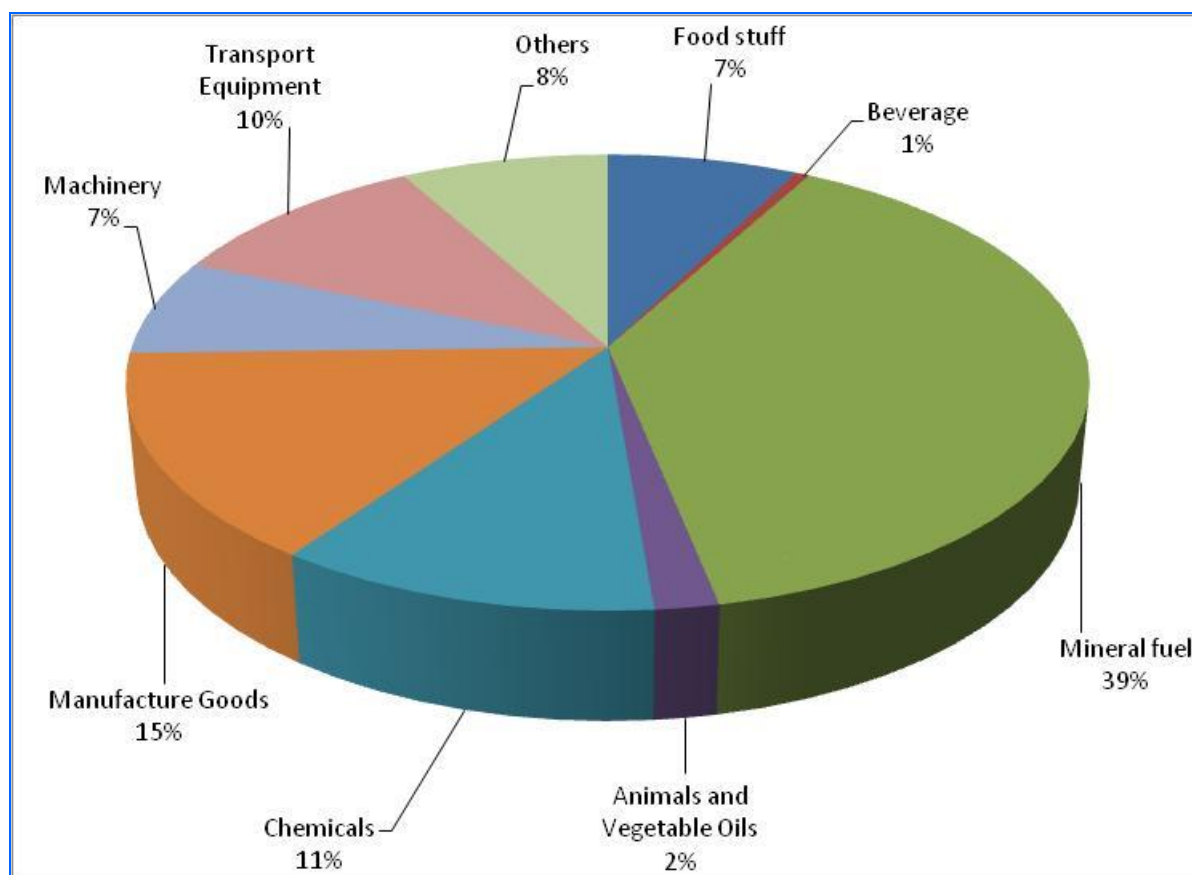

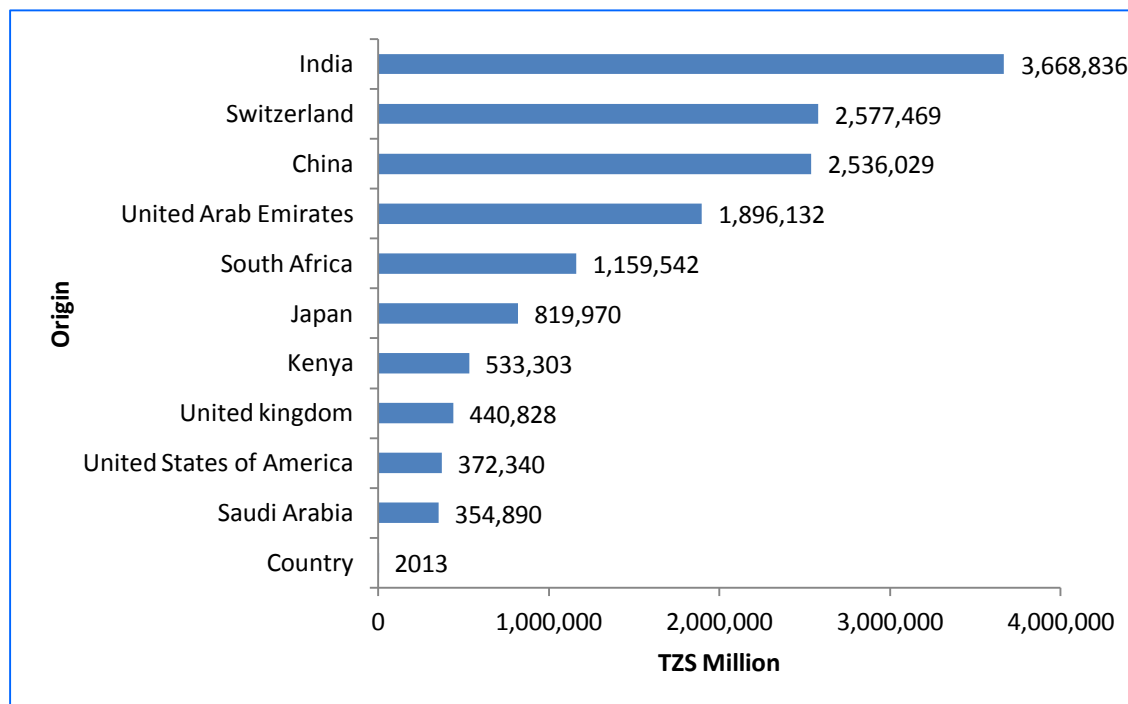

Figure 4 below shows shares of major imported goods for the year 2013. They include mineral fuels which accounted for (39 percent), of all imports followed by manufactured goods (15 percent), chemicals (11 percent), transport equipment (10 percent), food stuff and machinery (7 percent each), animal and vegetable oils (2 percent), beverages (1percent) and other goods (8 percent).

**Figure 4: Direct Imports by Commodity (Percent), Tanzania 2013**

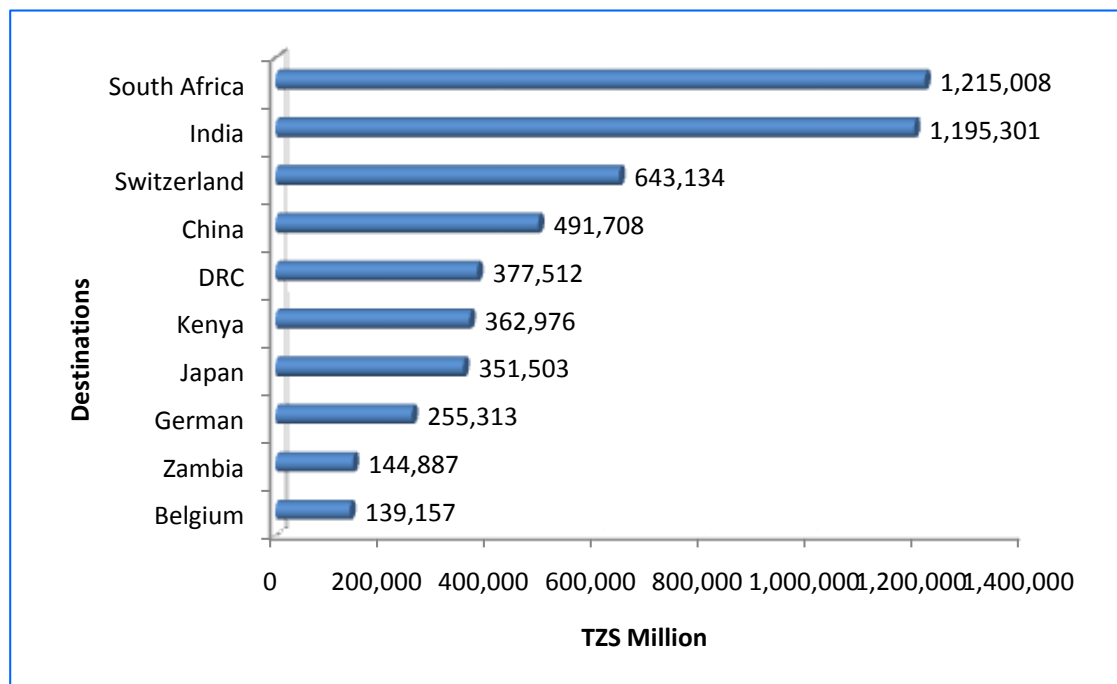

### *Major Trading Partners*

The major trading partners for imported goods in 2013 were India, Switzerland, China, United Arab Emirates, South Africa, Japan, Kenya, United Kingdom, United States of America and Saudi Arabia. These are the countries from which goods worth TZS.14, 359,339 million (equivalent to 72.1 percent of the total value of imports) were imported. Details of selected major countries of origin for the year 2013 are shown in Figure 5.

**Figure 5: Value of Imports by Major Countries of Origin, Tanzania, 2013**

With regard to domestic exports, goods worth TZS. 5,176,499 million (73.8 percent of the total domestic exports) were exported to the following major trading partners in 2013; South Africa, India Switzerland, China, Democratic Republic of Congo, Kenya, Japan, Germany, Zambia and Belgium. Details of selected major countries of destination for the year 2013 are shown in Figure 6.

**Figure 6: Value of Domestic Exports by Major Destinations, Tanzania, 2013**

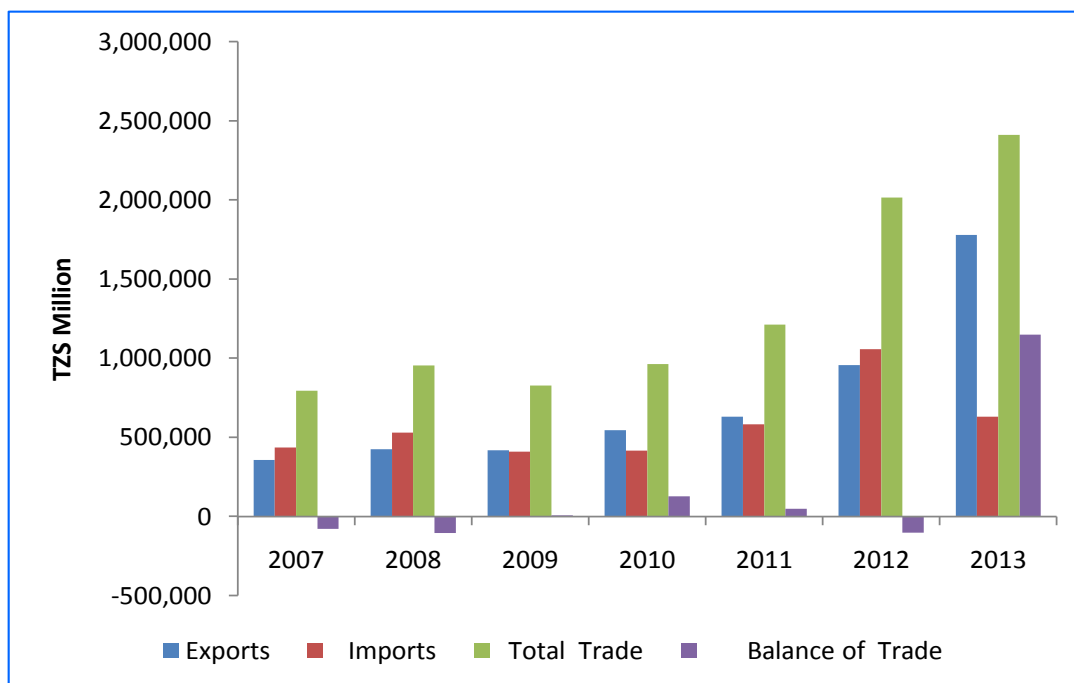

### 3.2 Trade Performance with EAC Countries

The United Republic of Tanzania is among the five partner states forming the East African Community. Other Partner States are; Kenya, Uganda, Rwanda and Burundi. The EAC Customs Union was launched on 1<sup>st</sup> January 2005. Rwanda and Burundi joined the EAC Customs Union in July 2007 and since July 2009 they have been implementing the provisions of the Customs Union.

The overall goal of the EAC Customs Union (EAC - CU) is to deepen the integration process through liberalization and promotion of intra-regional trade. Other indirect crucial expectations from the customs union are the promotion of efficiency in production in response to intra-region competition among businesses, enhancement of domestic cross border and foreign investment and promotion of industrial diversification and economic development.

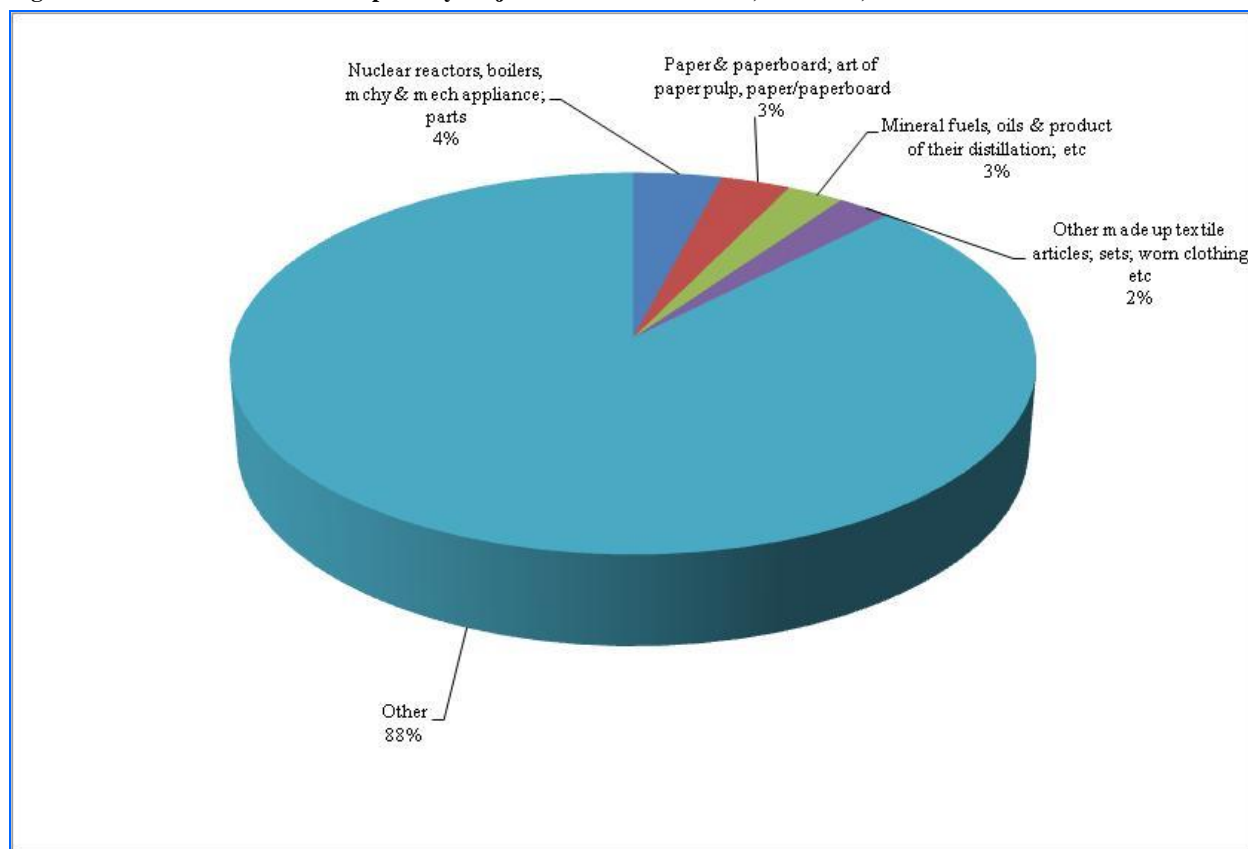

In 2013, Tanzania exports to EAC partner states were 21.6 percent of Tanzania total exports and Tanzania imports from EAC partner states were 3.2 percent of Tanzania total imports.

Figure 7: EAC Intra-Trade Performance, Tanzania, 2007 – 2013

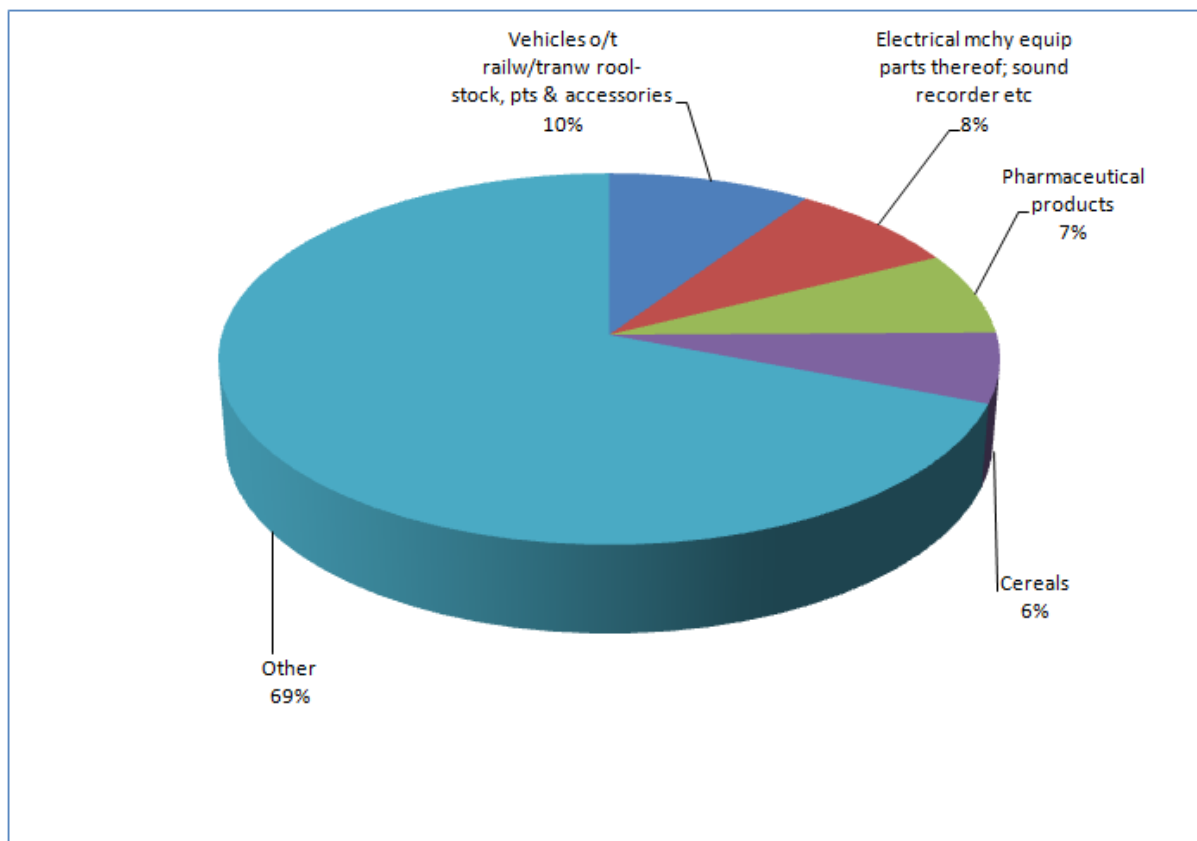

#### Major EAC Traded Commodities

For 2013, major domestic exports to the EAC partner states were nuclear reactors, boilers, machinery and mechanical appliance; paper and paperboard; art of paper pulp, paper/paperboard; mineral fuels, oils and product of their distillation and other made up textile article, set, worn clothing etc (Figure 8). These commodities; accounted for about 12.3 percent of the total domestic exports to the EAC partner states.

**Figure 8: Shares of Domestic Exports by Major Commodities to EAC, Tanzania, 2013**

Major commodities imported from EAC partner states during 2013 were; vehicles o/t railway/train rool-stock, pts & accessories, electrical machinery equipment parts thereof; sound recorder; pharmaceutical products; and cereals (Figure 9). These commodities together accounted for 30.9 percent of the total imports from the EAC partner states.

**Figure 9: Share of Imports by Major Commodities from EAC, Tanzania, 2013**

#### *EAC Intra-trade Performance by Partner States*

Kenya accounted for the largest proportion of Tanzania intra-EAC trade. In 2013, Kenya accounted for 84.5 percent of Tanzania imports from EAC Partner States and 54.2 percent of domestic exports to the partner states. The trends of both Tanzania's domestic exports and imports to and from the region are shown in Figures 10 and 11.
