Wording for deprecating async

Herb Sutter

This paper provides proposed wording to implement a positive SG1 straw poll.

Deprecate `std::async`

Move the following to Annex D:

- Paragraph 30.6.1/2.
- Subclause 30.6.8 [futures.async].

In 30.6.1/1, have the declarations of `async` and the definition of enum class `launch` refer to Annex D.
