

VLDB2014

40th International Conference on Very Large Data Bases, Hangzhou, China

Proceedings of the VLDB Endowment

Volume 7, No. 1 – September 2013

**Proceedings of the 40th International Conference on
Very Large Data Bases, Hangzhou, China**

Program Chairs and Editors-in-Chief:

H. V. Jagadish, Aoying Zhou

Associate Editors – Research and Innovative Systems Tracks:

**Shivnath Babu, Lei Chen, Graham Cormode, Bin Cui, Wynne Hsu, Martin Kersten,
Donald Kossman, Elke Rundensteiner, Kyuseok Shim, Wang-Chiew Tan, Letizia Tanca, Jeffrey Yu**

Associate Editors – Experiments and Analysis Track:

Gao Cong, Jens Dittrich

Associate Editors – Vision Track:

Zachary Ives

Proceedings Chairs:

Li Xiong, Cong Yu

VLDB 2014 ORGANIZATION AND REVIEW BOARD

Honorary Chair

Yunhe Pan, Chinese Academy of Engineering

General Chairs

Chun Chen, Zhejiang University

Sharad Mehrotra, University of California, Irvine

Program Chairs and Editors-in-Chief of PVLDB 7

H. V. Jagadish, University of Michigan

Aoying Zhou, East Normal University, China

Research and Innovative Systems Tracks Associate Editors

Shivnath Babu, Duke University

Lei Chen, Hong Kong University of Science and Technology

Graham Cormode, University of Warwick

Bin Cui, Peking University, China

Wynne Hsu, NUS

Martin Kersten, CWI

Donald Kossman, ETH

Elke Rundensteiner, WPI

Kyuseok Shim, Seoul National University

Wang-Chiew Tan, University of California, Santa Cruz

Letizia Tanca, Poli Milano

Jeffrey Yu, Chinese University of Hong Kong

Experiments and Analysis Track Associate Editors

Gao Cong, Nanyang Technology University

Jens Dittrich, Saarland

Visions Track Associate Editor

Zachary Ives, University of Pennsylvania

Industrial and Applications Track Associate Editors

Umeshwar Dayal, HP

C. Mohan, IBM

Ge Yu, Northeastern University, China

Demonstration Chairs

Mong-Li Lee, NUS
Feifei Li, University of Utah
Sunil Prabhakar, Purdue

Tutorial Chairs

Xiaoyong Du, Renmin University
Murat Kantarcioglu, University of Texas, Dallas
Divesh Srivastava, AT&T Labs

LETTER FROM THE PROGRAM CHAIRS

Welcome to a new volume of PVLDB. We are excited about several new initiatives in place this year. Here, we would like to tell you about our new paper tracks.

In many places, it has been reported that the standard research paper structure is not suited for many innovative and worthwhile intellectual contributions. To make room for such contributions, in addition to the traditional research paper track, we have four additional paper tracks this year.

The Innovative Systems track is meant for systems papers where there is substantial innovation in the “whole”, for instance, in the architecture of the system. A traditional research paper may require a narrow focus on a particular aspect of the system, with careful comparison against competing techniques. In a broad systems context, there may be few meaningful comparisons of the system as a whole, and there may not be enough room for detailed studies of particular components. If the system is significant, novel, and arguably impactful, you should tell the world about it through an Innovative Systems paper.

The Experiments and Analysis (E&A) track has been a part of PVLDB for several years, but is enhanced this year. The idea behind this track is to publish papers that advance the field even if they do not directly develop a new algorithm or system. There are many topics on which there are multiple papers that suggest solutions with no clear winner. A paper that compares the techniques in several such papers can make a great contribution to the field without inventing anything new. Such a paper would be ideal for the E&A track.

In addition to the full-length E&A track, we have this year introduced a new E&A mini-paper track. The idea is to publish short (4 page) papers that advance the field without a comprehensive analysis of the sort one may expect of a full E&A paper. For example, an additional experiment that shines new light on a previously published paper would make a good candidate for an E&A mini-paper.

We have also introduced a Vision mini-paper track. This is a paper that paints a compelling picture of the future in 4 pages, and suggests a possible path to get there. Full details are not required, but the concept has to be visionary.

We hope you enjoy these new paper tracks in PVLDB this year, in addition to the main research track, which continues to flourish.

H. V. Jagadish, University of Michigan
Aoying Zhou, East China Normal University
Program Chairs, VLDB 2014
