HORACE HART, PRINTER TO THE UNIVERSITY

PREFACE

THE hundred and fifty-eight texts included in this first volume of the Oxyrhynchus Papyri are selected from the twelve or thirteen hundred documents at Oxford in good or fair preservation which up to the present time we have been able to examine, and from the hundred and fifty rolls left at the Gizeh Museum.

The bulk of the collection, amounting to about four-fifths of the whole, has not yet been unpacked. The selected texts have been chosen partly to illustrate the scope and variety of the collection, partly because their comparative completeness rendered the task of editing them less difficult; for the question of time has been a pressing one. We may perhaps be allowed to draw our readers' attention to the fact that the interval between the arrival of the papyri in England and the completion of this book has been less than eleven months, and that besides deciphering and commenting on the texts contained in it we have, at the request of several subscribers to the Graeco-Roman Branch, in most cases given translations. It has of course been impossible in the limited time at our disposal to solve many of the problems of restoration and interpretation which beset any fresh

collection of papyri, and especially one coming from a new site and abounding in novelties of all kinds. The rapidity of its publication will, we hope, be regarded as some excuse for the shortcomings of this volume.

The texts now published fall into two classes, the literary and the non-literary. The examples of the former are probably a good specimen of what may be expected in future volumes. It is not very likely that we shall find another poem of Sappho, still less that we shall come across another page of the 'Logia.' The chances against any individual discovery of great value are always considerable. But we have no reason for thinking that the surprises to come will be much less exciting than those which have gone before.

In editing the new fragments of Greek classical literature, at once the most interesting and the most difficult part of this volume, we have had the assistance of Professor F. Blass, who visited Oxford last July, and with whom we have since been in frequent correspondence. We tender him here our warmest thanks for his generosity in placing at our disposal his rare combination of profound scholarship, palaeographical skill, and brilliancy of imagination.

Of the non-literary papyri, which range over the first seven centuries A.D. and are of a very miscellaneous character, those of the sixth and seventh centuries have been kept distinct from those belonging to the centuries preceding. Within these groups chronological order has not been observed, but documents have been roughly arranged according to subject. In future volumes we hope to proceed on a more definitely chronological system.

To the hundred and fifty-eight texts here given we have added

PREFACE

descriptions of forty-nine documents at Oxford which we have copied, but which for various reasons it seemed unnecessary to print in extenso. Those Oxyrhynchus papyri in the Gizeh Museum which are not published here will be fully described in the new official catalogue of that Museum which is now in course of preparation, and of which the division of Greek Papyri has been entrusted to ourselves. The ultimate destination of the papyri in England has not yet been decided; but we shall from time to time issue statements as to the Museums in which the originals are to be found.

In conclusion, we have to thank the subscribers to the Graeco-Roman Branch, who have rendered this publication possible, and to assure them that we shall endeavour to give them a volume of equal interest next year.

NOTE ON THE METHOD OF PUBLICATION AND LIST OF ABBREVIATIONS USED

IN the following pages literary texts (with the exception of No. v) are printed just as they were written, except that words are separated from each other. Only those stops, breathings and other lection signs are inserted which are found in the original.

The non-literary texts have been printed in ordinary type and in modern form with accents, breathings and stops. Abbreviations and symbols in the text are resolved, except in those cases in which a sum is written out both in words and signs; elsewhere symbols are relegated to the critical notes, as also are lection signs, e.g. diaereses, except those over figures. Owing to the exigencies of the press, a sign which occurs more than once is as a rule only printed on the first occasion on which it is used. Iota adscript is reproduced wherever it was actually written; otherwise iota subscript is printed. Faults of orthography are corrected in the critical notes wherever they seemed likely to cause any difficulty. Corrections, if written in a hand different from that of the body of the papyrus, are printed in small type; if not, in the same type as the rest of the text.

Square brackets [] indicate a lacuna, round brackets () the resolution of an abbreviation or symbol, angular brackets () the omission in the original of the letters enclosed; double square brackets []] indicate that the letters enclosed have been erased in the original. Dots placed inside brackets represent the approximate number of letters lost or erased. Dots outside brackets indicate mutilated or otherwise illegible letters. Letters with dots under them are to be considered uncertain.

Small Roman numerals refer to the papyri of this volume; large ditto to columns; Arabic numerals by themselves to lines.

PART I. THEOLOGICAL

I. AOFIA IHCOY 1.

15 × 9.7 cm.

To summarize the literature evoked by the publication of the 'Logia,' and to answer the criticisms directed against the view which we suggested, is far too large a task to be entered on here, though perhaps we may attempt it on some future occasion. The reader will find a useful bibliography of the literature, and a lucid exposition of the different explanations of the text and theories of its origin in *Two Lectures on the 'Sayings of Fesus*,' by Professors Lock and Sanday (Clarendon Press, 1897), though from some of their conclusions we should dissent.

We confine ourselves here to noting briefly those points connected with reading and interpretation in which we consider that criticism has made a definite advance, and to giving a revised text and translation.

In Logion II the parallels adduced from Clement of Alexandria by Mr. J. B. Mayor leave little room for doubt that νηστεύειν τὸν κόσμον is to be taken metaphorically.

Many critics have wished to connect $\tau \eta \nu \pi \tau \omega \chi \epsilon (a\nu)$, our Logion IV, with the preceding saying. Of the various conjectures, we prefer Dr. Taylor's $\beta \lambda \epsilon / [\pi \omega \nu \omega \nu \alpha \nu \tau \hat{\mu} \nu \tau \alpha \lambda \alpha \iota / \pi \omega \nu \tau \alpha \nu$

 $^{^1}$ See separate publication, $\Lambda O\Gamma IA$ IHCOY, Sayings of Our Lord, edited by B. P. Grenfell and A. S. Hunt. H. Frowde 1897.

the extent of the lacuna, any attempt to fill it up must be purely hypothetical. And a conjecture which presupposes a definite number of lines lost is thereby rendered very doubtful.

The difficulties of the fifth Saying have not yet been surmounted. Of the numerous restorations of the three mutilated lines we on the whole prefer that of Blass, $\lceil \lambda \epsilon \gamma \rceil \epsilon \iota$ $\lceil i \rceil \eta \sigma o \hat{v} s \delta \pi \rceil o v \epsilon \hat{a} v \delta \sigma \iota v \mid \lceil \bar{\beta}, o \hat{v} \kappa \rceil \epsilon \lceil i \sigma i \rceil v \delta \theta \epsilon o \iota \kappa \epsilon i \mid \lceil \delta \rceil \pi o v \epsilon \lceil i s \rceil$ $\epsilon \sigma \tau \iota \nu \mu \acute{o} v \circ \varsigma$, $[\lambda \acute{\epsilon}] \gamma \omega$, $\dot{\epsilon} \gamma \acute{\omega} \epsilon \dot{\iota} \mu \iota \mu \epsilon \tau' \alpha \dot{\nu} \tau [\circ \hat{\nu}]$, though neither the cipher $\bar{\beta}$ nor $\lambda \acute{\epsilon} \gamma \omega$ are very satisfactory (but cf. ii. recto 9 for a number in the text written in figures). With regard to the last part of the Saying 'Raise the stone,' &c., we do not think that the pantheistic meaning is in itself either probable or relevant to the context, though it might have been imported into it at a later period when the original meaning had been lost sight of. We incline to the view that raising the stone and cleaving the wood are meant to typify the difficult work of life, see Heinrici (Theol. Literaturzeitung, Aug. 21, 1897); but we are of opinion that the reference to Ecclesiastes x. 9, in which Professors Swete and Harnack find the key to the problem, raises difficulties greater than those it can solve. The objections to it have been excellently stated by Lock (op. cit. p. 24). Though unable to offer any better suggestion, we are somewhat less confident than we were about the correctness of the reading έγειρον. The o seems to be joined by a ligature to the preceding letter, which we should therefore expect to be σ rather than ρ . But the apparent ligature might be accounted for by supposing that the o was badly written.

Alone of restorations Swete's $\frac{\partial \kappa}{\partial t} = \frac{\partial k}{\partial t}$

Lastly, with regard to the questions of origin and history, we stated in our edition our belief in four points: (1) that we have here part of a collection of sayings, not extracts from a narrative gospel; (2) that they were not heretical; (3) that they were independent of the Four Gospels in their present shape; (4) that they were earlier than 140 A.D., and might go back to the first century. These propositions, especially the first, have, as is natural, been warmly disputed. Attempts have been made to show that the 'Logia' were extracts from the Gospel according to the Egyptians (Harnack), the Gospel according to the Hebrews (Batiffol), or the Gospel of the Ebionites (Zahn): and Gnostic, mystic, Ebionite, or Therapeutic tendencies, according to the point of view, have been discovered in them. On the other hand our position has received the general support of critics such as Swete, Rendel Harris, Heinrici, and Lock; and so far the discussion has tended to confirm us in our original view.

II. St. Matthew's Gospel, Ch. I.

Plate I (frontispiece). 14.7 × 15 cm.

Part of a sheet from a papyrus book, which had been folded originally to make two leaves. Of one of these only a small portion is left, containing on the *recto* the beginnings of three lines written in good sized uncials:—

MHŢ[ΜΗŢ[

The other leaf, which is tolerably complete and is written on both sides in a smaller and probably different uncial hand, with an occasional tendency towards cursive, contains vv. 1-9, 12, 14-20 of the first chapter of St. Matthew's Gospel. This papyrus was found near that containing the 'Logia,' a day or two afterwards. Though the writing is somewhat later in style than that of the 'Logia,' there is no likelihood of its being subsequent to the beginning of the fourth century, and it may with greater probability be assigned to the third. It may thus claim to be a fragment of the oldest known manuscript of any part of the New Testament.

The part preserved consists mainly of the genealogy, and the variants are not many, nor important, being chiefly found in the spelling of the proper names. So far as the papyrus goes, it tends to support the text of Westcott and Hort against the Textus Receptus. The common biblical contractions $\overline{\text{IC}}$, $\overline{\text{YC}}$, $\overline{\text{INA}}$, $\overline{\text{KC}}$, examples of which already occur in the 'Logia,' are also found here. A stop occurs in line 17 of the *verso*, and a rough breathing in line 14 of the *recto*. An apostrophe is occasionally placed after foreign names and the diaeresis over iota is common. The two sides of the leaf containing the St. Matthew are numbered a and β , and it is noteworthy that the *verso* is uppermost.

As the arrangement in the quire of the two leaves forming the sheet is wholly uncertain, the question what relation, if any, the beginnings of the three lines on the other leaf have to the St. Matthew fragment cannot be determined. The difference in the handwriting and the greater margin above the three broken lines distinguish them from the text of St. Matthew, though they may have formed a title of some kind.

A facsimile of the *verso* is given in the frontispiece. The condition of the *recto* is not so good, the writing being entirely effaced in some parts.

To sum up the results of the collation, the papyrus clearly belongs to the same class as the Sinaitic and Vatican codices, and has no Western or Syrian proclivities. Except in the cases where it has a reading peculiar to itself alone, the papyrus always agrees with those two MSS, where they are in agreement. Where they differ, the papyrus does not consistently follow either of them, but is somewhat nearer to the Vatican codex, especially in matters of spelling, though in one important case $(\tau \circ \hat{v} \ \delta \hat{\epsilon} \ i\eta \sigma \circ \hat{v} \ X \rho \iota \sigma \tau \circ \hat{v})$ it agrees with the Codex Sinaiticus.

III. St. Mark's Gospel, Ch. x. 50, 51; xi. 11, 12.

 4.5×8.3 cm.

Fragment of an early vellum codex containing part of St. Mark x. 50, 51, xi. 11, 12 in a calligraphic uncial hand, probably of the fifth or sixth century. The MS. to which the fragment belonged was of the same class as the Codex Alexandrinus, and the part preserved agrees with the Textus Receptus.

IV verso. Theological Fragment.

 12.7×7.2 cm. Frag. (a).

Fragment of a theological work, probably Gnostic in character, concerning the 'upper' and 'lower' soul. The contraction $\overline{\Theta C}$ occurs.

The verso of the papyrus is written in a medium-sized sloping uncial, resembling the Plato papyrus (Plate VI). On the recto are the beginnings and ends of a few lines in third or early fourth century cursive. The writing on the verso is probably early fourth century.

V. EARLY CHRISTIAN FRAGMENT.

12 × 11.4 cm.

Fragment of a Christian homily or treatise on the spirit of prophecy. The papyrus, which is a leaf out of a book, is written in a good-sized informal uncial hand of the late third or early fourth century. The ordinary biblical contractions $\overline{\Pi NA}$, \overline{KC} , \overline{IC} , \overline{XC} occur. The *recto* is in much better condition than the *verso*, the top layer of which has to a considerable extent peeled off.

VI. AGTS OF PAUL AND THECLA.

 7.3×6.7 cm.

Vellum leaf from a book containing the Acts of Paul and Thecla, the part preserved containing portions of chapters viii and ix.

The leaf is written in a small, somewhat irregular uncial of probably about the fifth century. The *verso* is much stained. Stops are occasionally used, and the space at the end of short lines is filled by \rangle . The text of this MS. varies a good deal from the others, which are all later than it by five centuries or more. We append a collation with Tischendorf's text (*Acta Apostolorum Apocrypha*).

PART II. NEW CLASSICAL FRAGMENTS

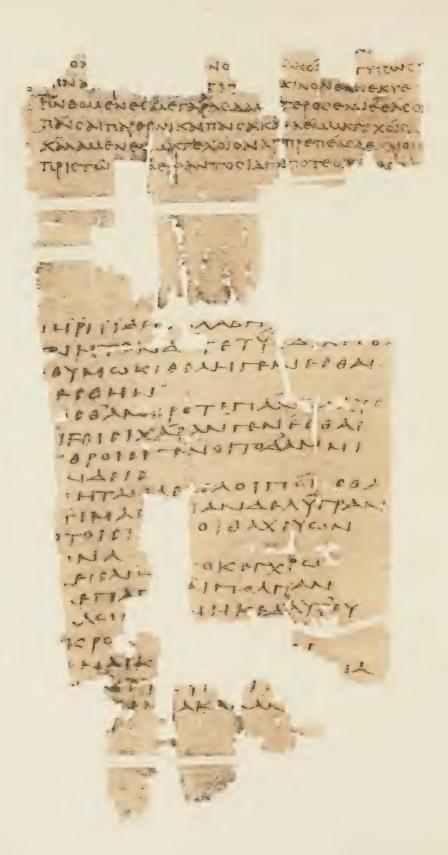

VII. SAPPHO.

Plate II. 19.7×9.6 cm.

Part of a poem in Sapphics written in the Aeolic dialect. Portions of twenty lines are preserved, a foot and a half being lost at the beginning of each line, besides occasional lacunae. In spite of its mutilated condition, however, enough remains of the poem to determine its subject and authorship with tolerable certainty. The reference to the poet's brother who is returning home across the sea (stanza 1), the tone of gentle reproach for some misdeed committed by that brother in the past which the poet now wishes to bury in oblivion, the dialect and metre, the obvious antiquity of the poem as shown by the presence of the digamma in line 6, the resemblances in thought and phrase to the known fragments of Sappho—combine in favour of the hypothesis that we have here part of an ode addressed by Sappho to her brother Charaxus. Charaxus (Hdt. ii. 135; Strab. xvii. p. 808; Athen. xiii. p. 596; Suid. vv. Aἴσωπος and Ἰάδμων, and especially Ovid, Her. xv. 63 sqg., 117), who was a trader in Lesbian wines, conceived a violent passion for the famous courtesan, Rhodopis, then a slave at Naucratis. He went to Egypt, ransomed her, and spent all his substance on her maintenance. When he returned to Lesbos, Sappho gave vent to her indignation in verse. Charaxus, if we may believe Ovid, I.c., was on his side not less incensed, and resumed his occupation as a trader, rejecting all the subsequent advances made by Sappho for a reconciliation. We conceive the fragment to be one of these vain appeals offering to forget the past.

The papyrus is written in a good-sized square slightly sloping uncial

Nos. VII AND VIII

which we should assign to the third century. Cf. Plate II with Plate VI, the Plato papyrus written before 295. Apostrophes marking elision, stops, accents, and marks of quantity are occasionally inserted. Iota adscript is written once, omitted 4, perhaps 5, times. The omission is usual in papyri of this date and in later Aeolic inscriptions, but Sappho herself must have written it.

The following brilliant restoration we owe to Professor Blass, to whom also most of the notes are due. We give a rather literal verse translation. At the beginning of the poem Blass thinks that not more than one stanza is lost, and that line 20 of the papyrus may have been the last.

[σὺν δὲ καὶ ὕμμες],

'Sweet Nereids, grant to me
That home unscathed my brother may return,
And every end, for which his soul shall yearn,
Accomplished see!

And thou, immortal Queen,
Blot out the past, that thus his friends may know
Joy, shame his foes,—nay rather, let no foe
By us be seen!

And may he have the will

To me his sister some regard to show,

To assuage the pain he brought, whose cruel blow

My soul did kill,

Yea, mine, for that ill name Whose biting edge, to shun the festal throng Compelling, ceased awhile; yet back ere long To goad us came.'

1. The poem probably began with an invocation to Aphrodite, who no doubt is the goddess addressed in 5, ἄμβροτε.

3. Cf. Sappho i. 17 κώττι μοι μάλιστα θέλω γένεσθαι μαινόλα θύμφ, and i. 26 όσσα δέ μοι

τέλεσπαι θύμος ἰμέρρει.

5. ΠΡ]ΟCΘ': i.e. her quarrel with Charaxus about Rhodopis. In the next line Charaxus is the subject of γένεσθαι.

6. The only other place where the digamma is found in a papyrus is in the Paris

fragment of Alcman, 6.

10. The restoration of this stanza is much more difficult than that of the preceding two. δνίαν λύγραν can be accusative singular or genitive plural. Blass prefers the latter alternative, making ὅτοισι agree with it. There is but one instance for ὅτον, ὅτφ etc. used with a feminine antecedent, Eurip. Iph. in Taur. 1071 μητρὸς πατρός τε καὶ τέκνων ὅτφ κυρεῖ, a verse which Dindorf cancels. For πάροιθ ἀχεύων, πάροιθα χεύων could be read, but with what sense?

12. ΕΔΑ]ΜΝΑ: cf. Sapph. i. 3 μήτ' ὀνίαισι δάμνα, πότνια, θθμον.

13-14. There is no instance of $\kappa \eta \rho$ in Aeolic; Pindar has the form $\kappa \epsilon a \rho$, but $\eta \rho$ in place of $\epsilon a \rho$ is an Aeolic spelling. The $\delta \nu \epsilon t \delta t \sigma \mu a$ is of course Charaxus' relations with Rhodopis.

ΕΓ ΧΡω: cf. Soph. Ajax 786 ξυρεί γαρ εν χρώ τοῦτο μη χαίρειν τινά. κέρρον=κείρον.

έλλειν (είλειν) = κατέχειν, Hesych.

14. ἐπ' ἀγλαΐα πολίταν: the meaning is that Charaxus was unable to take part in the f estivities of the citizens owing to the reproach he had incurred.

15. δαὖτε, or δηὖτε, 'again' is common in Sappho, e.g. i. 15.

18-19. The position of the fragment containing the letters JAYF[..]P€ and JNAKAKANF is doubtful. $\nu\nu\kappa\tau$ i... $\kappa\alpha\tau$ $\theta\epsilon\mu$ $[\epsilon\nu]a$ burying in darkness.

VIII. ALCMAN?

Plate II. 6.1×10.9 cm.

Fragment containing seven hexameter lines, four of them practically complete. The paragraphus accompanied by a marginal flourish at line 4 marks the beginning of a new poem, as it does in the Bacchylides papyrus. The dialect is a mixture of Aeolic and Doric such as is found in Alcman, to whom Blass would attribute the authorship of the fragment. The Aeolic forms are the at and of in παίσαι and έχοίσαι (cf. ένθοίσα in the Paris fragment of Alcm. 73), the doubling of the μ in $\xi\mu\mu\alpha\tau\alpha$, and $-o\mu\epsilon\nu$ instead of $-o\mu\epsilon s$ in $\eta\nu\theta o\mu\epsilon\nu$. The form -ομες is indeed found in the Paris fragment 10, παρήσομες; but ήνθομες ϵ s would have produced an intolerable cacophony. Doric forms are the ν for λ in ἥνθομεν, ἐάσσαι, ποτεοικότας; and all the accents used are Doric. The digamma is once retained—though not written—but thrice dropped. In the fragments of Alcman's lyric poems it is often neglected, as it is by the Lesbian poets, but there is not enough left of his hexameters to show what principle he followed in them.

Accents, apostrophes marking elision, and marks of quantity are used occasionally, as in the Sappho fragment. The papyrus is written in a small neat round uncial of the latter part of the first or of the second century.

Line 4 sqq.

'We came to great Demeter's fane, we nine, All maidens, all in goodly raiment clad: In goodly raiment clad, with necklets bright Of carven ivory, that shone like [snow].'

2. The doubtful ϵ at the end of the line might be θ .

3. Blass suggests [P]HNÂ[I, i.e. 'Ρηναία or 'Ρηνεία. Either]ΤΙΤ[or]ΓΙΤ[is possible.

5-6. For the variation in the quantity of καλά cf. Theocr. vi. 19 τὰ μὴ καλὰ καλὰ

πέφανται.

7. πριστοῦ ἐλέφαντος is Homeric; cf. Od. xviii. 196; xix. 564. Blass would read the last word of this line AIΓ[ΛΑΙ, the next line commencing (e.g.) λευκοτάτας χιόνος. But if the third letter is Γ there should be some trace of the vertical stroke, which there is not; and therefore T or, less probably, $\mathsf{\Pi}$ are preferable. AIT[NAC does not seem very suitable, though cf. Pind. Pyth. i. 38 νιφόεσσ' Αἴτνα, πάνετες χιόνος ὀξείας τιθήνα. Possibly the word is AIT[E or AIT [W N.

IX. ARISTOXENUS PYOMIKA CTOIXEIA.

Plate III. 22.7×43.5 cm.

The following text is a fragment of a treatise upon metre. Parts of five columns are preserved; but of these the first has but a few letters at the ends of the lines, and although the following three are practically complete so far as they go, the last only has its full complement of lines. Enough however remains to give a fairly connected sense; and to leave little doubt that the writer was the chief authority of antiquity upon this subject, Aristoxenus of Tarentum. Of his principal work on metrical theory, the ρυθμικὰ στοιχεῖα in three books, the beginning of the second book has been preserved; and stylistic, linguistic and technical affinities all tend to show that our fragment belongs to this treatise. The 'Aristoxenian Cretic,' for instance (cf. Schol. Hephaest. p. 173, Gaisf.), consisting of a double trochee—the converse of the δάκτυλος κατ' ἴαμβον or double iambus, cf. Col. V. 12—figures at the beginning of Col. II. As a peculiarity in language the preference of ξ to σ in the spelling of $\sigma \dot{\nu} v$ and its compounds, which is traceable in all that survives of Aristoxenus and is particularly prominent in the present text, calls for special mention. Other points of contact will be noted as they occur. When to such considerations is added the general resemblance in style—which is more to be felt than described—the identification assumes, if not certainty, at least a high degree of probability.

The subject of Columns II and III is the occurrence in various metres of 'syncope.' The long syllable (-) is of course ordinarily equivalent to two time units (00); but by 'syncope' it may be under certain conditions lengthened to the value of three or more. The metrical signs usually employed to represent such a lengthened syllable are 100 mu, according as it is augmented by one, two, or three time units. The use of this figure, which is equally common in modern poetry, is here illustrated by quotations from lyric poems. These quotations form one of the chief features of interest in the fragment. They have a common feature in their Dionysiae character, which suggests that they were derived from Dithyrambs or Satyric Dramas. In Column IV the pacon is treated of in reference to the resolution of long into short syllables; but the connexion of

this discussion with what precedes and follows is obscured by the mutilation of the papyrus. In the fifth Column the question is the admissibility of the forms discussed in Columns II and III $(\stackrel{\smile}{\smile} - \stackrel{\smile}{\smile} - \text{and} - \stackrel{\smile}{\smile} - \stackrel{\smile}{\smile})$ in dactylic and anapaestic metres.

The script of this papyrus is a clear, upright uncial (cf. the accompanying facsimile of Columns IV and V), which we should assign to the first half of the third century. This date is indicated not only by the character of the hand itself, but also by a semi-uncial document (pp. 77 sqq.) on the verso, which can hardly be later than about the year 320. A number of corrections have been made in the manuscript by a second, though not much later, hand, to which is due the single accent that occurs (III. 16). Sentences are marked off by marginal paragraphi, which, as in the Thucydides papyrus (No. xvi), are usually, though not invariably, combined with blank spaces in the text.

In editing this fragment we have received much help from Prof. Blass, to whom we are indebted for a number of readings, for the more considerable supplements, and to a large extent for the explanatory notes.

Col. II. 'These then are the rhythms most appropriate to such a cadence. It may also be employed by the "Iambic-dactyl," in which the syllables composing the cadence are placed with reference to its beats in the reverse position to that which they occupied in the cretic. The metrical basis upon which the system proceeds will be the iambus. For example:—"Where the fields | which decay | not nor fade | receive in their | embrace by sha|dy woodland deeps | delicate | maiden-throngs | celebrat|ing Bacchus." Here the cadence is used as we have described in the first three feet, and also in three other feet further on. Again:—"Who soe'er | pleasure takes | in good cheer | and the dance." But this rhythm is not used for long in a system of this kind. Such a cadence may be employed....

Col. III. [Similar to the "Iambic-dactyl" is] the form [called the baccheic], though it shows variations of rhythmic scheme in the lines:—"To the Hours | cherished de|light to men | respite for a | space from la|bour." As many as three such feet may occur together:—"All-revered | god, a chaste | mother's child |, hers who of old | was in the wealth|teeming renowned | city of Thebes | born to Cad|mus." The same cadence may be employed by the iambus, though it is less graceful than when used by the baccheus, for the single beat is more appropriate to a trochaic rhythm than to the iambus. For instance, in the lines:—"On|ward, on|ward now, | ye maids, || Come | ye speed|ing on to | the front. || Who then can | that mai|den be? || With | what grace | about | her flows || . . . !" the syncope occurs at intervals of three feet, so as to produce a kind of period. These usages

Col. IV. three short syllables. The same account holds good of the paeon. For this too may consist of five component syllables, and therefore, evidently, of five short ones also. A continuous use would not be made of such a rhythm; for its character is quite alien to the paeon and the feet previously mentioned. It might, however, be used if its especial appropriateness in combination with other feet should commend it, though, as a general rule, owing to the difficulty previously raised, it is perhaps better to

leave untried uses which exhibit mixed rhythms not approved by common taste. Else why should this [cadence] not be employed [? by the dactyl and anapaest ?

Col. V. That such a rhythm] will approximate to the anapaestic form is fairly clear. But what is there to prevent the use of the reverse form, in which the first syllable has the longest time, the second the shortest, and the third a mean between the two? It is evident that this same question may also be put with regard to the cadence which is the reverse of the four-beat cretic. For why should not either two iambic feet with different tempo be used, or two trochaic feet...? Concerning this form the foregoing account will be sufficient; for that the unnatural arrangement of the syllables does not enter a dactylic system may be easily gathered from what has been said. The four-beat cadence beginning with a short syllable, being of iambic type, is from the nature of its rhythms appropriate to the iambus. The ... forms of this cadence are ..., so that it is not easy to meet with a continuous use of them.'

I. 12. μονο | χρον . . ? Cf. III. 12.

13. CΠA: Probably some form of σπάνιος; perhaps σπα [νίως μέντοι καὶ οὐκ έ]πὶ πολύ.

II. 1. The preceding column must have ended with OIKEIOTATOI (cf. III. 13) or some similar word.

OI PYOMOI OYTOI: One of these was certainly the cretic; cf. 7.

2. ΛΕΞΕωC: i.e. the λέξις τρίχρονος - ω -, one of the long syllables having the value

of one long and one short syllable.

3. ΔΑΚΤΥΛΟC Ο ΚΑΤΑ IAMBON: Corrected by the second hand from IAMBOC Ο ΚΑΤΑ ΔΑΚΤΥΛΟΝ. δάκτυλος κατὰ ἴαμβον is the Aristoxenian term for $\mathbf{0} - \mathbf{0} - \mathbf{0}$; \mathbf{v} . Aristides $\pi \epsilon \rho \lambda$ μουσικῆς 39, where it is described along with the Aristoxenian cretic $-\mathbf{0} - \mathbf{0}$, cf. Schol. Hethaest., p. 173, Gaisf. διτρόχαιος . . . δ καὶ κρητικὸς κατ' ᾿Αριστόξενον.

4. $\Pi \in PI \mid EXOYCON :$ i.e. the three syllables of which the $\lambda \ell \ell \iota s$ consists; cf. 1V. 3. In the cretic measure of three instead of four syllables, the lengthened syllable is placed

last $(- \cup \bot)$; in the $\delta \acute{\alpha} \kappa \tau$. $\kappa \alpha \tau \grave{\alpha} ' \acute{\alpha} \mu \beta$. it stands first $(\bot \cup -)$. Cf. V. 3 sqq.

5. ΤΕΘΕΙΙCWN ΕΙΟ ΤΟΥΟ ΧΡΟΝΟΥΟ: cf. Aristox. ρυθμ. στοιχ. β 270 (Westphal

Metrik der Griechen App. p. 5) λέξις είς χρόνους τεθείσα διαφέροντας.

9. CIC | IAMBON: in the cases previously treated of (e.g. the cretic, cf. l. 1, note) the metrical basis was the trochee.

14. $\Delta \in XONTAI$: scanned $\circ - \rightarrow$, the catalectic form of $\circ - \circ -$.

15. $\Pi \in NT \in \PiP \omega TOI$: transposed by the corrector; cf. IV. 15. An earlier instance of this method of indicating a transposition by the use of the letters a and β occurs in the Thucydides papyrus (No. xvi).

20. AYTHI: I, which was originally omitted, may have been inserted by the first hand.

III. 1. Blass suggests that the sentence may have run:—ἔστι δὲ παρόμοιον τῷ δακτύλῳ τῷ κατὰ ἴαμβον τὸ κατὰ βακχεῖον (or βακχειακὸν) κολούμε]νον εἶδος κ.τ.λ. We learn from the later writers on metre that βακχεῖος was the name given by the 'musici'—by which term they allude especially to Aristoxenus, v. Blass in Neue Jahrb. f. Philol., 1886, p. 451—to the choriambus (– $\circ \circ$); cf. Caesius Bassus 268, 21, Mar. Victor. 149, 32. In Aristides περὶ μουσικῆς 39 this measure is called δάκτυλος κατὰ βακχεῖον τὸν ἀπὸ τροχαίου.

2. ΠΑΡΑΛΛΑΤΤΕΙ: e.g. in the use of the form $-\omega \omega$. The quotation may best be scanned thus: ϕ ιλον ω |ραισιν αγα|πημα θ να|ποισιν ανα|παυμα μο| $\chi \theta \omega \nu$. The subject is evi-

dently wine.

5. €CTI: sc. ή τοιαύτη λέξις (- ∪ -).

€ΠΙ ΤΡ€ΙC: sc. πόδαs: for this meaning of ξυνεχής cf. Aristox. ρυθμ. στοιχ. β 300 (Westphal op. cit. App. p. 12). The feet in question are the first three of the quotation.

9. MOAYOABIOIC. The reading of the first hand, MOAYOABOICIN, gives a very bad rhythm in the last foot but one. The correction ΠΟΛΥΟΛΒΙΟΙC will make the last foot (-βίοις Θήβαις) a βακχείος ἀπὸ ἰάμβου (υ – υ) instead of a βακχείος ἀπὸ τροχαίου; cf. note on III. I. Perhaps MOAYOABOICI is the true reading, in which case the scansion will be as follows: φερτατον | δαιμον, αγ|νας τεκος | ματερος, αν | Καδμος εγεν|νασε ποτ εν | ταις πολυολ|βοισι Θη|βαις. There will then be syncope in the penultimate foot as well as in the first three.

ro. O IAMBOC. There is here a distinction (which applies equally to the cretic as opposed to the trochee) between ιαμβος and δάκτυλος κατὰ ιαμβον. The δάκτυλος κατὰ ιαμβον is measured by dipodiae, the $\alpha\mu\beta\sigma$ by monopodiae $(\upsilon - \upsilon - | \upsilon - \upsilon - |$ as opposed to $\upsilon - |\upsilon - |\upsilon - |\upsilon - |$. Cf. V. 25 sqq.

12. MONOXPONON: a foot, or part of a foot, has only one χρόνος when it consists of

a single syllable.

13. TPOXAIKOY. Not τροχαίου, because Aristoxenus is speaking of the first half of the choriambus (or, as he calls it, baccheus), not of the trochee per se.

16. NEANIC: Dionysus? Cf. Aeschylus fr. 55 (ap. Aristoph. Thesm. 134 sqq.)

ποδαπός ό γύννις;

- 19. ΞΥΝΖΥΓΙΑΙ: In Aristides (op. cit. 36 sq.) ξυζυγία is the term used for a combination of two feet, as for instance that of the trochee and iambus in the choriambus. Here, however, it can only mean the combination of two χρόνοι, elsewhere distinct, into one syllable, i.e. syncope.
- 20. ΠΕΡΙΟΔωΔΕC ΤΙ: cf. Aristides l. c. συζυγία μὲν οὖν ἐστὶ δύο ποδῶν ἁπλῶν καὶ ἀνομοίων σύνθεσις, περίοδος δὲ πλειόνων.

IV. 1. ωN, which begins the column, is probably the termination of τρι ων. There is an apparently meaningless slightly curved vertical stroke above the ω of [H]MI[CE] ω N.

2. TIAIWNOC: the paeon ordinarily consists of a combination of one long and three short syllables, in any order. There is also the παιων ἐπιβατός (Aristides op. cit. 38 sq.) of five long syllables, to which Aristoxenus here seems to refer (ἐκ πέντε περιεχόντων δύνυται ξυντίθεσθαι), before proceeding to note the form consisting of five *short* syllables.

3. ΠΕΡΙΕΧΟΝΤώΝ: sc. χρόνων; cf. II. 4, note.

5. HMICEWN; i.e. morae or short syllables; cf. Psell. 1 (Westphal op. cit. App. p. 4) ημισυ μέν γὰρ κατέχειν τὴν βραχείαν χρόνου, διπλάσιον δὲ τὴν μακράν.

12. Cf. another marginal sign in V. 10. EN KATAMEIZEI: the antithesis of $\xi v \nu \epsilon \chi \hat{\omega} s$.

15. The corrector has placed καθόλου after ἀπορίαν.

- ΠΡΟ ΕΚΚΕΙΜΕΝΗΝ: ἐκκεῖσθαι occurs in this sense in Aristox. ῥυθμ. στοιχ. β 298. 17. EATEON: Aristoxenus seems to have been very fond of verbal adjectives.
- 22. Blass would complete the sentence λέξει καὶ τὸν δάκτυλον ἡ τὸν ἀνάπαιστον; cf. V.
- 1. As the context shows, the subject to be supplied is a $\lambda \in \mathcal{S}$ of the form $\cup \cup$. 2. The fragment containing the letters NΔ of σχεδον δήλον does not appear in the facsimile.
- 4. THN MEN $\Pi P \omega T H N \kappa.\tau.\lambda$: i.e. why should not $L \omega$ be used (instead of the dactyl)?

9. H AYTH A[YT]H: cf. III. 10, 11.

10. THN ANTIKEIMENHN Λ.: i.e. the δάκτυλος κατὰ ἴαμβον. We gather from this that in the latter part of the previous column the possibility of the use of - o - o instead of a dactyl or anapaest was discussed.

13. The overwritten C (which owing to a thickened top looks more like €) may have

been written by the first hand. With λαμβικοῖς supply χρόνοις (sc. χρόνοις συνθέτοις, cf. ρυθμ.

στοιχ. β 284), i.e. \circ – (thesis) \circ – (arsis).

14. $\Pi[.][.]NOMENHN:$ Blass suggests $\pi[\epsilon\pi\nu\kappa]\nu\omega\mu\dot{\epsilon}\nu\eta\nu$, which gives an excellent sense, and may be right, although the letters $\epsilon\Pi\gamma\kappa$ must have been written in rather cramped fashion to get into the lacuna, and the scant vestiges of the third letter do not suggest Π . $\pi\nu\kappa\nu\dot{\nu}\nu$ is the term of Aristoxenus for a sequence of short syllables, cf. $\dot{\rho}\nu\theta\mu$. $\sigma\tau\sigma\iota\chi$. β 302. $\pi\epsilon\pi\nu\kappa\nu$. $\dot{\rho}\nu\theta\mu\sigma\sigma\iota\dot{\iota} a$ would here mean the use of four separate $\chi\rho\dot{\rho}\nu\iota$ for the dactyl instead of three or two $(-\simeq)$.

15. AF ω FHN: 'Tempo'. If $-\upsilon - \upsilon$ or $\upsilon - \upsilon -$ were used instead of a dactyl, the resulting increase in the number of *morae* (six instead of five) would have to be compensated by a diminution of time-value, just as the dactyl itself might by a similar variation of

ἀγωγή become equivalent to the trochee.

17. The vestige of a letter visible after the lacuna suits M, Π , or C.

19. Of the traces of letters visible before ΦΑΝΕΡΟΝ, the first may be the vertical stroke of a T or the second stroke of Π or H; the second may possibly be the bottom of \mathfrak{E} , though it is rather curved for this letter, being more like O or Θ ; the third is placed too close to the second to suit anything well but \mathfrak{l} . Blass would read $\gamma \epsilon \gamma \epsilon [\nu \eta \tau a \iota \kappa a \iota \tau \eta \nu \tau \rho \iota \chi \rho \sigma \nu] \circ \nu \delta \iota \mathring{\eta} \nu [a \iota] \tau [a \iota] \tau$

20. A paragraphus may be lost over the beginning of this line.

- 22. $\Theta \in |[C|C: cf. \kappa \epsilon \hat{i} \sigma \theta a \iota in l. 6;$ but the mutilation of $\tau \hat{a} \xi \mu \pi \rho o \sigma \theta \epsilon \nu$ renders the meaning obscure.
- 24. ΦΑ|[NЄΡΑ sqq. For the phrase cf. Aristox. $\emph{\'a}ρμ$. στοιχ. p. 27 Meib. $\emph{\'a}$ δ δ $\emph{\`e}$. . . τόπος φανερός $\emph{\'e}στιν$ $\emph{\'e}κ$ τῶν $\emph{\'e}μποσθεν$.

25. sqq. 0 - 0 - |0 - 0 -| and 0 - |0 - |0 -| are evidently akin. Cf. III. 10, note.

30. Blass suggests [TA Δ -HYEHME]NA (i.e. -- \circ -), but this supplement would take up too much space.

32. The doubtful letter after the lacuna is more like Y than T, which is the only alternative.

33. [Y] may be read instead of [T], and possibly [A] instead of [M].

35. ΧΡΗΙ**CEI**: the first iota has been struck out by the second hand. The sentence may probably be completed οὐ ρά[διον ἐντυχεῖν.

X. Comedy.

14.4 × 14.2 cm.

Fragment of a lost comedy containing parts of 20 lines of which the last 9 are nearly complete. It is written in a medium-sized upright uncial with a slight tendency towards cursive forms, and may be assigned to the second or third century. The colon in line 7 should indicate a change of speaker as in xi and xxiii, and also in the Geneva fragment of Menander. From this point onwards the fragment appears to give a monologue of a slave who wishes for freedom.

XI. COMEDY.

$17.7 \times 17.5 cm$.

Parts of two consecutive columns from a lost comedy. The papyrus is complete at the top and bottom, but the beginnings of the lines of the first and the ends of those of the second column have been broken away. Under these conditions it is difficult to make out any connected sense. In 1–42 we have a dialogue between a young man and a confidential friend or $\pi a \iota \delta a \gamma \omega \gamma \delta s$ (cf. TPOP[IMON in 41) concerning a marriage which had been long arranged for the young man, but which he wishes to break off, having contracted another and secret engagement. At 43 a fresh scene apparently begins, indicated by a marginal note containing the new speaker's name. The fragment has several points of resemblance to the recently-discovered fragment of Menander's $\Gamma \epsilon \omega \rho \gamma \delta s$; see pp. 17, 18 in our edition of it for the characters in that play, and cf. 44 $\frac{2}{3} \epsilon \alpha \gamma \rho \rho \delta s$ $\frac{1}{3} \epsilon \alpha \rho \delta s$ \frac

ξένης in 25 does not suit the κόρη in the Γ εωργός whom Cleaenetus wishes to marry. Perhaps, as Blass suggests, this fragment comes from another play of Menander, with a plot very similar to that of the Γ εωργός, just as the story of his *Andria* very much resembled that of his *Perinthia*.

The MS. is written in a good-sized round upright uncial hand, which is evidently of an early date. It may be placed with much probability in the period from 50 to 150 A.D. As in x, the divisions of the dialogue are marked by a colon. A single high point is used to mark a pause. Accents, breathings, and marks of elision occur occasionally. All these signs seem to be by the original scribe.

XII recto. CHRONOLOGICAL WORK.

 21×55.5 cm.

Six columns from a chronological work giving a list of the chief events in Greek, Roman, and Oriental history, dated by the Olympiads and archons at Athens. The portion preserved concerns the years 355-315 B.C.; and the writer notes events of importance, not only in politics, but in literature and in connexion with the Olympic games.

The roll containing this treatise has been cut down in order that the *verso* of it might be used for some accounts. There is therefore a lacuna at the top and bottom of each column, but not more than a few lines have been lost in either case. The accounts on the *verso* are written in a not very late third century cursive hand, so that the writing on the *recto*, which is in good-sized sloping uncials, can hardly be later than about 250 A.D. Judging by its general resemblance to the handwriting of the Plato fragment facsimiled in Plate VI, we should not put it earlier than 200.

The date of composition can be fixed with tolerable precision. Though the dating is only by Olympiads and archons, and the consuls are not given, the mention of events in Roman history, and particularly the reference to the Vestal Virgins (III. 33–37), preclude an earlier date than B.C. 30; and considering the date of the manuscript itself the *terminus ad quem* may be placed at the end of the second century. To that century we should be inclined to assign

the composition in its present form, though if, as is highly probable, it is a compendium of a larger work, that work may well have been written in the century preceding. The writing of chronologies and chronological compendia was much in vogue during these two centuries, but the materials are too scanty to attempt to trace the authorship of our fragment.

As in the case of the recently-discovered piece of the Parian Chronicle, which covers the period from 336 to 298 B.C., the information given by the papyrus is rather meagre and frequently too indefinite to afford any new light. Alexander's Asiatic campaigns, for instance, are dismissed in four lines, though the writer is somewhat more detailed when he comes to events which interest him, as for instance the invasion of Egypt. In its chronology of events relating to Greek history, the papyrus is generally in accord with the received chronology until the period following the death of Alexander, when it embarks upon a system of its own starting from 320–19 as the date of the Lamian war, and becomes consistently irreconcilable. In its references to Persian and Roman affairs, the dates are generally divergent from those commonly accepted. A full discussion of the difficulties is too large a subject to be entered upon here, but the points of agreement and difference between the papyrus and the received chronology are briefly stated in the notes.

The scribe, though he wrote a good hand, was very ignorant, witness the blunders in V. 6 and 13. These and some other mistakes have been corrected or marked by a different person, who has also added in some places *paragraphi*, stops, iotas adscript, and a few notes, in a semi-cursive hand. Some of the *paragraphi* and stops are due to the original scribe.

	(a) (b) ANOP[AICYTIT AFOPH[TOY O[(ε)	

I. 1-7. 'In the archonship of the second (?) of these (Callistratus, 355-4), at Syracuse, Dion (?) was murdered by Dionysius the tyrant. In the archonship of the third (Diotimus,

Dion (r) was murdered by Dionystus the tyrant. In the archonship of the third (Diothnus, 354-3) the Tiburtines were reduced by the Romans to submission.'

The proposed restoration of the first two lines is very uncertain. Line 4, if more than three letters are lost after TON, must have extended beyond the ordinary limit. The width of the lines is however fairly regular, and so [TETAP is not at all likely. The preceding lines, therefore, must refer to the first or second archonship of this

Olympiad. If KATA in l. 1 refers, as is probable, to the archon, then ΔεΥ/ΤΕΡΟΝ is much more likely than ΠΡωτοΝ, since the only possible divisions, ΤΟΝ ΠΡωτοΝ or TON MPWITON, do not suit the size of the lacunae in ll. 1 and 2. But the real difficulty concerns the name of the person who, according to the papyrus, was murdered at Syracuse by Dionysius, probably in the year 355-4. According to Diodorus xvi. 17 and Plutarch Dion c. 37, Dionysius was expelled from Syracuse in the summer of 356. Does the papyrus imply that Dionysius was still at Syracuse in 355-4? We should reply in the negative. Dionysius' second expulsion is mentioned in II. 6 sqq., and since there is no mention of his first expulsion in the papyrus, if we were to refer this event in 355-4 to the period preceding his first expulsion, we should have to suppose that neither his first expulsion nor the death of Dion were recorded in the papyrus. We should, moreover, be confronted with the difficulty of finding a name to suit the end of 1. 2, and the serious divergence from the received chronology of Dionysius. It is much more probable that the writer of the papyrus placed Dionysius' first expulsion, whether he recorded it or not, in the period before 355-4, and meant that the assassination took place during his exile, but at his instigation. Now by far the most eminent person who was assassinated at Syracuse about 355-4 was of course Dion, and as his name just suits the lacuna we have placed it in the text. It is true that Diodorus (xvi. 31), states that he was murdered έπὶ ἄρχοντος Διοτίμου, i. e. in 354-3; but this divergence between the papyrus and Diodorus only amounts to one year, and need cause no special difficulty. A more serious objection to our hypothesis is the fact that the murder of Dion is always attributed to Callippus, and Dionysius is not known to have been in any way concerned in it. But on the other hand it is not recorded that Dionysius assassinated any one of eminence at this period, and since he ultimately regained his throne owing to the death of Dion, the story of his responsibility for that event is not unnatural.

4-7. On the date of the submission of the Tiburtines cf. Livy vii. 19, who also places

it in the year 354 B.C.

7-15. In the 107th Olympiad Smicrinas of Tarentum won the foot-race. The archons at Athens were Aristodemus, Thessalus, Apollodorus, Callimachus. In the archonship of Apollodorus (350-49)....

9. Either CTAΔ[IO]N CMIKPI[N]AC or CTAΔ[I]ON MIKPI[NA]C can be read. Diodorus

xvi. 37 gives the name as Smicrinas; Africanus ap. Euseb. Έλλ. όλ. 42, as Micrinas.

13-15. The event recorded appears to be some novelty introduced in connexion with the course at Olympia. Γταύτης κατὰ τὸ τρίτον ἔ[τος . . . might equally well be read.

- 16-24. 'In the ro8th Olympiad Polycles of Cyrene won the foot-race. The archons at Athens were Theophilus, Themistocles, Archias, Eubulus. In the first year of this Olympiad (348-7) Plato the philosopher died, and Speusippus was his successor at the school.'
- 22. The date here assigned to Plato's death agrees with the statements of Apollodorus ap. Diog. Laërt. v. 9, and Athenaeus v. 217 b.
- II. 1-11. 'In the 109th Olympiad Aristolycus of Athens won the foot-race. The archons at Athens were Lyciscus, Pythodotus, Sosigenes, Nicomachus. In the second year of this Olympiad (343-2) Dionysius, the second tyrant of Sicily, was deposed, and sailed to Corinth, where he remained teaching letters.'

2. APICTOΛΥΚΟC: K is converted from X. Diod. xvi. 69 calls him 'Αριστόλοχος.

5. The remark at the side, $\kappa \acute{a}\tau \omega$, addressed to the reader, and the insertion of $\delta \acute{\epsilon}$, show that at the bottom of the column some event occurring in the year 344-3 was added by the corrector. Cf. xvi. III. 3, where $\~ar\omega$ refers to an insertion in the margin at the top of the column.

6. The date of Dionysius' deposition agrees with that of Diodorus xvi. 69, 70.

11-17. In the archonship of Nicomachus (341-0) Bagoas the eunuch murdered Ochus, king of Persia, and set Ochus' youngest son, Arses, upon the throne, retaining all the power in his own hands.' The dating of Persian events in the papyrus (cf. III. 1-7, the accession of Darius Codomannus in 338-7) differs somewhat widely from the received chronology. The Ptolemaic Canon places Arses' accession between Nov. 15, 338, and Nov. 15, 337, and Darius' accession between Nov. 15, 336, and Nov. 15, 335. This is confirmed both by Arrian ii. 142, who quotes the substance of a letter from Darius to Alexander implying that the expedition of Philip in 336 was to be directed against Arses, and, to some extent, by Diodorus, who states (xvii. 5, 6) that Arses was killed in the third year of his reign, and that Darius succeeded him 'about the time at which Alexander succeeded Philip.' A few lines later, however (xvii. 7), Diodorus speaks of Darius' accession as having taken place before the death of Philip in the summer of 336, so that there is a contradiction, though not a very serious one, between Diodorus and the Ptolemaic Canon. But the papyrus goes far beyond the view of Diodorus that Philip and Darius were for a time contemporary rulers; for by putting the accession of Darius in the same year as the battle of Chaeronea, it makes the period during which Philip's reign overlapped that of Darius as much as two years. With regard to the length of Arses' reign, the papyrus is consistent with Diodorus and the Canon. But in the dates which it assigns to the accessions of Arses and Darius there is a divergence from both these authorities of two, if not three, years. A further discrepancy between Diodorus and the papyrus occurs in III. 3, where the brothers of Arses are said to have been put to death along with him. Diodorus xvii. 5 states that they were put to death on the accession of Arses.

18-28. In the 110th Olympiad Anticles of Athens won the foot-race. The archons at Athens were Theophrastus, Lysimachides, Chaerondas, Phrynichus. In the archonship of Theophrastus (340-39) the Samnites fought against the Romans. In the archonship of Lysimachides (339-8) the Latins united in revolt (?) against the Romans and attacked

them.'

23. It is unfortunate that most of the notices of Roman history are either rather vague or more or less mutilated. The war between the Romans and Samnites referred to in the present passage must be the First Samnite War, which according to Livy (vii. 29–31) began in 343 and ended in 341. The battle apparently referred to here was probably that at Mount Gaurus or at Suessula, both of which Livy places in the first year of the war. There may thus be a discrepancy of two or three years between the papyrus

and Livy.

25. The Latin revolt took place according to Livy viii. 3 in 340, after peace had been concluded with the Samnites; but his account of events in this period is of very doubtful value. The papyrus brings the date of the Latin rebellion closer to the Samnite war, and places it a year later than Livy, according to whom (viii. 11) the principal battle took place at Trifanum in the consulship of T. Manlius Torquatus and P. Decius Mus (340). This is perhaps the event referred to the year 338-7 by the papyrus in III. 7-8. Diodorus xvi. 90 places the battle in the same consulship as Livy, corresponding, on his reckoning, to the archonship of Phrynichus (337-6). Livy tells us that the war dragged on for two years after the battle of Trifanum, the Latin states being subdued gradually.

Between 338 and the Second Samnite War, the papyrus notes a scandal concerning the Vestal Virgins (III. 33-37) in 336-5 (again a year in advance of Livy's date), the expedition of Alexander the Molossian (IV. 17-20), which it places six years later than Livy, and some event occurring in 333-2, the nature of which is obscure owing to the lacunae. In the references to the Second Samnite War (VI. 12-14, 21-25) the papyrus

is as usual one or two years in advance of Livy. How far the apparent divergences in the dates of individual events between the writer of the papyrus and Livy are due to the former really placing the events in different years, how far to some flaw in his system of synchronizing Roman with Greek events, must remain uncertain, since we know neither what were the sources of these references in the papyrus to Roman history, nor whether they were based, like Livy's, on the system of dating by consuls. We can however, by comparing the intervals between the different events of the series recorded by both the writer of the papyrus and Livy, gauge to some extent the difference between their views of Roman chronology. The interval between the First Samnite War and the Latin revolt is only one year according to the papyrus, while according to Livy it is three. With regard however to the intervals between the Latin revolt and the scandal concerning the Vestals, and between that event and the Second Samnite War, the papyrus is in agreement with Livy. It is in reference to the date assigned to the expedition of Alexander the Molossian that there is the clearest divergence.

II. 28—III. 8. 'In the archonship of Chaerondas (338-7) Philip king of Macedon defeated the Athenians and Boeotians in the famous battle of Chaeronea, being assisted by his son Alexander who greatly distinguished himself. In the same year Isocrates the orator died aged about ninety...years..... Bagoas the eunuch killed Arses king of Persia together with his brothers, and set Darius son of Arsamus, of the royal house, on the throne in his place. In the same year the Romans took the field against the Latins.'

28-37. The dates assigned by the papyrus to the battle of Chaeronea and the death of Isocrates are the usual ones. Thebes and Athens supplied the principal contingents to the Greek army, but other states, e.g. the Phocians and Achaeans, were represented.

36. Cicero Senec. 5. and Dionysius p. 537 state that Isocrates was ninety-eight when he died. The writer of the papyrus appears to have been uncertain as to his

exact age.

III. 1–7. Cf. note on II. 11–17. In line 1 the supplement BA] $\Gamma[\Omega AC \ O \ E]$ barely fills the lacuna.

7-8. Cf. note on II. 25.

9-13. 'In the archonship of Phrynichus (337-6) an assembly of the Hellenic confederacy appointed Philip general with absolute powers to carry on the war against Persia.'

This date agrees with Diodorus xvi. 89.

III. 13—IV. 1. 'In the 111th Olympiad Cleomantis of Clitor won the foot-race. The archons at Athens were Pythodelus, Euaenetus, Ctesicles, Nicocrates. In the archonship of Pythodelus (336-5) Philip king of Macedon was assassinated by Pausanias, one of his bodyguard, and was succeeded by his son Alexander. He on his accession first subdued the Illyrians, Paeonians, and other foreign tribes which had revolted. Afterwards he captured Thebes by assault and razed it. At Rome the priestesses of Vesta being perpetual virgins were accused of inchastity and '

21. On the date of Philip's death cf. Diod. xvi. 91, and Arrian i. 1. From this point we have also the testimony of the newly-discovered fragment of the Parian Chronicle (Athen. Mittheil. xxii. 1), which gives a chronological epitome much resembling that of the

papyrus.

29. The expedition against the Illyrians and Paeonians took place in the spring of the archonship of Pythodelus (335) according to Arrian i. 1. While Alexander was engaged in this war Thebes revolted, and was captured about the time of the Mysteries at Athens

(Arrian i. 10, 2, Plutarch Alex. 13), i.e. in October, 335, at the beginning of the archonship of Euaenetus, not in that of Pythodelus. The Parian Chronicle assigns both the expedition and the capture of Thebes to the year of Euaenetus.

33. This no doubt refers to the scandal recorded by Livy viii. 15, who however places

it in the year 337, and states that only one Vestal was concerned.

IV. 1-7. 'In the archonship of Euaenetus (335-4) Alexander king of Macedon crossed over into Asia and defeated the generals of Darius king of Persia in the battle of the Granicus.'

According to Plutarch Cam. 10 the battle of the Granicus took place in Thargelion (May), i.e. at the end of Euaenetus' archonship. The Parian Chronicle puts it in that of

Ctesicles.

8-20. 'In the archonship of Ctesicles (334-3) the same Alexander fought a battle against Darius at Issus in Cilicia and again defeated him, slaying many thousands of the Persians and their allies, and taking many prisoners and much spoil. In the same year Alexander the Molossian crossed over to Italy to help the Greeks in that country.'

8. According to Arrian xi. 11 the battle of Issus was fought in Maimacterion (November) in the archonship following that of Ctesicles, and Diod. xvii. 33 also places it in the archonship of Nicocrates. The Parian Chronicle however agrees with the papyrus.

17. Justin (xii. 1, 2) places the end of the expedition of Alexander the Molossian and his death about the same period as the final conquest of Darius, the news of the failure of the expedition reaching Alexander in Parthia simultaneously with that of the death of Agis. Justin does not state for how many years Alexander the Molossian had been in Italy, but from his account we should not infer that the period was a long one. Livy however (viii. 3, 24) says that the expedition to Italy occurred in 340, and its leader's death in 326, which last event he synchronizes with the foundation of Alexandria. The papyrus thus differs from the chronology of Livy by six years as to the sailing of the expedition, though it can be reconciled with the chronology of Justin.

20-24. Cf. note on II. 25.

24-36. 'In the II2th Olympiad (Gryllus) of Chalcis won the foot-race. The archons at Athens were Nicetes, Aristophanes, Aristophane, Cephisophane, In the first year of this Olympiad (332-1) Alexander the son of Philip captured Tyre, and took over Egypt, being welcomed by the inhabitants owing to their hatred of the Persians. In the same year Alexander ordered (the building of Alexandria?)....'

The capture of Tyre took place, according to Arrian xi. 24, 6, in Hecatombaeon (July), at the beginning of Nicetes' archonship, and the invasion of Egypt followed in the autumn. With this chronology the papyrus is in agreement. The Parian Chronicle however places the conquest of Phoenicia and Egypt in the archonship of Nicocrates (333-2), though it assigns the foundation of Alexandria to the archonship of Nicetes.

V. 1-4. '... Alexander went to the temple of Ammon and on the way thither founded

the city of Paraetonium.'

r. Owing to the lacuna it is not certain to which of the two years 332-1 or 331-0 the writer assigned the expedition to the oasis of Ammon. Arrian iii. 3-6 places it in the winter of 332-1, and says that Alexander returned to Phoenicia at the beginning of spring. If the papyrus is still in agreement with Arrian and the expedition to the oasis was placed in the archonship of Nicetes, there are no events recorded during the archonship of Aristophanes (331-0). The Parian Chronicle also passes over that archonship without comment. But in the date which it assigns to the battle of Arbela (see below) the papyrus is a year in advance of Arrian, so that it is by no means impossible that it assigned the expedition to the oasis to the year 331-0.

3. Arrian, who states (v. 3, 3) that Alexander marched along the coast as far as Paraetonium and then turned inland, says nothing to imply that Alexander founded or re-founded Paraetonium.

4-14. In the archonship of Aristophon (330-29) another battle took place at Arbela between Alexander and Darius, in which Alexander was victorious. In the same year Darius was murdered by his own friends and the Persian empire came to an end, having

lasted 33 (sic) years since its foundation by Cyrus.'

4. The date of the battle of Arbela is fixed by an eclipse of the moon which took place on Sep. 20, 331, a few days before the battle. Arrian (iii. 15, 7) and Plutarch (Alex. 31) disagree as to the date in the Attic calendar on which the engagement was fought, but Arrian correctly states that it was in the archonship of Aristophanes. The papyrus therefore is a year too late in its date. The Parian Chronicle on the other hand is a year too early, placing the battle in the archonship of Nicetes (332-1).

9. In its date for the assassination of Darius the papyrus agrees with both Arrian iii.

22. 2 and the Parian Chronicle.

- 13. The corrector by inserting a critical mark against this line called attention to the blunder in the figures, as he also did in 17 to the omission of the fourth archon. A very similar critical sign marks an omission in the Thucydides papyrus (xvi. III. 3). In the present case it does not appear that the corrector added a note, since there is no reference to the margin as there was in II. 5. Reckoning from Olympiad 55. 1, the traditional date of Cyrus' accession, to the present year, the interval is 230 years. One theory for the number given in the text, 33, would be to suppose that 200 had dropped out and the number 33 for 30 was either intentional or due to a confusion with the 33 years which in line 32 are stated to be the years of Alexander's age. But we are more inclined to think that the whole number 33 here is due to the influence of the coming passage about Alexander, and that it is therefore useless to conjecture what the original number may have been.
- 14-23. 'In the 113th Olympiad Criton, a Macedonian, won the foot-race. The archons at Athens were Euthycritus, Hegemon, Chremes. In this Olympiad during four years Alexander performed his other exploits, conquering the Asiatic tribes.'

15. Africanus ap. Euseb. Έλλ. όλ. 42 calls the Olympic victor Cliton.

17. The critical mark at the side (cf. note on 13) denotes the omission of the archon for 325-4, Anticles. There was much confusion in antiquity about the archons of the 113th and 114th Olympiads. Diodorus omits Hegemon, Archippus, and Neaechmus, and between Anticles and Hegesias inserts another archon, Sosicles. Dionysius, whose list is more complete, omits Hegesias.

23-33. 'In the 114th Olympiad Micinas of Rhodes won the foot-race. The archons at Athens were Hegesias, Cephisophon, Philocles, Archippus. In the first year of this Olympiad (324-3) king Alexander died, having reigned 13 years, and lived 33 years.'

27. The name of the second archon should be Cephisodorus. Cf. VI. 30, where (The)odorus is found in place of Theophrastus. The names of the archons, and especially their terminations, are subject to frequent variations.

their terminations, are subject to frequent variations.

Alexander's death took place on Daisius 28, 323 (Wilcken, *Philol.* 1894, p. 120 ff.). The length of his life and reign are given more precisely than in the papyrus by Arrian (vii. 28) on the authority of Aristobulus as 32 years 8 months, and 12 years 8 months.

33-36. 'In the archonship of Cephisophon (323-2) Ptolemy the son of Lagus was

sent to Egypt and made himself ruler of the country.

34. Cf. line 8 of the Parian Chronicle which places Ptolemy's κυρίευσις Αλγύπτου in the same year as the death of Alexander, namely the archonship of Hegemon, but less correctly, since the death of Alexander took place at the end of Hegemon's year. As in the Parian Chronicle, Ptolemy is the only satrap mentioned by the papyrus in connexion with

the first division of Alexander's empire. Cf. also the use of μ ετήλλα ξ ε in 31 with the word μ εταλλα γ ή used in the Parian Chronicle for the death of Alexander.

VI. 1-14. 'In the 115th Olympiad Damasias of Amphipolis won the foot-race. The archons at Athens were Neaechmus, Apollodorus, Archippus, Demogenes. In the archonship of Neaechmus (320-19) Antipater having succeeded to the kingdom of Macedonia fought against the Greeks at Lamia and vanquished them. The Romans fought against the Samnites and were defeated.'

7. The differences which we have hitherto noted between the statements of the papyrus and the received chronology are trifling compared with the divergence in its account of events in Greek history from 323 to 316. While the intervals between the Lamian war, the division of the empire at Triparadeisus, and the death of Antipater, correspond sufficiently well with the intervals between these events in the chronology of this period, so far as it can be made out from the Parian Chronicle, Diodorus, and Plutarch, the series in the papyrus starts with a date three years later than that given by these authorities to the Lamian war. But amid the many doubtful points in the chronology of events succeeding the death of Alexander, the date of the Lamian war is one of the few which admit of no question. It followed immediately upon the death of Alexander, occupying the winter of 323 and spring of 322. In the date of its starting-point therefore the papyrus has gone considerably astray. Possibly the occurrence of two archons named Archippus, one in 325-4, the other in 318-7, may have led to a confusion; possibly the ordinary chronology of the Greek events has been altered to suit the writer's chronology of events in Italy, which are twice referred to by the papyrus between 320 and 316. But conjectures are of little use, for at the year 316-5 the papyrus breaks off, and we are left in ignorance of the point at which the writer brought back his chronology into the ordinary channel.

το. The reference to the Lamian war is somewhat loosely worded. Antipater defeated the Greeks at the battle of Crannon, which is considerably to the north of Lamia, where he had been besieged. Polybius however (ix. 29, 2) speaks of this battle as $\dot{\eta}$ περὶ Λαμίαν μάχη.

12. This must refer to the surrender of the Roman army at the Caudine Forks; cf. 20-25, where the recovery of the prisoners is recorded. Livy ix. 1-7 places the surrender in 321, the year before the date assigned to it by the papyrus. Cf. note on II. 25.

15-20. 'In the archonship of Apollodorus (319-8) Antipater, having crossed over into Asia (to attack?) Perdiccas, made the second division of the empire among Alexander's successors, (in which division Ptolemy again took part' added by the corrector, who puts a critical mark at the side).

15. The crossing over of Antipater and Craterus into Asia is placed in the spring of 321 (Droysen, Hellen. ii. 115, Niese i. 119) in the archonship of Philocles, the deaths of Craterus and Perdiccas took place in the summer, if we are to believe Plut. Eumen. 6, and the division of the empire at Triparadeisus followed at the beginning of the next archonship (Archippus 321-0). The Parian Chronicle however places the invasion of Asia and the death of Craterus in the year of Archippus. In the date given to the invasion of Asia by Antipater and Craterus the papyrus is three years ahead of the received chonology, and two years ahead of the Parian Chronicle. With regard to the division at Triparadeisus the papyrus is only two years ahead of the received chronology.

17. The case of $\Pi \epsilon \rho \delta i \kappa \kappa a$ is a difficulty. We should expect $\epsilon \pi i$ or $\pi \rho i$ with the accusative, if it is to be taken in connexion with $\delta \iota a \beta i s$, and it is hard to see how Perdiccas can be connected with the division at Triparadeisus, which took place after his death. Perhaps CYN should be supplied in 16, and Perdiccas considered a mistake for Craterus.

20. The insertion of Ptolemy's part in the division by the corrector is noteworthy. Cf. V. 34, note.

20-25. 'In the archonship of Archippus (318-7) the Romans fought against the

Samnites and proved victorious, recovering all the prisoners who had been captured in the

previous battle.

20. Cf. Livy ix. 13, who places the recovery of the prisoners in 320, the year after the battle of the Caudine Forks. The papyrus makes the interval two years, and is therefore two years in advance of Livy in its date for the recovery of the prisoners. But cf. note on

25-35. 'In the 116th Olympiad (Demos)thenes the Laconian won the foot-race. The archons at Athens were Democlides, Praxibulus, Nicodorus, (The)odorus. In the archonship of Democlides (316-5) (Antipater) died, and was succeeded in the government by (Polyper)chon

27. The name of the winner was Deinomenes according to Diodorus xix. 17. Afri-

canus however (ap. Euseb. Έλλ. δλ. 42) calls him Demosthenes.

30. The name of the third archon was Theophrastus according to Diodorus xix. 73

and Dionys. Hal. Dinarch. p. 650.

32-35. It is very difficult, if not impossible, to fill up the lacunae on the supposition that the writer has in this Olympiad reverted to the ordinary chronology. Of the prominent persons who died about 316-5, Eumenes, Olympias and Xenocrates, none are suitable. On the other hand, if we suppose that the writer is still three years ahead of the ordinary chronology, which places the death of Antipater in 319, the restoration is easy. KAI in 35 is very likely the beginning of KAICCANPO.

LETTER TO A KING OF MACEDON. XIII.

 8.7×7.1 cm.

Fragment of a letter written to a king of Macedon, attacking the conduct of the Thebans. From the manner in which Philip is mentioned in line 12 and the reference to 'the dynasty of your έταῖροι' the letter would seem to have been addressed to Antigonus or his son Demetrius Poliorcetes. Since Antigonus had been the ἐταῖρος of Philip and Alexander, they might be called his ἐταῖροι after he had become king himself. Thebes had been restored by Cassander, the enemy of Antigonus, so there was much to be said about their offences against την σην βασιλείαν. The papyrus is valuable historically in stating definitely the alliance between the Thebans and Olynthians against Amyntas, the father of Philip, a fact which makes the seizure of the Cadmeia by the Spartans on their way to Olynthus much less gratuitous than has been generally maintained. Cf. Xen. Hellen, v. 2, 15, 34 where the alliance between Thebes and Olynthus is implied. The authorship of the fragment is a very difficult problem. The style is thoroughly Isocratean, but who is the imitator?

The papyrus is written in a medium-sized sloping uncial of the second or third century. A few corrections which occur are most probably by the first hand.

XIV. ELEGIACS.

18.5 × 7.2 cm.

Fragment containing portions of eighteen lines from an elegiac poem. They are unfortunately too mutilated to give any connected sense, except in the case of one couplet where there is an obvious reference to a well-known passage of the Iliad.

The script is a clear upright uncial, which may be assigned to the second century. Single dots to indicate a pause at the end of a line are the only lection signs which occur. The papyrus is remarkable for a very deep margin (7.8 cm.) at the top of the column (cf. xviii and xix). This blank space was perhaps intended for scholia.

XV. EPIGRAMS.

9.2 × 15.7 cm.

Parts of two columns form a collection of αὔλειμοι or songs for the flute. The papyrus, which is complete at the bottom, is broken along the top, but there is a space left above the first two lines which probably therefore formed a complete epigram, though in what metre is uncertain. The other poems consist of four lines, and, so far as can be judged, are written in a metre which only varies from the hexameter in having an iambus in the sixth foot in place of a spondee. This metre is found in late poets, e.g. Lucian Tragopodagra 311 sqq. The subject of the fourth stanza seems to be the power of music, that of the fifth the instability of wealth as contrasted with virtue.

The αὔλειμοι are written on the recto in a somewhat irregular sloping uncial of the third century. The verso contains six lines of accounts in a third century cursive hand.

PART III. FRAGMENTS OF EXTANT CLASSICAL AUTHORS.

XVI. THUCYDIDES, IV. 36-41.

Plate IV (Cols. II, III). $25.6 \times 20 \text{ cm}$.

The following fragment of the fourth book of Thucydides (chs. 36-41) has already been published by A. S. Hunt in the Egypt Exploration Fund's Archaeological Report for 1896-7. For convenience of reference we give here a reprint of the text together with the critical notes upon it and the description of the papyrus as there published.

The rule that for purposes of textual criticism papyrus texts posterior to the Ptolemaic period are comparatively unimportant finds a striking exception in the case of the present fragment, the excellence of which has been generally recognized. A number of its readings have been adopted by K. Hude in his new edition of Thucydides (Tom. I. libr. i-iv, Leipzig, 1898). Discussions of the variants exhibited by the papyrus will be found in the original publication in

the Arch. Report and in articles by Blass (Literarisches Centralblatt, Nov. 13, 1897), van Leeuwen (Mnemosyne xxvi), and Steup (Rhein. Museum f. Philol. liii. 2).

The fragment contains the greater part of three columns, consisting of from fifty to fifty-two lines each. The hand is a small, rather irregular uncial, of a decidedly early type; it may be probably assigned to the first century A.D. Other marks of age, apart from the formation of the hand-writing, are the decided slope of the columns to the right, the regular use of the iota adscript, and the absence of accents, breathings, and marks of elision. A character like an angular bracket (>) is occasionally used as a supplement at the end of a short line (e.g. I, 1, 26, II. 38); and the paragraphus is frequently employed to mark off the sentences, which are also commonly divided from each other by blank spaces left between them. Otherwise lection signs are rare. An accent and a breathing occur once in conjunction (I. 2): there is a single instance of the diaeresis over an initial v (III. 20); and the high point has in two cases been used at the end of a line to denote a pause. Very possibly these are all subsequent additions, as may also be the marks, presumably possessing some critical significance, which are of frequent occurrence in the margin.

The text is rendered peculiarly interesting by the presence of a considerable number of double readings. Of these the majority are certainly by the original scribe, and may be explained either as traditional *variae lectiones*, or—though perhaps less probably—as the result of the use of more than one manuscript by the copyist, who was careful in cases of disagreement to record alternatives. The other variants, which may be regarded rather as corrections, seem to be due to a second (probably rather later) hand, which however is in type very similar to the first and with difficulty distinguishable from it. To this second hand we attribute the additions in I. 10, III. 3, and the insertion, where it has occurred, of final v. Possibly II. 22, 43, and III. 2 should be included in the same class, but this cannot be done with any approach to certainty.

The accompanying collation is based upon Bekker's Berlin edition of 1821, from which the supplements have also been made.

I. I. ΠΡΟCΒΑΙΝώΝ: so vulg.; προβαίνων, Bekk. with Bdg.

3. There seems to be no variation in the MSS, which would explain the deleted TI. [τι is however defended by van Leeuwen, op. cit.]

4. ΕΦΥΛΑΤΤΟΝ: for a similar alteration of TT to CC cf. l. 38; Bekk. reads ἐφύλασσον. 5. MOΛIC: v.l. MOΓIC; μόλις, Bekk., with the MSS.

10. ΙΔΟΝΤΕC was of course a slip; the correction seems to be by the second hand.

15. MEIKPON: cf. for the spelling ΟΠΛΕΙΤΑΙ in II. 42; μικρόν, Bekk.

16. ΜΕΓΑΛω ΕΙΚΑCAI or ΜΕΓΑΛωΙ IKACAI are equally possible readings.

slight traces remain of the two letters transcribed as ϵI in $\epsilon IKACAI$, and with this reading there is barely room in the lacuna for the iota adscript of $M\epsilon \Gamma A\Lambda \omega I$. There is, however, no other instance in the fragment of its omission.

23. ACOENEIAI: the supplement hardly fills the lacuna, in which there would be room for two or three more letters. But the scribe is not sufficiently regular to make it likely

that there was any variation from the MSS. reading.

26. EKPATOYN H Δ H: the letters $\vec{\beta}$ and $\vec{\alpha}$ which have been added above these two words indicate that their order could be reversed. $\eta \delta \eta$ is omitted in d and i. A letter (? A) has been crossed out after AOHNAIOI.

28. It is remarkable that the superfluous $\delta \tau \iota$ before ϵi , which is found in the MSS. and read by Bekk., is omitted in the papyrus, which thus bears out the view of H. Stephanus

(Append. ad Script. de Dialect., p. 77), and others.

29. ε N Δ W $\dot{\varepsilon}$ OYCI: on the analogy of l. 26 there should here be an overwritten $\bar{\beta}$ to correspond with the $\bar{\alpha}$ above ε N Δ W $\dot{\varepsilon}$ COYCI. Probably it has been lost in the lacuna at the beginning of the line, in which case the meaning was that MAAAON and ε N Δ W $\dot{\varepsilon}$ COYCI might change places.

38. HTTHOEIEN: the dot after the second T has been effaced. For the alternative

spelling cf. l. 4.

40. ΒΟΥΛΟΝΤΑΙ: βούλοιντο, MSS., Bekk.

48. ANAK ω XHC: so Bekk. with the MSS.; the second spelling ANOK ω XHC is correct.

II. I. ΠΡΟΤΈΡΟΝ: so MSS., Bekk. ΠΡΟΤΈΡωΝ was an easy mistake.

4. Θ HIPHM Θ NOY: so the MSS. Of the overwritten letters the Y is uncertain; possibly Θ 1 should be read (cf. l. 6); or possibly an original Θ 1 has been converted (by the second hand?) into Θ Y.

5. ΤΕΘΝΕώΤΟC: the original spelling ΤΕΘΝΗώΤΟC was perhaps due to a reminiscence of ΤΕΘΝΗΚΟΤΟC in l. 2. ΕΦΗΙΡΗΜΕΝΟC: so Bekk. with the MSS.; ΕΦΕΙΡΗ-

MENOC was the commoner spelling in the third and second centuries B.C.

7. NOMIMON: v.l. NOMON, which is read by the MSS. and Bekk.
9. ΕΛΕΞΕΝ: ἔλεγε, MSS., Bekk. For the original omission and subsequent insertion of ν ἐφελκυστικόν cf. II. 22, 23, III. 14, 26. It has not been added before a vowel in the case of εἴκοσι, III. 5, 21.

12. HΠ€ΙΡω]: a dot over the € may mean that the letter was intended to be deleted;

but it is more probably accidental, since it is not repeated in l. 17 or l. 21.

18. The reading of the deleted letter transcribed as H is rather doubtful. There is no support for it in the MSS. [If read as H,] the second of the two points is effaced; [or regarding the second point as preserved, \(\overline{1}\) might be read].

22. For the overwritten ν of ΑΠΗΓΓΕΙΛΕΝ cf. ΚΕΛΕΥΟΥCIN in the following line, and l. 9, note. Bekk. reads ἀπήγγειλεν (and κελεύουσιν) with the MSS., which give no support to

the variant ΑΠΗΓΓΕΛΛΕ(N). οἱ Λακεδαιμόνιοι, MSS., Bekk.

29. The original omission of THN HMEPAN KAI (MSS., Bekk.) after TAYTHN was apparently due to the repetition of THN. The mistake has been partially rectified by the insertion of KAI, though with this reading ταύτην must refer to νύκτα. It is noticeable that the following words καὶ τὴν ἐπιοῦσαν νύκτα are omitted in K.

36. ΔΙΕΔΟCAN: so KN; ἐδίδοσαν, di; διεδίδοσαν, Bekk.

42. OΠΛΕΙΤΑΙ: cf. MEIKPON, I. 15.

43. OI, here inserted above the line, is read by Bekk. with most MSS. (om. Qe). Its omission after T€TPAKOCIOI would be peculiarly easy.

III. r. CTΑΔΙΑ is read by Bekk. with the MSS. The variant CTΑΔΑΙΑ may be right. The forms στάδιος, σταδαΐος and σταδιαΐος are frequently confused in MSS.

3. AN APEC EN: so f; $\emph{and} \rho \epsilon s$ of \emph{en} , Bekk. with the other MSS. The accidental omission before MAXHC of the words $\emph{e}\pi o\lambda \iota o\rho \kappa \acute{\eta}\theta \eta \sigma a\nu$ $\emph{a}\pi \emph{d}$ $\emph{th}s$ varyaxlas μέχρι τῆς ἐν τῆ νήσφ was of course due to the recurrence of EN THI NHCωI. The missing words were subsequently written by the second hand in the margin at the top of the column, and indicated by the curved mark to the left of the line and by the word avw placed over the point where the omission occurred.

5. €IKOCI: εἴκοσιν, Bekk. with MSS.; cf. l. 21.

6. The O of OI was converted from another letter, perhaps A.

7. ATTHIECAN is the reading of the MSS. and Bekk.; the variant ATTHICAN is a preferable spelling. [ἀπῆσαν, Cobet.]

8. △€: the addition of € brings the papyrus into agreement with the MSS. and Bekk.

9. ΛΑΘΡΑΙ: λάθρα, MSS., Bekk.

- 10. CITOC TIC EN: σῖτος ἐν: MSS., Bekk. The loss of TIC after -TOC would be
- 11. €NKAT€ΛΗΦΘΗ: the v.l. here agrees with the reading of FHINbde, which is followed by Bekk.; ἐγκατελείφθη vulg.

12. ΕΠΙΤΑΔΗC: Ἐπιτάδας, Bekk. with MSS.

14. For the added final v cf. II. 9, note. 16. OI is read by Bekk, with the MSS.

21. εΙΚΟCΙ: εἴκοσιν, MSS., Bekk.; cf. l. 5.

26. ΕΛΛΗCIN: ν has been added above the line as in l. 14, etc.

- 38. ΤΕΘΝΕω]ΤΕC: the papyrus may of course have read ΤΕΘΝΗΚΟΤΕC with Q. 39. There would be room in the lacuna for KAAOI KAI AFAOOI, the reading of FHQf. 40. HC]AN: the traces of the letter before N suit A better than €, and so HCAN is
- preferable to EIEN. The papyrus stands alone in (apparently) reading the verb.

49. The column contained one more line after this one.

XVIII. Herodotus I. 105-6.

18.2 × 8.7 cm.

Fragment containing part of Herodotus i. 105-6, written in a good-sized round formal uncial resembling the handwriting of the great biblical codices. We should assign the fragment to the third century. Both this and the next papyrus support the manuscript tradition in essentials, but show a few variations in the dialectic forms of words. A very deep margin is left at the bottom of the column.

Fragment containing on the *recto* eight incomplete lines of a second century cursive document, on the *verso* part of Herodotus i. 76, written in a rather small square uncial of the second or third century. XX. Homer, Iliad II. 730-828. Plate V.

Twelve fragments, the largest measuring 14.5 x 8 cm., from a papyrus containing the second book of the Iliad. Parts of four columns are preserved, written in a large upright calligraphic uncial. On the *verso* are some accounts in a cursive hand of the late second or early third century (v. Plate V). The Homer on the *recto* we should assign to the second century. The text agrees in the main with the vulgate, but there are some variations, including the insertion of a new line (in this position). This shows the influence of the Ptolemaic manuscripts of Homer, most of which have a number of additional lines (cf. G.P. II. iv. pp. 12–13). There are no stops, breathings, elision-marks, accents, or iotas adscript. We give a collation with La Roche's text.

Col. I. 730-754. Three fragments (a), (b), and (c), containing parts of 730-736 and 745-754.

XXI. Homer, Iliad II. 745-764.

20 × 14·7 cm.

Homer's *Iliad*, II. 745–764, written in a large round upright hand of the first or second century. The apostrophes marking elision are by the first hand; the accents, breathings, stops, and marks of quantity may possibly have also been inserted by the first hand, but more probably they are due to the person who has added some corrections in cursive. The text is the vulgate. At for ϵ is found in 5 AINIHNEC.

XXII. Sophocles, Oedipus Tyrannus 375-385 and 429-441.

8 x 9.3 cm.

Part of a leaf out of a papyrus book, the *verso* having lines 375-385 of Sophocles' *Oedipus Tyrannus*, the *recto* lines 429-441, in both cases nearly complete. The dimensions of the pages and the arrangement of the columns in this

MS. are uncertain. If there was another column on the *verso* after 375–385, there must have been another column on the *recto* before 429–441, and then each column would not have contained more than eighteen lines on an average. Assuming that the margin at the bottom was about the same as the margin at the top, this would give a page of about 14×22 cm., which is an unlikely size. It is more probable that there was no column on the *verso* after 375–385. This would give a column of fifty-four lines, and a page nearly 35 cm. high by 22 cm. broad, if a column is lost on the *verso* before 375–385, or by 11 cm. broad if there was only one column on a page. The fragment cannot be part of an opisthographic roll, since the writing on the *verso* precedes that on the *recto*. The *verso* (as in the case of the 'Logia' fragment) is numbered at the top $\rho\iota$ [. The volume, therefore, even if it ended with the *Oedipus Tyrannus*, certainly consisted of 130 pages, and must have contained considerably more than this play.

The papyrus is written in a small, round, upright, formal uncial of about the fifth century, and is thus about six centuries older than the oldest manuscript of Sophocles. The manuscript has been corrected in several places, though not always where it ought to have been, by a contemporary who wrote a less literary hand; but the original readings are often not erased. In two cases (378, 430) the reading of the corrector is between dots, as in the Thucydides papyrus (xvi); and here too the corrector not improbably intended his reading to be only an alternative, not necessarily a correction. Marks of elision are generally used, and except in 434 (v. note ad loc.) are by the first hand. The accents, breathings, stops, and marks of quantity, which occasionally occur, are apparently due to the corrector. The paragraphi marking a change of speaker were probably inserted by the original scribe. The variants of the papyrus, which are nearly all of considerable interest, are discussed in the notes.

The ink used by the scribe and corrector is of the brown colour which came into common use in the Byzantine period; cf. e.g. the Geneva papyrus of Menander's $\Gamma \epsilon \omega \rho \gamma \delta s$. It has faded considerably in some parts, especially on the *verso*. The number at the top of the *verso* (which is by a third hand) is written in black ink.

375. ÓCTIC: the rough breathing in this papyrus tends to become very like the acute accent, and where the papyrus is rubbed it is impossible to distinguish them. Here and in 383, HN, what we have considered to be the accent may be the rough breathing.

ΒΛΕΨΑΙ: so apparently the papyrus for βλάψαι of the MSS. The juxtaposition of δρα

probably accounts for the new reading.

376. ME... Γ E COY: so the MSS. But the sense imperatively requires Brunck's emendation $\sigma \acute{\epsilon} \dots \gamma \acute{\epsilon} \mu o \hat{\nu}$. The date when the error crept into the MSS. is thus pushed

back beyond the fifth century.

378. COY: the scribe first wrote TOY, then corrected it to COY. The corrector, however, inserted the T above the line. The MSS. have σοῦ, but τοῦ makes equally good sense. Probably here and in 430 the corrector's reading is an alternative, derived from another manuscript. A confusion between HC and HT is easily explained, for in the third century B.c. they would in many hands be hardly distinguishable.

380. TIYPANNI: a mistake for TYPANNI.

385. The scribe seems in copying from a MS. which had ∏€ICTOCO€EAPXHC to

have omitted OC by a natural blunder.

429. After ΔHT the corrector apparently inserted instead of the more usual apostrophe. The meaning of the λ (or a) written by the corrector above the line just before the lacuna is obscure.

430. The MSS. have οὐ πάλιν, which is the reading of the corrector here; but aὖ, the

reading of the scribe, would make good sense. Cf. note on 378.

431. AΓΟΡΡΟC: a mistake for ἄψορρος.

434. The scribe wrote CXOΛHCΓ, which was altered by the corrector to CXOΛHIC. The MSS, have $\sigma \chi \circ \lambda \hat{y}$ σ' , Suidas $\sigma \chi \circ \lambda \hat{y}$ γ' , which was accepted by Porson, who inserted σ' after $\dot{\epsilon} \mu o \dot{\nu} s$.

435. ήμεῖς τοιοίδ' MSS., and this was no doubt the reading of the corrector, though he

did not erase the superfluous $\Delta \varepsilon$ of the scribe.

XXIII. PLATO, Laws, IX.

 18.2×18.5 cm. Plate VI.

Parts of three columns containing pp. 862-3 of Plato's *Laws*, Book IX. The variants are not important, but the papyrus is of great palaeographical interest, since it can be approximately dated with certainty. On the *verso* some one has scribbled

[Y]ΠΑΤΕΙΑΌ NOYMMIO (sic)

υπατείας νουμμιου τουσκου και αννίου ανυλλινών (Α.D. 295) τω[ν επι υπα[τι]ας [τω]ν [κ]υρίων ημών κωνσταντίου και μαξιμ[ι]ανου [των επιφανεσ[τ]ατω[ν] καισ[αρ]ων σεβαστών,

underneath which there are traces of three short lines. The writing on the *recto*, therefore, which is a good-sized square sloping uncial, cannot be later than the end of the third century. How much earlier it is cannot be determined with precision, but we should not place it before 200.

The manuscript has been corrected by a contemporary hand (or possibly by two hands). The stops are in most cases, perhaps all, due to the corrector. The first column contains only the ends of lines. We give a collation with Hermann's edition (Teubner, 1856).

I. 8. BA]ABEN: the MSS. vary between βλαβέν and ἀβλαβές. H. adopts the latter,

bracketing byiés.

19.]N: this can hardly be anything else but the termination of $\Pi \in PAT \in O$]N. The corrector, by inserting $\pi \epsilon \iota \rho a \tau \acute{\epsilon} \iota v$ at the end of the next line, seems to have wished to place it after $\kappa a \theta \iota \sigma \tau \acute{a} \nu a \iota$ instead of before it. The MSS. agree in placing it before $\kappa a \theta \iota \sigma \tau \acute{a} \nu a \iota$. Cf. II. 20, where the corrector introduces a novel reading.

II. 7. The dot placed by the corrector over the ϵ of $\Delta\epsilon$ means that the letter was to be elided; cf. 21, where dots are placed over letters to be omitted.

20. The insertion of μέν after ἀπαλλαττόμενοι and the substitution of δέ for μέν after

παράδειγμα are new readings. The MSS. agree with the readings of the first hand.

25. H. with two MSS. omits μέν. The size of the lacuna makes it fairly certain that μέν was the reading of the papyrus.

III. 7. ON: ων H. with some MSS.

11. For the double dots marking a change of person, cf. x. introd.

12. TAYTHN, the reading of the first hand (corrected to TAYTON), is due to the proximity of ἡδονήν.

18. H. with some MSS. omits $\pi \hat{a} \nu$, which is required in the papyrus to fill up the lacuna.

21. MEN: H. with the MSS. μήν.

XXV. Demosthenes, De Corona.

 9.5×8 cm. Plate III.

Fragment containing eleven lines from Demosthenes' *De Corona*, p. 308, written in a large thick formal uncial probably in the third century. Accents, breathings, and marks of elision and quantity appear to be due to the corrector, who inserted η at the end of line 5, and iotas adscript in lines 3 and 4. At the top $X_{\overline{\tau}}$ is written in a different (?) hand, probably the number (606) of the column in a series of rolls containing speeches of Demosthenes. There are no variations from the Dindorf-Blass text (Teubner, 1885), except that the ε of $C\varepsilon$ is not elided in line 4.

5. The corrector objected to the division <code>TPOC|HKEN</code>, and therefore transferred the H to the previous line. Words compounded with prepositions, however, generally form an exception to the rule that a word must not be divided so that a consonant comes at the end of the line, and a vowel at the beginning of the line following; see note on Rev. Pap. XIII. 11.

XXVI. Demosthenes, προοιμία Δημηγορικά, 26-29.

 11.5×52.6 cm. Plate VII.

Parts of seven columns from a manuscript containing the $\pi\rho\sigma\sigma\iota\mu$ a $\delta\eta\mu\eta\gamma\sigma\rho\iota\kappa\dot{\alpha}$ of Demosthenes, portions of §§ 26–29 being preserved. The manuscript had been cut down before the *verso* was used for writing some accounts, which are continued also on the *recto* between Columns V and VI. These are written in a small cursive hand, which is not later than the early part of the third century, and more probably belongs to the second. The writing on the *recto*, which is a medium-sized broad carefully written uncial, may be assigned to the second century. It bears much resemblance to the writing of the Bacchylides papyrus 1.

Occasional stops and marks of elision, and a few corrections (or alternative readings), have been inserted in a contemporary or slightly later semi-uncial hand. The *paragraphi* and angular signs at the ends of lines are by the original scribe, to whom it is possible that the insertions in V. 14 and VII. 2 should also be assigned.

The text of the papyrus is a good one, and in several instances its readings are an improvement upon those of the MSS. We give a collation with the Dindorf-Blass edition. Plate VII gives a facsimile of Cols. II and III of the *recto* and part of the accounts on the *verso*.

Col. II.

¹ We should assign the Bacchylides papyrus to a somewhat later date than that which Mr. Kenyon gives to it. The cursive hand in which the later scholia are written seem to be not earlier than the second century, and may belong to the third. The MS. itself and the earlier scholia we should assign to the first or second century A.D. The Ptolemaic characteristics to which Mr. Kenyon refers hardly seem to us to outweigh the Roman type of some of the letters, and its general resemblance to MSS. of the Roman period. The shallow forms of v and μ are found in Roman papyri, e.g. in Nos. ix and xvi of the present volume. The ξ formed by three unconnected strokes is but a shade more archaic than the ξ in xxvi, formed by three separate strokes of the pen, the third stroke joining the second, or than the ξ of ix, in which the second and third strokes are formed without the pen being lifted. Moreover, considering (1) the possibility that the form of ξ in the Bacchylides papyrus was a conscious archaism (cf. G. P. I. ii, where the primitive form of ζ , Σ , is found in a papyrus of the Roman period), and (2) the fact that the archaic forms of ξ continued to be used in MSS. long after the later form, in which the three strokes are written without lifting the pen, had come in (it is found as early as the second cent. B.C., cf. e.g. Paris Pap. I), the form of ξ is not in itself sufficient evidence for determining the date.

XXVII. ISOCRATES, ΠΕΡΙ ΑΝΤΙΔΟCEωC §§ 83 and 87.

 5.2×12.7 cm.

Parts of two consecutive columns of Isocrates $\pi\epsilon\rho \lambda$ $\delta\nu\tau\iota\delta\delta\sigma\epsilon\omega s$. The two fragments of which the papyrus is composed are from the tops of the columns, containing portions of §§ 83 and 87 of the speech. The handwriting is a graceful, rather small, upright uncial, which may be of the end of the first or of the second century.

XXVIII. XENOPHON, Hellenica III. 1.

Fragments of three consecutive columns from a manuscript of Xenophon's Hellenica. The portion preserved is from the third book, chap. 1, §§ 3-7. The text is written in a nearly upright square uncial hand, resembling in its general characteristics that of xxvi (cf. Plate VII). In the upper margin, which as in xiv, &c., is very broad, are some semi-cursive scholia, which may be by the same scribe. The characteristics of this semi-cursive writing, as well as that of the more formal hand of the text, incline us to refer the manuscript to the second century. Iota adscript is commonly written. Both single and double dots are used to mark a pause in the sense, as well as the marginal paragraphus. Short lines are filled up by the usual angular sign.

A rough breathing is inserted once. The papyrus is in two fragments, the larger of which, containing Cols. II and III, measures 12.2 × 12.5 cm.

Collated with Keller's text (1890) the papyrus shows $\pi\rho\sigma\sigma\epsilon\lambda\alpha\beta\epsilon\nu$ for $\pi\rho\sigma\sigma\epsilon\lambda\alpha\beta\epsilon$ in II. 11, and probably $\mathring{\eta}\tau\mathring{\eta}\sigma\alpha\tau\sigma$ for $\mathring{\eta}\tau\mathring{\eta}\sigma\alpha\tau\sigma$ in I. 13.

XXIX. EUCLID II. 5.

 8.5×15.2 cm.

Fragment from the bottom of a column, containing the enunciation, with diagrams, of Euclid II. 5, and the last words of the preceding proposition.

From the character of the handwriting, which is a sloping rather irregular informal uncial, this papyrus may be assigned to the latter part of the third or the beginning of the fourth century. Diaereses are commonly placed over syllabic ι and v. Iota adscript is not written. The corollary of Proposition 4 seems to have been omitted, while the two lines illustrating the division ϵls $i\sigma a$ $\kappa a l$ $avi\sigma a$ in Proposition 5 are not found in ordinary texts. Otherwise the papyrus shows no variants from the text of the Oxford edition of 1703 or that of Peyrard, beyond the mistake of $\tau \epsilon \tau \rho a \gamma \omega v o v$ for $\tau \epsilon \tau \rho a \gamma \omega v o v$ in l. 9, and the spelling $\mu \epsilon \tau o \xi v$ for $\mu \epsilon \tau a \xi v$ in l. 6.

1. If the reading is correct—and though the traces of letters after $\Pi \in P$ are scanty, there seems to be no alternative—the corollary of Prop. 4 was omitted. After $OPOO-\Gamma WNIW$, too, there would not be room for more than about nine letters, so $\tilde{o}\pi\epsilon\rho$ $\tilde{e}\delta\epsilon\iota$ $\delta\epsilon\hat{\iota}\hat{\xi}a\iota$ must have either been omitted or, more probably, abbreviated.

PART IV. LATIN.

XXX. HISTORICAL FRAGMENT.

 8.6×5 cm. (Recto) Plate VIII.

Part of a vellum leaf from a Latin Codex, containing on the *recto* the ends of ten lines, and on the *verso*, which is much rubbed and faded, parts of ten more. The occurrence of the names Antiochus and Philippus suggests that the subject of the composition was the Macedonian wars of Rome; and as the fragment is not to be found in the extant authorities, it probably comes from the lost works of some annalist or historian of this period—possibly from the *Historiae Philippicae* of Trogus Pompeius.

Palaeographically the fragment is very interesting. The prevailing character of the letters is that known as rustic capital, but there is a small admixture of uncial forms. Notwithstanding its comparative heaviness, characteristic of writing on vellum, in its general appearance the hand bears a decided resemblance to that of the Herculaneum papyrus fragments on the Battle of Actium (written before 79 A.D.). Of individual points of contact the most noticeable are the open P, the broad V, the epigraphic dots between words, and the accents or apices (possibly by a second hand) upon long vowels. The apex is most frequently found in inscriptions of the first and the first half of the second centuries A.D., and it practically ceased to be employed at the end of the third. Its frequent use in this MS., in common with the Herculaneum papyrus (cf. too B. G. U. 611), is an indication of a very early date. On the other hand, these archaic characteristics in the handwriting are counterbalanced by the occurrence of the uncial forms of D and O, the tendency to roundness in E, as well as by the facts that the fragment is from a book and not a roll, and that the material used is vellum not papyrus. These considerations combined render it impossible to refer the fragment to a period earlier than the third century. Words are not divided at the ends of lines, which are therefore very irregular in length.

XXXI. VERGIL, Aeneid I 457-467 and 495-507. 6.6×5.4 cm. (Verso) Plate VIII.

Fragment of a leaf of a papyrus book, containing on the *recto* the ends of lines 457–467, and on the *verso* the beginnings of lines 495–507, of the first book of Vergil's *Aeneid*.

The manuscript is written with brown ink (cf. introd. to xxii) in a rather small upright semi-uncial hand, which may probably be referred to the fifth century. The height of the page was about 26 cm. We give a collation with Ribbeck's text (1860).

XXXII, LETTER TO A TRIBUNUS MILITUM.

 19.6×10.5 cm. Plate VIII.

Letter written to Julius Domitius, a tribunus militum, by Aurelius Archelaus, who recommends to the good offices of Domitius a friend named Theon.

The papyrus offers a good example of the Latin cursive hand of the second century, to which it may probably be assigned. The writing is very clear and the comparative absence of linked forms renders it particularly easy to decipher. There is a distinct tendency to separate words from each other, and occasionally single points are inserted between them. A similar point is also used after an abbreviated word, and to mark a pause.

'To Julius Domitius, military tribune of the legion, from Aurelius Archelaus, his beneficiarius, greeting. I have previously recommended to you my friend Theon, and now I beg once more, sir, that you will regard him as if he were myself. He is indeed a man worthy of your affection. He left friends, property and business, and followed me, and he has throughout secured my comfort. I ask you therefore to grant him admittance to your house; he will be able to relate to you all that we have done. Whatever he tells you about me you may take as a fact. . . . '

PART V. PAPYRI OF THE FIRST FOUR CENTURIES.

XXXIII verso. Interview with an Emperor.

 15×44.7 cm. Late second century.

The *recto* of this papyrus contains four columns of a list of contracts deposited in the archives of Oxyrhynchus, such as Flavius Titianus ordains to be made in the succeeding papyrus. The third year of Nero is mentioned, but the handwriting is not earlier than the second century.

The verso contains five nearly complete columns from a report of proceedings at Rome before an emperor who is not named, in connexion with an embassy from Alexandria and a sentence of death pronounced upon one of its members. Appianus. The general style of the papyrus shows that it is a copy of a ὑπομνηματισμός or official report, examples of which are xxxvii and xl of this volume. These two, however, are accounts of proceedings before Egyptian officials; the closest parallels to our papyrus are B. G. U. 511 (Wilcken, Hermes, xxx. pp. 486 sqq.), containing a report of an embassy of Alexandrian Jews and Anti-semites to the Emperor Claudius, and Paris Papyrus LXVIII (T. Reinach, Revue des études juives, 1883, July-Sept.), a similar report. It has been suggested (Wilcken, Hermes, l.c. p. 497) that such accounts of proceedings at Rome were based on the imperial commentarii; but it is more probable that the original of our papyrus, at any rate, was drawn up from notes taken at the time by one of the embassy who was present, to be used as the official account at Alexandria; cf. xli, an account of a public meeting, obviously drawn up by some one who was present. In any case there is no room for doubting that we have in our papyrus a private copy of a most important official document, which gives not only a vivid but a faithful presentation of a remarkably dramatic scene.

With regard to the identity of the emperor there is little doubt. In II. 8 his father is called δ $\theta\epsilon\delta s$ 'Avt $\omega\nu\epsilon\hat{v}\nu\sigma s$, who can only be Antoninus Pius; for though Antoninus by itself was used as a name for several other emperors, 'divus Antoninus' or its Greek equivalent in second century inscriptions and papyri is always Pius. The emperor therefore who plays the principal part in the papyrus is either Marcus Aurelius or Verus, more probably the former.

Of the second principal actor in the drama, Appianus, nothing is known except what we can glean from the papyrus. His name suggests the famous historian, who was an Alexandrian, held high office in Egypt, and lived on into the reign of M. Aurelius and Verus. But the Appianus of the papyrus is a man not past middle life (cf. I. 11, $\tau \epsilon \kappa \nu o \nu$); and what is known about the historian's loyalty renders it impossible to identify him with the contumacious rebel who is here sentenced to death.

The emperor is seated in council (III. 13) in the presence of a consul (III. 15) and probably a committee of the senate (IV. 8). In B. G. U. 511 (v. sup.) the scene is laid at the gardens of Lucullus and the emperor is aided by a council of sixteen men of consular rank and twenty-five senators; and the action described in our papyrus no doubt took place in one of the imperial palaces at Rome. Before the emperor stands Appianus, a magistrate and envoy of the Alexandrians, who is under sentence of immediate execution (I. 8).

The cause of his incurring this penalty is not stated; but there is good reason, as Mr. J. G. Milne suggests, for connecting Appianus' mission with the revolt of Avidius Cassius, who proclaimed himself Emperor in 175. According to Dio Cassius lxxi. 22, Avidius Cassius was the son of Avidius Heliodorus, praefect of Egypt in 143; and in I. 7 a Heliodorus is mentioned who is clearly a friend, if not an accomplice, of Appianus. Dio further states (lxxi. 23) that Avidius Cassius had been intriguing with Faustina with a view to seizing the throne after the death of Marcus; possibly Appianus was an envoy of Cassius sent to Rome to make plots and there arrested by the emperor. The leniency exhibited by Marcus towards the conspirators, whose lives he spared (Dio lxxi. 28), is quite in accordance with the moderation here displayed by the emperor, who in the face of the greatest provocation is much more anxious to reduce Appianus to submission than to put him to death. For constructing the lost beginning of the papyrus there is little material except the indication in II. 4 that Appianus had already indulged in violent and disrespectful language.

The report of the proceedings begins in the middle of a speech, I. 1-5, which is much mutilated; it is probable that the speaker is the emperor, cf. I. I with II. 7. At the end of it Appianus turns to Heliodorus, a friend who was present, probably the ex-praefect, and appeals to him to intercede for him. Heliodorus however refuses, and exhorts Appianus to meet his death, I. 5-II. 2. Appianus, we gather, is then led away to execution, but the emperor seems to have wished to give him a last opportunity of tendering his submission, or, possibly, he did not really intend to carry out the penalty. In any case Appianus is recalled, and the emperor invites him to observe the respect due to the imperial position, II. 2-4. But Appianus continues obdurate, and draws an insulting comparison between the emperor and his predecessor. This is too much for the emperor's patience, and without deigning to reply he orders Appianus to be removed. Appianus requests permission to wear his insignia of office and, leave being granted him, he takes advantage of it to make loud protests while being carried through the streets, II. 5-III. 11. A crowd collects and there is a prospect of a riot, so that one of the soldiers guarding Appianus is despatched to inform the emperor of the state of affairs, III. 11-IV, 1. The emperor thereupon once more recalls Appianus who, far from showing a desire to escape death, renews his taunts. The emperor in moderate and dignified language reminds him of his powerlessness, IV. 1-12. At length Appianus becomes calmer and exchanges his tone of open defiance for one of appeal, though with a tinge of sarcasm which does not escape the emperor's notice, IV. 13-V. 5. After more conversation Appianus begins to relate some incident connected with Cleopatra, V. 5-14. But at this point the papyrus, the last

column of which is incomplete, breaks off, and we are left in doubt as to the final act of the drama.

The papyrus is written in a neat semi-uncial hand, probably not long after the events which it describes. There are a few corrections, apparently due to the first hand, and in three places (II. 14, III. 3, V. 13) an alpha has been written over the line with no obvious meaning.

I. 5, sqq. 'As he (the Emperor) was saying this, Appianus turned round, and seeing Heliodorus said, "Heliodorus, when I am being led off to execution, do you not speak?" Heliodorus: "And to whom can I speak, when I have no one to listen to me? Onward, my son, to death, it is a glory for you to die for your beloved country. Be not distressed, . . ." The Emperor recalled Appianus and said, "Now do you not know whom you are addressing?" Appianus: "I know very well: I, Appianus, am addressing a tyrant." The Emperor: "No, a king." Appianus: "Say not so! the deified Antoninus, your father, deserved imperial power. Listen; in the first place he was a lover of wisdom, secondly, he was no lover of gain, thirdly, he was a lover of virtue. You have the opposite qualities to these; you are a tyrant, a hater of virtue, and a boor." Caesar ordered him to be led away. Appianus as he was being led off said, "Grant me this one favour, lord Caesar." The Emperor: "What?" Appianus: "Order that I may wear the insignia of my nobility on the way." The Emperor: "Take them." Appianus took up his band, placed it on his head, and put his white shoes on his feet, and cried out in the midst of Rome, "Run

hither, Romans, and behold one led off to death who is a gymnasiarch and envoy of the Alexandrians." The veteran (who was accompanying Appianus) ran and told his lord, saying, "Lord, while you are sitting in judgement, the Romans are murmuring." The Emperor: "At what?" The consul: "At the execution of the Alexandrian." The Emperor: "Let him be sent for." When Appianus entered he said, "Who has recalled me when I was now saluting my second death, and those who have died before me, Theon, Isidorus, and Lampon? Was it the senate, or you, the arch-pirate?" The Emperor: "We too are accustomed to bring to their senses those who are mad or beside themselves. You speak only so long as I allow you to speak." Appianus: "I swear by your prosperity, I am neither mad nor beside myself, but I appeal on behalf of my nobility and of my rights." The Emperor: "How so?" Appianus: "Because I am a noble and a gymnasiarch." The Emperor: "Do you then mean that we are ignoble?" Appianus: "As to that I do not know, but I appeal on behalf of my nobility and my rights." The Emperor: "Do you not now know that we are noble?" Appianus: "On this point if you are really ignorant, I will instruct you. In the first place Caesar saved Cleopatra's life when he conquered her kingdom, and, as some say, . . "'

III. 5. The $\sigma\tau\rho o\phi\epsilon io\nu$ was probably a kind of turban, richly embroidered. With the desire of the Alexandrian magistrate to retain his insignia to the last compare the privilege accorded to the Alexandrians of being beaten with a stick instead of a whip (Philo in Flacc. 10).

11. δ ήβό κατο]: the Graecised form of evocatus just fits the lacuna.

IV. 4. The meaning seems to be that he was facing death for the second time, though it is not clear whether he is referring to the occasion recorded in I. 8–II. 2 or to some previous event.

6. Isidorus is perhaps to be identified with the leader in the Bucolic revolt mentioned by Dio Cassius lxxi. 4. Theon or Lampon may have been the priest who is there

associated with Isidorus.

V. 11. Appianus is apparently referring to Julius Caesar's relations with Cleopatra; but whether in connexion with his own εὐγένεια or the ἀγένεια of the emperor is not clear.

XXXIV verso. Edict of a Praefect concerning Archives.

21 × 75.5 cm. A.D. 127.

The *recto* of this papyrus contains a long contract for a loan of money dated in the tenth year of Hadrian. It is written in very broad lines, which are incomplete at the end, and in parts much effaced.

The *verso* has been used for writing three documents. The first of these, which occupies the first two columns (a third preceding column has almost certainly been lost), is a copy of an important proclamation by Flavius Titianus, praefect of Egypt in the eleventh year of Hadrian, concerning the duties of officials connected with the local archives throughout Egypt, and their relations with the central state archives deposited in the newly built 'Library of Hadrian' at Alexandria. The writing is a clear semi-uncial, but the top of the first column is a good deal worm-eaten, and the difficulty of supplying the lacunae is increased by the presence of a number of technical terms, some of which are

new. The third column, which is in the same hand as the first two, is another proclamation by the same praefect dated a few months later, and enforcing obedience to the provisions of the first edict by the threat of penalties. The fourth column, which is in a cursive hand, is a letter from Apollonius to Horion, both of whom were no doubt officials in the archives of Oxyrhynchus, in which Apollonius says that in order the better to call Horion's attention to the second edict, he had subjoined a copy of it. The order of these three documents in the papyrus thus preserves their historical sequence, in contrast to the usual custom in similar cases by which the historical sequence is inverted.

The first sentence of the first column was clearly connected with the lost column preceding, and the remains of it are too slight to afford a clue to the meaning. A new regulation apparently begins at ὑπογρά hoμαι in 2 and ends with $\tau \dot{\alpha} \chi \iota \sigma \tau o \nu$ in 4. So far as we can make it out, it enjoins that something which used to be given to the 'Nanaeum' should for greater security also be given as soon as possible to 'the other library,' which, as later passages show, means the newly built Library of Hadrian. The Nanaeum, which is clearly a kind of state library at Alexandria, does not appear to be mentioned elsewhere. 'Nanaea' is an epithet of Isis in B. M. Pap. cccxlv. But what were the objects to be given? The use of the verb $\tau \epsilon \lambda \epsilon i \sigma \theta a \iota$ might suggest that they were taxes collected by the revenue officers, and this is supported by the occurrence of the $\lambda \delta \gamma \sigma \iota \tau \hat{\eta} s$ προσόδου two lines further on. But there seems to be no reason why actual payments of money should be made to a library, and it is more probable that this regulation, like the one following, is concerned with the official accounts of the revenue. Possibly this provision is intended to ordain, mutatis mutandis, for Alexandria, what the next regulation ordains for Egypt in general, cf. II. 12-14. The use of διδόναι in 4 (cf. II. 6) suggests that the transmission was direct; and if $\tau \delta \tau \alpha \chi \iota \sigma \tau \sigma \nu$ is contrasted with $\delta \iota \delta \pi \epsilon \nu \tau \epsilon \eta \mu \epsilon \rho \delta \nu$, it would suit the context better to suppose that the regulation referred to the clerks in the smaller archives at Alexandria than to make it quite general. The reason why the Nanaeum alone was insufficient as a depository of documents is explained in II. 5-10. The principal object of the present proclamation is to set up the Library of Hadrian side by side with the Nanaeum, and to subordinate the older archives to the new.

The next provision (4-7) also bristles with difficulties. We understand it to mean that the guardians of the local archives throughout the country were to despatch the official revenue returns to the proper department of the central archives at Alexandria every five days: first, in order that the government might know the exact amounts; secondly, for the sake of additional security. But the precise meaning of the *tablinum* (a simple correction of the meaningless

τακλεινον of the papyrus), in its relation to the local record offices and the two central depositories at Alexandria, is obscure. It was apparently situated at Alexandria, and unless it was a separate institution from the Nanaeum and Library of Hadrian, it would seem to be a subdivision of the latter.

The last section and perhaps the one preceding it have been concerned with copies of revenue returns. I. 7-II. 2 deal with a fresh subject, that of contracts, which presents much fewer difficulties. The first regulation (I. 7-I2) ordains that the clerks $(\partial \pi o \lambda o \gamma \iota \tau \tau ai)$ employed in local archives throughout the country should, following the traditional custom, make lists of the contracts deposited in the public record offices, giving a short description of the contents of each; and that copies of these abstracts should be sent to the Nanaeum and the Library of Hadrian.

The second provision (I. 12-II. 2) is addressed to a different set of officials at the local archives, the $\epsilon i \kappa o \nu \iota \sigma \tau a l$, who seem to have been specially concerned with the arrangement and gluing together into 'tomes' of documents belonging to the same class. These officials are ordered, when they examine the various 'tomes' before the abstract of their contents was made, to enter a note at the side of the documents, if they discover any erasure or insertion which is not in due form. These notes were then to be copied out and sent to the two central libraries, together with the numbers of the documents in the 'tomes' and the names of the contracting parties, for purposes of reference. The praefect makes the interesting statement that this regulation was only an extension to the rest of Egypt of a custom prevailing in the Arsinoite nome and another, perhaps the Hermopolite.

In II. 2–5 the foregoing regulation (I. 4–7) about the sending of reports every five days is extended to the clerks in attendance upon the circuit-judges. II. 5–10 is a rule which concerns only the keeper of the Nanaeum, and instructs him to allow no one, himself included, to lend the documents committed to his charge away from the building, or even to allow an inspection of them, without the consent of the keeper of the Library of Hadrian. The cause of this restriction is stated to be that the keeper of the Nanaeum had attempted to tamper with the documents.

The edict concludes (II. 10-14) with a repetition of the general order concerning contracts, and the appointment of the days on which the new regulations would come into force in Alexandria and the rest of Egypt.

The changes introduced by this first edict, especially the clauses relating to the 'Library of Hadrian,' were not immediately carried out by the officials to whom they were addressed. In Col. III, which is dated five months later, we have another proclamation by the praefect, who in forcible language, extending

to threats of severe punishment, enjoins the observance of the clauses respecting the new library. Neither the second edict nor the letter of Apollonius in Col. IV presents any special difficulty, and the translation given below requires no previous explanation.

There follows a copy of Col. III.

I. 2. There is not room for $[\tau a]$ in the lacuna at the end of the line, and $\kappa a[i]$ makes no sense. 4. Possibly $\tau \dot{0}$ τάχιστον ἄλλοι δέ. The papyrus is much defaced here, but the vestiges do not suit το and αλλοι very well. 5. τὸ $\kappa [a\theta \bar{\eta}] \kappa o \nu$? τακλεινον can hardly be right, though the letters are clear. The simplest hypothesis is to suppose that the original had ταβλεινον (tablinum), and that the scribe mistook β for κ . These two letters are frequently hardly distinguishable in the cursive hands of the period. 7. 1. προσ $\bar{\eta}$.

17. [Έρμον] πολειτῶν or $[\Lambda \eta \tau o]$ πολειτῶν would suit the lacuna best. II. 9. \bar{v} πενθυνος Pap.

15. $L\iota a$ Pap. III. 7. 1. κατασκενασθείση. 12. omit τοὺς before διὰ ἀπειθίαν. The reading $\kappa [ai]$ ὧs is made certain by the repetition of it in the duplicate copy in IV.

I. 2. πραγματευομένοις: a general term for officials; cf. II. 12.

3. $\kappa a[\tau']$ ἀμεριμνί[a]s τόπον is excessively difficult, but no other reading suits the doubtful letters nearly so well. The doubtful ι cannot be ω or η , and the mutilated letter in τo . $o\nu$, if it is not π , can only be τ or γ . If $\tau \epsilon \lambda \epsilon \hat{\iota} \sigma \theta a \iota$ is passive, and $\tau \hat{\varphi}$ $\epsilon \hat{\iota} \omega \theta \acute{\sigma} \tau$ neuter, the dative must depend on $\tau \acute{\sigma} \pi o \nu$, and a subject to $\delta \iota \delta \acute{\sigma} \nu a \iota$ has to be supplied from the preceding sentence ending with $\pi \rho a \gamma \mu a \tau \epsilon \nu o \mu \acute{\epsilon} \nu o \iota o \iota$. If $\tau \epsilon \lambda \epsilon \hat{\iota} \sigma \theta a \iota$ is middle, then $\tau \hat{\varphi}$ $\epsilon \hat{\iota} \omega \theta \acute{\sigma} \tau \iota$ would be masculine, and could depend on $\hat{\nu} \pi o \gamma \rho \acute{\sigma} \phi \rho \mu a \iota$. But the meaning of $\tau \epsilon \lambda \epsilon \hat{\iota} \sigma \theta a \iota$ is the principal difficulty of the sentence.

7. ταις άλλαις: ες. ἀσφαλείαις.

έν τῷ καταλογείῳ: the use of the singular instead of the plural in speaking of the local archives throughout the country need cause no difficulty. The praefect has a tendency to prefer the singular where the plural might be expected; cf. I. 12 τὸν τόμον. We have not been able to find any parallels for the terms καταλογείον here, ἀπολογισταί in 8, εἰκονισταί in 12, and ἐπιχάρτη (if that be correct) in 15.

8. κατὰ τὸ παλαιὸν ἔθος: examples of such a list giving the contents of various contracts

are the recto of xxxiii and B. G. U. 567.

9. νομογράφων: a title for officials with a knowledge of law who drew up contracts; ν. B. G. U. 18, 27, where a νομογράφος occurs in a Fayyûm village, and III. 3 below, where the νομικοί are probably identical with νομογράφοι; cf. B. G. U. 327, II. 22 νομικὸς ዮωμαικός, and B. G. U. 361, III. 2 δ νομικὸς δ τὴν οἰκονομίαν γράψας. Generally when the title of the official who draws up a contract is given it is the agoranomus or one of his agents, in Roman as in Ptolemaic times. But in contracts of the Roman period no mention is often made of the officials who drew them up, though Titianus here speaks as if their names were known as a matter of course.

12. εἰκονισταί: cf. B. G. U. 562. 6 έξ εἰκονισμοῦ ζ (ἔτους) θεοῦ Τραιανοῦ.

- 13. πρ]οσαγορευομένων: cf. the use of καλούμενοι in 8 and II. 3 in introducing technical terms. For συγκολλήσιμα cf. xxxv recto 10, and G. P. II. xli. 8. Examples of such documents glued together are liii and lxxxvii of this volume. liii has a number at the top, cf. II. 1.
- 14. In the attention paid to erasures and additions in a contract, the clerks in the archives of the Arsinoite and the other (Hermopolite?) nome, whose practice is here set by Titianus as an example for the rest of Egypt, seem to have rivalled the vigilance of a modern solicitor.

15. $\epsilon \pi \sqrt{\chi a \rho \tau \eta}$: an 'extra sheet'; cf. note on I. 7.

II. 3. The jurisdiction of the ἀρχιδικασταί of Roman times was not confined to Alexandria, v. B. G. U. 136, 2 and 231, 4, and G. P. II. lxxi, I. 6. The present passage refers not only to their sessions at Alexandria, but to their circuits in the country like those of the chrematistae under the Ptolemies. For διαλογή cf. B. G. U. 614, 4; apparently it means much the same as διαλογισμός in B. G. U. 19, I. 13, τῷ διεληλυθότι διαλογισμῷ, i. e. session for the hearing of cases. The γραμματεῖς were the official reporters of the trials, who made ὑπομνηματισμοί like xxxvii and xl of this volume.

6. ἐκδόσιμα: it is not likely that the originals of documents sent to the central archives were allowed to leave the building; so the ἐκδόσιμα are presumably copies, which under ordinary circumstances could be obtained from the keeper of the archives, but which are here forbidden to be issued on his own responsibility by the keeper of the Nanaeum.

III. 1, sqq. 'Proclamation of Titus Flavius Titianus, praefect of Egypt. It has not escaped my notice that the lawyers in Egypt, imagining that they will not be punished for their illegal acts, send their reports anywhere rather than to the Library of Hadrian, which was built for this very purpose of preventing the concealment of any irregularities. I therefore command them and all officials whom it may concern to carry out the terms of my edict, and inform them that any persons who violate it, whether from mere disobedience or to serve their own nefarious purposes, will receive condign punishment. Let this edict be

r. This Titianus is mentioned in a Latin inscription on the statue of Memnon dated 126 (Letronne, La statue vocale de Mennon, p. 147), and in B. G. U. 428, 8. Other praefects with the same name are known in the reigns of M. Aurelius and Caracalla.

3. νομικοί: cf. note on II. 9.

IV. 1-7. 'Apollonius to his esteemed Horion, greeting. In order that you may be fully apprised of the commands of his Excellency concerning the Library of Hadrian, contained in a proclamation dated the 27th of Mesore, I have copied out the proclamation and subjoin it to this letter. Farewell. Phaophi 4. It is as follows'. The duplicate of III which is here appended has these variants: - ἔλαθεν and δμαρτάνουσιν for ἔλαθε and δμαρτάνουσι in 3 and 4, and τήν for τούs in 12. The last seems to be an unsuccessful attempt to improve the construction of that passage.

XXXV. PROCLAMATION AND LIST OF EMPERORS.

13.8 × 13.4 cm. A.D. 223 (recto).

The interest of this papyrus lies chiefly in its verso, which contains a list of the Roman emperors, with the number of years which each ruled, from Augustus to Decius, in the first or second year of whose reign the list was drawn up. Apart from misspellings it is generally accurate; but there is a serious blunder at the beginning, where owing to some confusion the name of Gaius is omitted, while the number of his years is assigned to Claudius, who has thus only four years instead of fourteen. Galba is also incorrectly omitted, an extra year being assigned to Nero; and Hadrian's reign is made two years too long.

In reckoning the length of reigns, the months after the last Thoth I in an emperor's reign are neglected, since the interval between the death of an emperor and the next Thoth I counted as the first year of his successor; cf. xcviii. 13, 14. Emperors, therefore, like Otho and Pertinax, whose reigns ended before the 1st Thoth following after their accession, are not mentioned, and usurpers like Pescennius Niger are naturally omitted. In cases of associated emperors only the name of the one who reigned longest is given, in order to make the total

number of years correct. Thus Marcus Aurelius, Verus, and Septimius Severus are not reckoned, since Commodus and Caracalla counted their own reigns from the accession of their fathers.

The *recto* contains the ends of a dozen lines from a proclamation made in the reign of Severus Alexander.

XXXVI. CUSTOMS REGULATIONS.

10.4 × 27.9 cm.

This papyrus consists of the lower halves of three columns written in a medium-sized cursive hand of the second or early third century. The first column contains accounts, the second and third contain extracts from customs regulations with reference to the payment of duty, the right of search, and the giving of written receipts. The regulations both in style and contents find close parallels in the Revenue Papyrus, and it is not improbable that these ordinances were inherited by the Roman government from the Ptolemies.

II. 1-6. This section appears to be contrasted with the one following, 6-15, and to mean that the tax-farmer, if he liked, could accept the valuation placed by the merchant on his cargo as a basis for paying duty. Cf. Rev. Pap. XXIX, which states that a tax-farmer may accept the cultivator's valuation of the crop, but that if he thinks it too low he may seize the crop and sell it, repaying the cultivator only the amount of his own assessment. In 1 the word mutilated is probably $\epsilon [\kappa\phi \circ \rho\tau\iota\sigma]\mu\hat{\omega}\nu$.] ρ os in 3 is very likely the termination of $\epsilon \mu \pi \circ \rho \circ \sigma$, and τ in 5 may be the beginning of $\pi \lambda \circ \hat{\omega} \circ \nu$.

6-15. 'But if the tax-farmer desire that the ship should be unloaded, the merchant shall unload the cargo, and if anything be discovered other than what was declared, it shall be liable to confiscation. But if nothing else be discovered, the tax-farmer shall repay to

the merchant the cost of unloading.'

III. 1-5. 'and they shall receive from those who farm (?) the taxes a written declara-

tion, in order that they may not be liable to false accusations subsequently.'

τ. If $\epsilon[\gamma\lambda\alpha\beta\delta\nu\tau\omega\nu]$ is right, the sense is that the merchants were to obtain a written declaration from the tax-farmers that the ship's 'manifest' had on examination proved correct. The doubtful ϵ might be σ , i.e. $\sigma[\nu\nu\tau\epsilon\lambda\nu\delta\nu\tau\omega\nu]$, the sense being that the tax-farmers were to get a written declaration of the cargo from the merchants when they did not examine it themselves.

6. The writer began a new paragraph, but stopped in the middle of the word $\pi\lambda \in [\omega\nu]$?

IX verso. List of Weights and Measures.

The recto of this papyrus contains the Aristoxenus fragment, pp. 14 sqq. On the verso is a list of weights and measures written in a semi-uncial hand of the third or early fourth century. While some of the weights and measures are specifically Egyptian, e.g. the copper drachma and the artaba, the medimnus in line 9, and perhaps the $\mu\nu\alpha\epsilon\hat{\iota}o\nu$ in 15, appear to be on the Attic, not the Egyptian standard. It is more probable that the list is an extract from some metrological writer of the Roman period, than that it is a series of private memoranda, in spite of the unusually bad spelling. Amid the paucity of authorities for the metrology of this period in Egypt the papyrus is a welcome addition, and one vexed question connected with the coinage is settled by it. At the left-hand side of this list is a column of figures from an account.

- 1. χαλκίνη: that the drachma in Roman times sometimes contained seven obols instead of six was shown by Brit. Mus. Pap. CXXXI recto. But it was doubtful whether two kinds of obols, silver and copper, were meant, and the name of the coin containing six instead of seven obols was unknown. Wilcken at one time thought of έξόβολος, but has since withdrawn the suggestion. The papyrus now gives the name of the coin representing six obols, 'copper drachma,' and shows clearly that there is only one kind of obol, that of copper. The drachma may contain six or seven obols according as it is a copper or a silver drachma, but it is the larger unit which varies and the smaller which is constant, just as the artaba and metretes vary while the choenix and chous remain the same. With regard to the occasion when a drachma was regarded as having six instead of seven obols, the state of affairs in Egypt was probably much the same under the Romans as it was under the earlier Ptolemies (Rev. Pap., App. iii, pp. 194 sqq.) before the introduction of a copper standard; i.e. copper was legal tender for payment of sums below a drachma or perhaps a stater, at their full nominal value of $\frac{1}{16}$ of a silver drachma. But when sums over a drachma were paid in copper instead of silver, the obol was liable to be reckoned at its real value as a piece of metal, which was † of a silver drachma; cf. Brit. Mus. Pap. CXXXI recto. This will explain those cases in which a sum is paid in mixed drachmae and obols, but the number of the obols is above seven, e.g. G. P. II. li., where the sum of 16 drachmae 16 obols is paid for some goatskins. The drachmae were paid in silver and the obols in copper, the two metals being kept distinct. Besides Roman copper coins Ptolemaic copper continued to be largely used especially in the first century (cf. xcix. 9), though in payments to the government it was generally, perhaps always, taken at a discount (χαλκὸς πρὸς ἀργύριου, xlix. 17, note).
 - 8. The artaba of 40 choenices, which is the largest known, corresponds with that

mentioned by Galen (Hultsch, Script. Metrol. p. 224) and the Tabulae Oribasianae (op. cil. p. 245), both authorities stating that the Egyptian artaba is equivalent to 5 modii (a modius is elsewhere stated to be equivalent to the Attic ἐκτεύς, which has 8 choenices; cf. 10 below). There is much variation in the size of the artaba, which in the Ptolemaic period could contain 36, 30, or 29 choenices (cf. note on Rev. Pap. XXV. 8), and in the Roman period still fewer.

The statement that the artaba is divided into 10 $\mu\acute{e}\tau\rho a$ is remarkable, for though fractions of the artaba frequently occur in papyri and ostraca, the fraction $\frac{1}{10}$ is not found, and $\mu\acute{e}\tau\rho a$ in this sense hardly ever occurs, although $\mu\acute{e}\tau\rho o\nu$ $\phi\acute{o}\iota\nu\kappa o(s)$ in cxvi. It is apparently a definite amount, and a $\mu\acute{e}\tau\rho o\nu$ $\tau \epsilon\tau\rho a\chi o\acute{\iota}\nu\kappa o\nu$ (sometimes with the addition $\delta\rho\acute{o}\mu o\nu$ or $\delta\rho\acute{o}\mu \phi$) is often found, e.g. in ci. 40, for measuring corn. Possibly these units of 4 choenices are due to the influence of the Attic system of measures, which appears in the next list containing subdivisions of the medimnus. That the artaba, though an Egyptian measure, was somehow equated to the Attic standard appears e.g. from G. P. I. lvii. 10 $\emph{a}\rho\tau\acute{a}\beta as~\emph{e}\kappa a\tau \acute{o}\nu~\emph{e}\i\kappa o\tau \i\lambda \theta \eta \nu al\phi \mu\acute{e}\tau\rho \phi.$ (A discussion of this complicated subject will be found in Wilcken's forthcoming Griechische Ostraka, and in the next volume of Kenyon's Catalogue of the British Museum Papyri.)

9. This medimnus of 48 choenices is the Attic, not the 'Ptolemaic' medimnus, which was 1½ times as large as the Attic and contained 2 ancient artabae or 9 modii, i.e. 72 choenices

(Hultsch, op. cit. p. 258).

13. The metretes containing 12 choes is of the usual size. A metretes of 8 choes is

found in the Revenue Papyrus for measuring wine (cf. note on XXXI. 5).

15. It is not clear whether the Attic or the Egyptian mina is meant here. As both Egyptian and Attic measures are found in the papyrus there is no a priori probability either way; but the fact that the $\mu\nu\alpha\epsilon\hat{i}$ ov is divided into sixteen parts, called $\tau\hat{\epsilon}\tau\alpha\rho\tau\alpha$, points to its being the Attic, which according to metrologists corresponded to 16 unciae, rather than the Egyptian which corresponded to 18. The number of $\theta\hat{\epsilon}\rho\mu\omega$ in a $\tau\epsilon\tau\hat{a}\rho\tau\eta$ would then be 72, the number of $\kappa\epsilon\rho\hat{a}\tau\alpha$ 144. If the $\mu\nu\alpha\epsilon\hat{i}$ ov were Egyptian, the corresponding numbers would be 81 and 162. It is difficult to fill up the lacunae in 16 satisfactorily, for though $\delta\hat{\epsilon}\mu\delta$ $\delta\hat{\epsilon}\mu\delta$ would suit what is left, such an order is scarcely possible, even for so illiterate a scribe.

XXXVII. REPORT OF A LAWSUIT.

31 × 40.7 cm. A.D. 49.

A report of a lawsuit relating to the identity of a child. A woman called Saraeus had undertaken to act as nurse to a foundling which had been adopted as a slave by a certain Pesouris. According to the nurse's assertion the infant died while in her keeping. Pesouris, however, declined to believe this, and claimed a child which Saraeus was nursing, and which she declared to be her own son, on the plea that it was really the foundling. The judgement given was of the nature of a compromise. The claim of Pesouris to the living child was rejected, while Saraeus was ordered to refund the money she had received from him in her capacity as nurse. It appears from No. xxxviii that Pesouris, or, as he is there called, Syrus, was much dissatisfied with this verdict.

'From the minutes of Tiberius Claudius Pasion, strategus. The ninth year of Tiberius Claudius Caesar Augustus Germanicus Imperator, Pharmouthi 3. In court, Pesouris versus Saraeus. Aristocles, advocate for Pesouris, said:—"Pesouris, my client, in the seventh year of our sovereign Tiberius Claudius Caesar picked up from the gutter a boy foundling, named Heraclas. He put it in the defendant's charge. This nurse was there for the son of Pesouris. She received her wages for the first year when they became due, she also received them for the second year. In proof of my assertions there are the documents in which she acknowledges receipt. The foundling was being starved, and Pesouris took it away. Thereupon Saraeus, waiting her opportunity, made an incursion into my client's house and carried the foundling off. She now justifies its removal on the ground that it was free-born. I have here, firstly, the contract with the nurse; I have also, secondly, the receipt of the wages. I demand their recognition." Saraeus :- "I weaned my own child, and the foundling belonging to these people was placed in my charge. I received from them my full wages of 8 staters. Then the foundling died, and I was left with the money. They now wish to take away my own child." Theon:—"We have the papers relating to the foundling." The strategus:—"Since from its features the child appears to be that of Saraeus, if she and her husband will make a written declaration that the foundling entrusted to her by Pesouris died, I give judgement in accordance with the decision of our lord the praefect, that she have her own child on paying back the money she has received."

XXXVIII. PETITION TO THE PRAEFECT.

Gizeh Museum, No. 10,002. 36 x 13.2 cm. A. D. 49-50.

The following letter is the sequel to the legal proceedings described in xxxvii. It was written, probably a few months after xxxvii, by the husband of the nurse Saraeus to the praefect, complaining that Pesouris (or, as he is here called, Syrus) refused to comply with the judgement of the strategus as there recorded. The papyrus is written in a very cursive hand.

Syrus, son of Syrus, entrusted to the keeping of my wife Saraeus, daughter of Apion, in the seventh year of Tiberius Claudius Caesar Augustus Germanicus Imperator, on my security, a boy foundling named Heraclas, whom he had picked up from the gutter, to be nursed. The foundling died, and Syrus tried to carry off into slavery my infant son Apion. I accordingly applied to Pasion, the strategus of the nome, by whom my son Apion was restored to me in accordance with what you, my benefactor, had commanded, and the minutes entered by Pasion. Syrus, however, refuses to comply with the judgement, and hinders me in my trade. I therefore come to you, my preserver, in order to obtain my rights. Farewell.'

1-2. Gn. Vergilius Capito: cf. C.I.G. 4956. He was still praefect in 52, cf. xxxix. 2, 5. 3. Σθρος: in xxxvii he is always called Πεσοθρις. For a similar variation cf. G.P. II. xxxvi, where the names Πανεβχοῦνις and Νεβχοῦνις are interchanged.

11. καθά, if right, is superfluous.

17. $\chi \epsilon \iota \rho \delta \tau \epsilon \chi \nu \sigma \nu$: we learn from xxxix. 8 that Tryphon was a weaver.
18. The beginning of this line is difficult. $\epsilon \pi \iota \sigma \pi \sigma$ may be read instead of $\epsilon \pi \iota \sigma \epsilon \tau \sigma$.
The next letter may be ν , but is more like ϵ . Some verb like $\eta \kappa \omega$ or $\phi \epsilon \omega \nu \omega$ is required.

XL. A LEGAL DECISION.

 18.7×14.8 cm. Late second or early third century.

Report of a judgement given in court by the praefect Eudaemon in the case of a claim for immunity from some form of public service, on the ground that the petitioner was a doctor. The judge demands a scientific proof of the

assertion. This summary of legal proceedings is one of a series, being preceded, and very likely followed, by a similar abstract. The preceding case is too mutilated to be worth printing. It is however evident that there too a doctor was concerned, and that his rights were upheld; and it bears the date Thoth I, the twenty-first year of Hadrian. It may therefore be inferred that the name of the emperor lost in line 2 of the following text was either Hadrian or Antoninus. The present copy however seems from the character of the handwriting to have been made a good deal later than the proceedings which it describes. It is written on the *verso* of some late second century accounts.

XLI. REPORT OF A PUBLIC MEETING.

Gizeh Museum, No. 10,073. 31.3×26.3 cm. Late third or early fourth century.

The following text contains an account of a popular demonstration made in honour of the prytanis at Oxyrhynchus on the occasion of a visit from the praefect. It is not easy to gather from the disjointed acclamations of the

citizens with which the document is for the most part filled what was the precise character of, or ground for, the honour which they wished to see conferred on the prytanis. All that is apparent is that they were anxious to have a vote immediately passed in his honour, and that he himself wished it to be post-poned for a more fitting occasion.

Several specimens of Greek acclamations are found in inscriptions (cf. Th. Reinach, *Bulletin de Corr. Hell.*, 1897, p. 543), but the present is much the most elaborate example, and the first, we believe, on papyrus. Its Greek is rather debased—though here no doubt it does not misrepresent the populace of Oxyrhynchus—and it includes a number of strange words and expressions.

O... Dioscorides, chief of the citizens! O... Seuthes, chief of the citizens, equitable governor, equitable citizen! True and upright advocates, true and upright assessors! Hurrah for all who love the city. Long live the lords Augusti!"'
- 3. Αθγουστοι κύριοι. This was therefore a period of joint rule. Palaeographical considerations make it probable that the κύριοι were Diocletian and Maximian. τῷ καθολικῷ:

cf. B.G.U. 21 III. 10. The καθολικός in writers like Eusebius and Julian is a finance officer. Here, however, the word seems to be used in a wider sense, as a title of the $i \gamma \gamma \epsilon \mu \dot{\omega} \nu$.

4. ωκαιαναι . . . ωκαιαναι. The meaning of this title or form of address, which only occurs here before proper names, is very doubtful. It seems impossible in this context to read & Καιανέ and suppose a reference to the obscure sect of the Cainites. It is not more satisfactory to read the letters as one word, 'Ωκεανέ. Dioscorus seems to be the name of the prytanis.

5. ισιην, whatever it may mean, appears to be the subject of ϕ ιλεί. The σ may

perhaps be δ.

7. The letters preceding and following ωκααναι are illegible owing to the fact that the papyrus was imperfectly flattened out before being mounted. A difficulty from the same cause occurs in 25. ωκααναι was no doubt here, as elsewhere, followed by some name.

12. ἰσάρχο [ντ]a: cf. 28. The word is new.

20, 21. The doubtful κ after ν_0 may be read as ν or perhaps χ . $\pi a\sigma \epsilon i \nu_i$ might be interpreted as $\pi \hat{a} \sigma i \nu \epsilon \hat{i}$ and constructed with $\tau \hat{o} \nu_0$. [...] $a\nu$, but the interjected $\Lambda \tilde{v} \gamma_0 \nu_0 \sigma \tau_0 i$ is rather against this.

24. φιλόπολιν is corrected into φιλοπολίτην.

27, 28. Dioscorides and Seuthes were probably officials who were 'on the platform,' unless the former is identical with Dioscorus mentioned in 4.

εὶς ώρας: cf. the converse phrase μη ώρασι.

XLII. PROCLAMATION.

27.7 × 20.2 cm. A.D. 323.

Proclamation by Dioscorides, λογιστής of the nome, with reference to an approaching gymnastic display by the youths of Oxyrhynchus. Judging by the number of alterations, this document is probably a first draft. The date of the papyrus, which is written much smaller and more cursively than the rest, is Tybi 23 (Jan. 18) in the sixth consulship of Licinius Augustus, and the second consulship of a Caesar (whose name is lost, but can be supplied from Corp. Pap. Rain. x as Licinius), τοις ἀποδειχθησομένοις ὑπάτοις τὸ γ, a phrase which recurs by itself in lx. 12, written on Mesore 24. The explanation of this curious addition is to be found in the unsettled character of the Empire. The war between Constantine and Licinius took place in the first half of 323, and until its conclusion there were two sets of consuls, Severus and Rufinus, the regular consuls for the year, in the West, and Licinius Augustus VI and Licinius Caesar II in the East, as was first shown by the Vienna papyrus mentioned above (Mommsen Hermes xxxii. p. 545). At any rate, for greater accuracy, the scribe of our papyrus dated the year not only by the existing consuls, but by the consuls-elect (ἀποδειχθησόμενοι), whom he does not name, but indicates sufficiently by saying that they would be, when elected, consuls for the third time, i.e. the Caesars Crispus and Constantinus, who were actually consuls for the third time in 324.

But why were the existing consuls ignored in lx. 12, where the date is only given by the consuls-elect? The explanation probably is that that papyrus was written on Aug. 17, just after the defeat of Licinius. This is borne out by a comparison of the Vienna papyrus, dated May 23, 323, where the consuls are given as the two Licinii, and Pap. de Genève I 10, written about August 8 (the exact day is uncertain), which is dated by the regular consuls for 323 (Mommsen, l.c.). The writer of lx, being in doubt as to who the consuls for the year really were, gives only the year of the consuls-elect.

The difficulty of this explanation is the necessity of supposing that the scribe omitted the names of the consuls-elect, although he knew them, and, secondly, that Crispus and Constantine were acknowledged so long beforehand by Licinius as consuls-elect for 324. This might be avoided by taking the $\frac{\partial \pi}{\partial k} = \frac{\partial \pi}{\partial$

'Dioscurides, logistes of the Oxyrhynchite nome. The assault at arms by the youths will take place to-morrow, the 24th. utmost in the gymnastic display. The spectators will be present at two performances.'

1. The λογιστής or curator reipublicae plays an important part in the fourth century Oxyrhynchus papyri, cf. lxxxiii–lxxxvii. Originally a special finance commissioner, he

was by this period one of the chief civil officials (Marquardt and Mommsen *Handb*. IV. pp. 487 sqq.).

3. $\pi\rhoo\dot{a}\gamma o v \sigma a$: there appears to be no instance of $\pi\rhoo\dot{a}\gamma \epsilon v \nu$ used absolutely in the sense of 'excel,' but if it means here advance in point of time, it merely repeats the idea expressed by $\epsilon\theta \sigma s$.

ro. This is a very early instance of shorthand on papyrus. In later papyri it is met

with frequently, but the key has yet to be discovered.

XLIII. MILITARY ACCOUNTS. WATCHMEN OF OXYRHYNCHUS.

 $25 \times 90 \ cm$. A.D. 295.

The recto and verso of this papyrus each contain long official documents. That on the recto is of a military character, giving an account of supplies, chiefly of fodder, provided to various troops and officers. The account is accompanied by copies of the receipts from the persons concerned. It is complete at the end, where the total amount of the supplies and the date are given, but mutilated at the beginning, where one or more columns may have been lost.

The document on the *verso*, which was written not long afterwards, is a list of the guards or watchmen who were distributed over the chief streets and public buildings of Oxyrhynchus. It conveys a good idea of the size of the city in the fourth century, and contains much useful topographical information. It is complete so far as it goes, but it was left unfinished, the names of the guards of the two streets last mentioned not having been filled in. A similar blank occurs in Col. III.

Among the public buildings figure the temples of Sarapis, Isis, Thoëris, and Caesar. To Thoëris a tetrastyle, besides a regular temple, was dedicated. There are two churches (?), the north and the south, which give their names to two streets. Mention is also made of the Theatre, the Capitolium, three sets of baths, the Gymnasium, the Nilometer, the gates of Pesor and Pses, and the north and south gates.

Streets are named in various ways; sometimes by an adjective, e.g. Shepherds' Street, Libyan Street; sometimes from an individual, e.g. the Street of Seuthes, the Street of Apollonius; but most frequently from some prominent building or house which they contained or adjoined.

 2. $\Gamma'\Delta = 34,000$. Tens of thousands are written in ordinary letters in this papyrus.

 7. $\pi\rho\omega\tau\epsilon\kappa\tau\omega\rho$ τοῦ $\Sigma\epsilon\beta\alpha\sigma\tau$ οῦ: protector Augusti, one of the imperial bodyguard; cf.

11. φρουμαρία apparently stands for ἀποχή φρουμενταρία (frumentaria).

21. τεσσαραρίω = tessarario, the soldier who passed the watchword; cf. IV. 3, 6.

26. ἐκσκέπτορσι = exceptoribus, shorthand clerks.

III. 16. ἔτους β is a mistake for ἔτους γ; cf. VI. 22.

IV. 18.

16. κοφίνους ἀννώνας: these baskets contained only 20 λίτραι and are opposed to the κόφινοι ἐκ λιτρῶν τεσσαράκοντα of III. 28, 33. The κόφινοι of 20 λίτραι recur in the next receipt, IV. 22, and in V. 7. In the other cases the baskets are of different capacity.

V. 16. λειβλαρίφ = librario, 'secretary.'

VI. 17. It does not seem possible to read what was originally written as φρουμαρίαs, though no doubt that word was intended. The object of the correction is not apparent.

XLIV. SALE OF TAXES.

 17.3×14.4 cm. Late first century.

Letter from Paniscus, strategus of the nome, to Asclepiades the basilicogrammateus, with reference to the difficulty of finding persons willing to take the responsibility of farming certain taxes. The strategus had been in communication with the praefect on the subject, and now writes to the basilicogrammateus to acquaint him with the state of affairs.

The letter is written in a fine semi-cursive hand dating from about the end of the first century, probably the reign of Domitian, to which a number of dated papyri found with this one belong.

[δ καὶ Ἡρακ]λᾶς?
 The syllable κυ is written twice by mistake.

'Paniscus, strategus of the Oxyrhynchite nome, to Asclepiades, basilicogrammateus of the same nome, greeting. At the last sale of taxes held by myself and you in the presence of the customary officials, the farmers of the tax on sales and the farmer of the tax payable to the record office not only refused to bid, on the plea that they had incurred sufficient loss already, but seemed likely to abscond. I accordingly thought it best to write to his excellency the praefect on the matter. He replied requesting me to examine the terms under which the taxes had previously been farmed, and as far as possible to lighten the burden of the farmers, in order to prevent the disappearance of those who were being pressed to bid. I have therefore already sent you the copy of his letter to inform you, and to acquaint you with the fact that in your absence, as the taxes have been refused by the present farmers and no one else at all has come forward to undertake the responsibility, though the taxes have been put up to auction several times, I have taken declarations by the farmers of the tax upon sales and those payable to the record office '

6. For the difficulty of finding persons willing to undertake the farming of the taxes cf. the edict of Tiberius Alexander (C. I. G. 4,957) in the reign of Galba, and note on Rev. Pap. XXXIV. 18.

6. For the ἐγκύκλιον cf. introduction to xcvi. The ἀγορανόμιον, which appears to be identical with the γραφεῖον in 23, is the tax paid for the services of the agoranomus as notary in drawing up contracts, &c.; cf. B. G. U. 277, II. 11, where the tax called γραφεῖον is coupled with χαρτηρά, the tax on papyrus. On the advantages gained by the government and the tax-payers through the system of playing off the tax-farmers against the officials, cf. note on Rev. Pap. XXXI. 14.

17. Owing to the lacuna at the end of the papyrus it is uncertain whether καί before

ότι answered to a καί later, or whether αὐτό is to be supplied after εἰδῆς.

XLV. LAND DISTRIBUTION.

20 × 9·5 cm. A.D. 95.

This and the two following papyri, together with clxv, clxxiv, clxxv and clxxvi, described at the end of the volume, are concerned with $\kappa\alpha\tau\alpha\lambda\circ\chi\iota\sigma\mu\acute{o}s$. This was the title given to the distribution of parcels of land $(\kappa\lambda\hat{\eta}\mu\circ\iota)$ to the $\kappa\acute{\alpha}\tau\circ\iota\kappa\circ\iota$,

a privileged class of settlers who were exempt from the poll-tax (Wilcken, Hermes, xxviii. 249). The various κλ $\hat{\eta}$ ροι were called after the name of individuals, not improbably the first κάτοικοι to whom they were assigned (xly. 10, xlyi. 19, xlyii. 18), and were subdivided into $\mu \epsilon \rho \eta$ belonging to one or several κάτοικοι. The administration of καταλοχισμοί was under the superintendence of an official, called δ ἀσχολούμενος τοὺς καταλοχισμούς or δ πρὸς καταλοχισμοῖς τῆς Αἰγύπτου (xlvii. 3 and note), who had his agents in the different nomes (xlvii. 2 'Αχιλλεύς ὁ προκεχειρισμένος ύπὸ Πύρρου, cf. clxxiv. 1 Πλούταρχος δ καθεσταμένος ἐπιτηρητὴς καὶ χειριστὴς καταλοχισμῶν 'Οξυρυγχείτου, perhaps identical with the συντακτικός of G. P. II. xlii. 2). The owners of καταλοχισμοί paid a tax to the state, which like other taxes was farmed out, cf. B. G. U. 340. 6, 7 (where the editor quite unnecessarily wishes to alter καταλοχισμῶν to καταλογισμών). xlv, xlvi, and xlvii are official notifications addressed by the inspectors of καταλοχισμοί in the Oxyrhynchite nome to the agoranomi, announcing that the ownership of a certain $\mu \ell \rho o s$ had changed hands. The land is stated to have been 'ceded' (παρακεχωρημένου, xlv. 4), and sometimes 'in accordance with a contract' (xlv. 7). Nothing is said to imply that the transaction was a sale, but it probably was so in all these cases; cf. B. G. U. 282, which is a contract for the sale of a piece of land ἐν κατοικικῆ τάξει, and especially 1. 33, των πεπραμένων καὶ παρακεχωρημένων, and B. G. U. 379, 446 and 543. B. G. U. 340. 9 shows that the land held under a καταλοχισμός could be bequeathed like ordinary land.

The present document is a letter from Phanias and two other inspectors of καταλοχισμοί, addressed to the agoranomi and stating that 1 1 1 arourae of corn land had been ceded by Tapotamon, daughter of Ptolemaeus, to Diogenes, son of (the same?) Ptolemaeus. The letter is endorsed at the bottom by Heraclas, one of the senders, the body of the document having no doubt been written by one of his clerks.

'Phanias, Heraclas, and Diogenes also called Hermaeus, officials employed in land distribution, to the agoranomi, greeting. Diogenes, son of Ptolemaeus, has had ceded to him by Tapotamon, the daughter of Ptolemaeus, son of Kolylis, acting with her guardian who is her grandson Plutarchus, son of Plutarchus, son of Plutarchus, in accordance with the terms of a contract executed this day, a square piece of allotment corn land ready for sowing, the property of Tapotamon, situated near the village of Korobis and forming part of the lot of Menoetius, in size $1 + \frac{1}{2} + \frac{1}{3} + \frac{1}{12}$ arourae. We therefore write to you to inform you. Farewell.'

13. διό is superfluous since the whole of the sentence from 3 is in the genitive

absolute; cf. xlvi. 26.

2nd hand.

XLVI. LAND DISTRIBUTION.

25.3 × 7.8 cm. A.D. 100.

Another letter from Phanias and Diogenes to the agoranomi, having the same formula as xlv, and stating that Arthothes the younger, a priest and 'sealer of the sacred calves' in the temple of Thoëris, Isis, Sarapis, and the $\sigma \dot{w} v v a o i$ $\theta \epsilon o i$, had ceded to his elder brother Arthothes, the adopted son of Ampendis, and a priest at the same temple, $1\frac{5}{7}\frac{5}{2}$ arourae of corn land held by the younger Arthothes in common with some other persons in the lot called after Andronicus. The papyrus is dated five years later than xlv.

XLVII. LAND DISTRIBUTION.

 14.6×6.6 cm. Late first century.

Letter, similar to the two preceding, from Achilleus the agent of Pyrrhus, the superintendent of καταλοχισμοί throughout Egypt, addressed to the agoranomi, and stating that Didymus, son of Chaereis, had ceded to Teos, son of Petearpebebis, some land held in common between Didymus and the father of Teos, in the lot of Zenodorus. The mention of Pyrrhus, who is known to have been superintendent in A.D. 86 (note on 3 below), and the character of the handwriting, which is late first century, fix the date of the papyrus as the earlier part of Domitian's reign.

1. The first line, which is written very cursively, perhaps by a different hand from

the body of the document, contains the title.

3. Πύρρου: cf. introduction to xlv and G. P. II. xlii, which is a letter of Pyrrhus himself in A. d. 86 to a subordinate official called the συντακτικόs, apparently ordering him to assign grants of land to certain κάτοικοι. The first line of that papyrus can now be restored as Πύρρος ὁ πρὸς καταλοχ(ισμοῖς) τῶν κατοίκ(ων) τῆς Α[ἰγύπτου τῷ

6. Πετααρπεβήβιος : spelled Πεταρβεβήβιος in xlvi. 5; cf. 21 below.

XLVIII. EMANCIPATION OF A SLAVE.

15.7 × 9.5 cm. A.D. 86.

This and the two following documents are concerned with the manumission of slaves. The form of manumission described in them is by purchase, the procedure being briefly this:—the terms of freedom having been agreed upon by master and slave, a notification of the details of the transaction was sent to the agoranomus by the banker through whom the purchase money was paid, accompanied perhaps by his receipt for the payment (cf. 1). The slave was then presumably declared by the agoranomus to be free.

It is not however made clear what formalities other than the payment of a sum of money by the slave preceded the notification to the agoranomus, or with which, if any, of the forms of emancipation under the empire, collected e.g. by Mitteis, Reichsrecht und Volksrecht, p. 372 sqq., these manumissions should be classed. Possibly they are examples of the common hierodulismus, cf. l. 3, note. In any case it is clear that the initiative came from the slave, and that these cases are therefore to be contrasted with that described in B. G. U. 96, where the master by a simple declaration grants the slave his freedom, and nothing is paid except the regular tax of 5 per cent. on manumissions (l. $\tau \eta \nu$ $[\epsilon l\omega] \theta \nu \epsilon l\omega \sigma \tau \eta \nu$ in line 8 of that papyrus).

The present text is a letter addressed by Chaeremon to the agoranomus of Oxyrhynchus, requesting him to grant freedom to a female slave named

Euphrosyne, whose emancipation had been purchased for 10 drachmae of silver and 10 talents, 3,000 drachmae of copper.

She is being set at liberty under by ransom by her mistress Aloine, daughter of Komon, son of Dionysius, of Oxyrhynchus, under the wardship of Komon, the son of Aloine's deceased brother Dioscorus. The price paid is 10 drachmae of coined silver and 10 talents, 3,000 drachmae of copper. Farewell.'

r. Chaeremon was probably the banker through whom the price of the slave's freedom was paid; cf. xlix. r with l. r.

6. ὑπὸ διαγηνηλιον: this strange term, the meaning of which is quite obscure, recurs in

xlix. 8. It is the name of the form under which the manumission was carried out.

XLIX. EMANCIPATION OF A SLAVE.

18.6 × 7 cm. A.D. 100.

Letter sent jointly by two bankers named Theon to the agoranomi of Oxyrhynchus, requesting the freedom of the slave Horion, for which 10 drachmae of silver and 2 talents, 6,000 drachmae of copper had been paid. Cf. xlviii.

9. $(\tau a \lambda \acute{a} \nu \tau \omega \nu)$ β has apparently been omitted by mistake at the beginning of this line, cf. 18.

17. χαλκοῦ πρὸς ἀργύριον: this term, which is not uncommon in the Ptolemaic period, has not previously been found in Roman papyri. Χαλκὸς πρὸς ἀργύριον is synonymous either with χαλκὸς ἰσόνομος or χαλκὸς οῦ ἀλλαγή, copper accepted at par with silver, and copper at a discount, most probably with the latter; cf. l. 4, 5, xcix. 19.

L. EMANCIPATION OF A SLAVE.

 $6.5 \times 9.1 \ cm$. A.D. 100.

Receipt sent by the bank of Theon to the agoranomus, showing that 10 drachmae of silver and 2 talents, 6,000 drachmae of copper had been paid for the liberty of a slave. Cf. xlix and xlviii, introd. The papyrus is written in the same hand as xlix, which was found with it, and perhaps both documents refer to the same transaction $(v.\ inf.)$, though the date mentioned in this papyrus is at least 3 months earlier or 9 months later than that of xlix.

3. $\pi\rho\sigma\pi$ (): the meaning of this abbreviation is very obscure. We should expect a proper name, in which case ' $\Lambda\phi\rho\sigma$ () might be ' $\Lambda\phi\rho\sigma$ ($\delta\iota\sigma\iota\sigma s$), the name of the slave's mother. But there are very few Egyptian names beginning with $\pi\rho\sigma\pi$, and those which occur, e.g. $\Pi\rho\sigma\pi\lambda\hat{a}s$, are so rare that we should not expect to find one abbreviated in this manner. Moreover the identity of the handwriting and of the sum paid in this papyrus with those of xlix points to their being both concerned with the emancipation of the same slave, and in xlix the name of the slave is Horion. On the other hand, if $\pi\rho\sigma\pi$ () is not a proper name the reading may be $\pi\rho\delta\pi(\delta\lambda\sigma s)$ ' $\Lambda\phi\rho\sigma(\delta\iota\tau\eta s)$, with $\delta\sigma(\delta\iota\lambda\sigma s)$ or $\delta\sigma(\delta\iota\lambda\sigma s)$, which could be explained as a reference to the common form of manumission by 'hierodulismus,' in which the slave paid a sum of money and became by a legal fiction the nominal property of a temple, but in reality free. The obscure phrase in xlviii. 6 and xlix. 8 $\delta\tau\sigma$ $\delta\iota\sigma\gamma\eta\nu\eta\lambda\iota\sigma\nu$ $\delta\tau$ $\delta\iota\sigma\gamma\rho\nu\eta$ might also have some reference to the hierodulismus. The formulae in other papyri concerning the emancipation of slaves do not afford any help. An examination of more Oxyrhynchus papyri may lead to the solution of these difficulties.

LI. REPORT OF A PUBLIC PHYSICIAN.

14 × 7.2 cm. A.D. 173.

A report addressed to the strategus of the nome by a public physician, stating that, in accordance with the instructions of the strategus to examine into the cause of a death which had taken place and present a report, he had visited the house and seen the body; cf. lii and B. G. U. 647. The papyrus is written in a very cursive sloping hand.

LII. REPORT OF PUBLIC PHYSICIANS.

14.7 × 10 cm. A.D. 325.

We accordingly went to Dioscorus' house, and saw that the girl had several cuts in her hip and wounds near the shoulder and on the right knee. We therefore present this report.'

5. λαμ(πρῶς) καὶ λαμ(προτάτης): these honorific titles are common in the fourth century papyri from Oxyrhynchus. Alexandria, Hermopolis, and Antinoë were similarly styled λαμπροτάτη, but not Arsinoë.

LIII. REPORT ON A PERSEA TREE.

24.8 × 15.5 cm. A.D. 316.

Report addressed to Valerius Ammonianus, logistes, by Aurelius Irenaeus on behalf of the guild of carpenters of which he was president for the time being, concerning a persea tree which he had been commissioned to examine, no doubt with a view to its being cut down. The papyrus, which is numbered at the top 105, formed one of a series of similar reports, glued together in the office of the logistes or at the archives, cf. xxxiv. I. 13 note. Parts of the preceding and succeeding documents are preserved, the one written by some builders, the other by two public physicians, and both having the same formula as li and lii, to which the present papyrus also bears much resemblance.

On the Egyptian persea tree cf. Pliny, *Hist. Nat.* xiii. 9, 15. A law of Arcadius (*Cod.* Justin. xi. 77) forbad its being cut down or sold.

2. καταδεοῦs: apparently ὅντοs has to be supplied, and the phrase applies to Diogenes, who is not mentioned until line 8. The construction is very awkward, but the letter is far from being a model of style, witness the repetition of λόγοs in 16-18.

In a corner of the verso of A is $\theta\omega\nu$:

'To Aurelius Apollonius, also called Dionysius, ex-recorder, etc., ex-gymnasiarch, councillor, prytanis in office of the illustrious and most illustrious city of Oxyrhynchus, public magistrate, from Aurelius Menestheus and Aurelius Nemesianus, both sons of Dionysius, of the same illustrious city of Oxyrhynchus, Kasiotic joiners. We request that orders may be given for payment to be made to us at the city's expense on account of wages due for work done by us as Kasiotic joiners on both sides of the street built by you from the gateway of the gymnasium leading southwards to the lane of Hieracius, of the total amount due for the whole work, in accordance with the vote of the high council, namely four talents and four thousand drachmae, 4 tal. 4000 dr. And we beg you to instruct the public treasurer to pay us in full, as is usual.'

6. Κασιωτῶν: Κάσιον near Pelusium gave its name to a special kind of woodwork, which was first manufactured there. Hence the proverb Κασιωτικὸν ἄμμα, which is explained (Proverb. Bodl. 527, p. 62 Gaisf.), ἐπὶ τῶν σκολιῶν τοὺς τρόπους ἀπὸ τῶν ἐν Πηλουσίω Κασιωτῶν τέχνην ἀμμάτων ἐπιτεχναζομένων. Cf. LVI. APPOINTMENT OF A GUARDIAN.

 23.8×9.5 cm. A.D. 211.

Letter addressed to Maximus, a holder of various municipal offices, by Tabesammon, daughter of Ammonius, stating that she had arranged to borrow some money on the security of her vineyard, and asking him, in the absence of the $\beta \alpha \sigma \iota \lambda \iota \kappa \delta s$ $\gamma \rho \alpha \mu \mu \alpha \tau \epsilon \dot{\nu} s$, to allow Amoitas to act as her guardian for that transaction only. At the bottom are the signatures of Tabesammon and Amoitas.

Dioscorus, strategus of the Antaeopolite nome, has sent me a despatch which has been delayed until Epeiph 13 of the past third year, explaining that Potamon, also called Sarapion, the collector of the nome, among the receipts of the revenue of the third year when you were in office, received towards the completion of the survey of the dykes and canals in the second year the sum of 3187 drachmae, 3 obols, which he did not pay over to the revenue office within the appointed time. Dioscorus now wishes me to ask that this should be refunded, and to credit it to the nome. In order therefore that you may be acquainted with these facts and lose no time in repaying the money in accordance with his letter '

LVIII. APPOINTMENT OF TREASURY OFFICIALS.

22 × 12·5 cm. A.D. 288.

Letter to the strategi of the Heptanomis and the Arsinoite nome from Servaeus (?) Africanus, who was either praefect of Egypt or, more probably, epistrategus of the division. The writer complains of the expense caused by the multiplication of officials connected with the estates of the treasury, and gives instructions that in future each estate should be administered by a single officer, assisted by at most three subordinates.

'Servaeus Africanus to the strategi of the epistrategia of the Heptanomis and Arsinoite nome, greeting. The accounts have themselves proved that a number of persons wishing to swallow up the estates of the treasury have devised for themselves various titles, such as administrators, secretaries, or superintendents, by which means they secure no advantage to the treasury, but swallow up its surplus. It has therefore become necessary to send you instructions to cause the election, on the responsibility of the several councils, of a single trustworthy superintendent over each estate, and to put an end to the other offices. The superintendent elected shall have the power to choose two or at most three other persons to assist him in his work. In this way useless expense will be stopped, and the estates of the treasury will receive proper attention. You will of course take care that only such persons are appointed to assist these superintendents as are in a position to stand the test.'

LIX. APPOINTMENT OF A DELEGATE.

22.7 × 15.4 cm. A.D. 292.

Letter from the council of Oxyrhynchus to the strategus, stating that a max who had been chosen to attend the praefect's court at Alexandria had claimed exemption on the ground that he was a victor in the games; the council had consequently appointed a substitute, whom the strategus is asked to inform of the fact and to despatch with all speed.

On the verso are six short lines written in a small hand and nearly effaced.

12. ϊερονικην Pap. Ι. έξετάσεσιν.

After an elaborate introduction, in which the council of Oxyrhynchus through its president Aurelius Apollo addresses the strategus Aurelius Apollonius through Asclepiades, the papyrus proceeds (line 8):—'At a meeting of our body a despatch was read from Theodorus who was recently chosen in place of Arion the scribe to proceed to his highness the praefect and attend his immaculate court. In this despatch he explain that he is a victor in the games and exempt from inquiries . . . We have there nominated Aurelius . . . to serve, and we send you word accordingly, in order that this fact may be brought to his knowledge, and no time be lost in his departure and attendance upon the court. We pray for your health, dearest brother.'

3. ὑπομνηματογράφου: this office is closely connected with that of the strategus, cf. 6, 7 below and lxviii. 3–5, where a ὑπόμνημα is issued διὰ τοῦ στρατηγοῦ.

7. διαδόχου is here equivalent to the common phrase διαδεχομένου τήν στρατηγίαν,

'acting strategus.' Cf. liv. 7.

9. ἀπαντῆσαι κ.τ.λ.: it is not clear for what reason some one had to be sent to attend the praefect's court. Perhaps he was to act as representative of the city in some inquiry then being held; cf. 12. The reluctance of Arion to go shows that the duty was regarded as a burden rather than an honour.

12. $i\epsilon ρονίκην$: i.e. a victor in some one of the celebrated games; the word is common in inscriptions.

LX. COMMISSARIAT.

24.8 × 12.3 cm. A.D. 323.

Letter addressed by Hermias, strategus, to the council of Oxyrhynchus through its president Eutropius, notifying the fact that a supply of meat had been sent to Nicopolis, in accordance with the orders of the praefect Sabinianus, for some troops which were stationed there under Valerianus.

LXI. PAYMENT OF A FINE.

22.1 × 8.4 cm. A.D. 221.

Notice sent by the strategus Aurelius Sarapion to the government bank at Oxyrhynchus, to the effect that he had caused to be paid into the bank the sum of 2255 drachmae, which was to be entered to a separate account until its destination was decided. The money was the proceeds of a fine inflicted for the non-appearance of certain accounts at the date fixed by the dioecetes, the chief of the financial administration. The papyrus is dated in the joint reign of Elagabalus and Severus Alexander.

LXII verso. Letter of a Centurion.

 $26 \times 7 \cdot 2$ cm. Third century.

Letter from a centurion to Syrus, acting strategus of Oxyrhynchus, giving instructions with reference to the embarkation of corn, about which he apprehended some deception. The *recto* of this papyrus contains a report in twenty-

eight lines of some judicial process before Domitius Honoratus, praefect of Egypt in the fifth year of an emperor, perhaps Gordianus (cf. lxxx. 12). It is unfortunately too mutilated to give any connected sense. The decision of the praefect, which was to the effect that certain subordinate officials should be exempt from public burdens, is written in three shorter lines at the end:—

LXIII. LADING AND INSPECTION OF CORN.

Gizeh Museum, 10,0c7. 20.5×12.1 cm. Second or third century.

Letter to Archelaus, a minor official, from a superior, giving him directions concerning the lading of a cargo of wheat, and its official inspection. In this case too, perhaps, as in the preceding papyrus, the corn was destined for Italy.

After this give him your best attention and let him see the granaries, and prepare the overseers and the other officials concerned, whose names have been given you by Harpocration, in order that there may be no delay. My best wishes for your health, dearest friend.'

9. ζυγοστασίαν: cf. G. P. II. xlvi (a), a letter addressed to a strategus stating that the ζυγοστασία of a γόμος had taken place.

LXVI. ERECTION OF A STATUE TO A PRAEFECT.

13.7 × 10.1 cm. A.D. 357.

Two letters, one of which is from Flavius Eutrygius, logistes, and Apion (?), strategus, to Aurelius Sineeis, probably a statuary, ordering the con-

struction of a statue to the praefect Pomponius Metrodorus; the other letter, which is incomplete, is the reply of Aurelius Sineeis.

LXVII. DISPUTE CONCERNING PROPERTY.

. 25·7 × 36·4 ст. л. р. 338.

This papyrus contains three documents, the first of which is a letter addressed by Aurelius Ptolemaeus to Aurelius Aëtius, an ex-official of high standing, with reference to a dispute between the writer and two other persons about some property, and enclosing, secondly, a letter from Flavius Antonius Theodorus, praefect of Egypt, to Aëtius, written in answer to an application from Ptolemaeus that Aëtius should be appointed judge to decide the dispute. There follows, thirdly, the application in question of Ptolemaeus to the praefect,

stating his side of the case. The sequence of the three documents thus inverts their historical order.

There are two copies of this papyrus, the second being somewhat less complete than the first, but serving to fill up all the lacunae, except λav of $\psi[\lambda av\iota\omega]$ in 4; ω of $\omega]\rho\iota\omega vos$ in 13; $\alpha\iota$ of $\delta vv[\alpha]\tau[\alpha\iota$ and the lacuna after $vo\mu\omega$ in 14; $\alpha\pi\sigma$ κ supplied in 15; the first σ and ω of $\kappa\lambda\eta\rho[\sigma vo\mu\iota\omega]v$ in 16; the lacuna after $\delta\iota\kappa\alpha[$ in 17; the first two letters lost after $\pi\alpha\rho\alpha$ $\tau[$ in 19; and the lacuna in 23. A collation of the variants in the duplicate copy is given below.

The duplicate copy has the following variants:—

- 'In the consulship of the most illustrious Flavius Ursus and Flavius Polemius, Pharmouthi 2. To Aurelius Aëtius, ex-magistrate of the illustrious and most illustrious city of Oxyrhynchus, from Aurelius Ptolemaeus, son of Horion, of the same city. I have approached in a petition his excellency my lord the praefect of Egypt, Flavius Antonius Theodorus, wherein I accused Pataësis and Panechotes, of the village of Lile in the fifth district, who are making illegal encroachments on my estates. I now hand in to you the injunctions which in reply he wrote to your clemency and impartiality, together with the petition which I made, in order that you may carry his orders into effect. They are as follows:—"Flavius Antonius Theodorus to Aëtius, ex-magistrate of the Oxyrhynchite nome, greeting. If the accused persons protest against the restoration of the estates of which they are said to be in occupation and of which, as at least the accompanying document

testifies, the rightful owner is the accuser, take care to enforce the precepts of the law and to have the preliminary proceedings of the court conducted under legal forms."

'The following is the copy of the application:—

"To his excellency the praefect Flavius Antonius Theodorus from Aurelius Ptolemaeus, son of Horion, of Oxyrhynchus. Everything, it may be said, that is able to withstand the power of the law withstands but for a short time and then submits to the law's correcting vengeance. Pataësis Luluntis and Panechotes of the village of Lile in this nome are oppressing me and occupying my own estates which descended to me by right of inheritance from my grandmother. Knowing your goodness, I beg you to allow Aëtius, ex-magistrate, to be judge in this matter; and let his inquiry concern two points, firstly, whether these estates really belonged to the old lady, and secondly, whether she made any wriften cession of them to these men. In this way their aggression against me will be made clear. For they can produce no written proof of sale by her, nor show that she made any other cession than is implied in the fact that while I lived with her in the city they were in the village and made indefensible encroachments on my estates. If I receive this benefit I shall be eternally grateful to your highness."

'(Signed) I, Aurelius Ptolemaeus, have presented this application.

'We, Aurelius Pataësis and Aurelius Panechotes, have seen the above on this fifth day of Pharmouthi. I, Aurelius Ammonius, son of Horion, signed for them, as they were unable to write.'

2. προπολιτευομέν φ : it is not clear whether προ- refers to time or to station. In the first case the word would appear to repeat the idea expressed by ἄρξ(αντί); in the second it is a special title.

LXVIII. DENIAL OF A MONEY CLAIM.

18·2 × 9·2 cm. A.D. 131.

Memorandum addressed by a person, whose name is lost, to a high official, probably the epistrategus, disputing a claim brought by Theon, son of Pausiris, against the writer's son Sarapion for payment of certain moneys from the estate of Sarapion's maternal grandfather, which had been bequeathed to Sarapion and his uncle Dionysius.

'Since Theon, son of Pausiris, has through the strategus of the nome served me with a copy of a memorandum which he has wrongfully executed in the record office, and by the terms of which he claimed payment for old debts alleged to be owing to him from Sarapion

the maternal grandfather of my son Sarapion, who is under age, and the elder Sarapion's brother Dionysius, I make the requisite counter-statement, as follows. I suspect that the security set up by Theon for the loan has become void owing to lapse of time and because Sarapion lived on for two years after the loan was concluded, and after his death his daughter Eubulia, who became my wife and the mother of Sarapion the minor, likewise lived on for eleven years, and since her death another five years elapsed without Theon having dared to bring forward his claim. Moreover Eubulia in her lifetime sold to Dionysius, the aforesaid brother of the elder Sarapion, property which had belonged to Sarapion for the sum of six talents of silver with the further stipulation that Dionysius should repay Sarapion's creditors the debts owed to them; and though Theon was Sarapion's creditor for other sums, he has received from Dionysius payment for these claims without making any reference to the claim which he now brings forward. I therefore beg you to give instructions that a letter be sent to the strategus of the Oxyrhynchite nome requesting him to serve Theon with a copy of this memorandum, that he may know that the writ which he unjustifiably served upon me has been invalidated, together with any additions I may make if he presents counter-statements; judgement against him being entered in my favour on those points on which it ought to be so entered, since I am ready to abide by the present memorandum, as is right (?).

24. καὶ πρός might perhaps be connected with $\tilde{\epsilon}\xi$, 'six talents and upwards.'

33. The διαστολικόν is the ὑπόμνημα of 5; cf. also 30 τοῦδε τοῦ ὑπομνήματος with 36 τῆδε τῆ διαστολῆ. It is not clear whether the distinction is more than verbal.

34, 35. The meaning of these two lines is obscure; the participle οὖσαν as it stands has no construction, and ought to be either the infinitive εἶναι or in the genitive absolute. In the latter case the δέ might imply, 'but if he does not make any answer.'

LXIX. COMPLAINT OF A ROBBERY.

"... they broke down a door that led into the public street and had been blocked up with bricks, probably using a log of wood as a battering-ram. They then entered the house and contented themselves with taking from what was stored there to artabae of barley, which they carried off by the same way. We guessed that this was removed piecemeal by the said door from the marks of a rope dragged along in that direction, and pointed out this fact to the chief of the police of the village and to the other officials. I am therefore obliged to put in this petition, and beg you to order that the chief of the police and the other officials be brought before you, and to make due inquiry about the robbery, so that I may be able to recover the barley."

9. αὐτήν: probably the wife of Nechthenibis; the theft was apparently committed during his absence.

'To Aurelius Herapion, most high epistrategus, from Ptolemaeus also called Heraclides, ex-agoranomus, councillor of Oxyrhynchus. Every valid written contract is credited and accepted. Agathodaemon also called Enthesmus owes me by a bond executed in his own hand in the 15th year, Pharmouthi, and placed in the archives, three thousand drachmae of silver, lent at the interest of four obols and upon the other conditions contained in the bond, which is valid. It happened that a balancing of accounts took place between us in the past 20th year on Mesore 5 when Colonianus was epistrategus, with reference to another transaction and to the bond aforesaid . . .'

9. The sum on which the four obols are the interest is no doubt the mina, the ordinary unit in computing interest. The rate is thus 8 per cent. a year, which is less than the ordinary rate in the Roman period, 12 per cent. Cf. B. G. U. 272. 6, 301. 8.

LXXI. Two Petitions to the Praefect.

26 × 54.8 cm. A.D. 303.

Two petitions with a fragment of a third, addressed to Clodius Culcianus, praefect. The first is written by Aurelius Demetrius, complaining of the

conduct of Aurelius Sotas, who refused to pay back a loan, and appealing for the praefect's assistance in recovering the money on the ground of the financial straits to which he was reduced. The second petition is from a widow, Aurelia, who in the absence of her sons on foreign service had entrusted the management of her property to two dishonest overseers. The latter part of this document is obscure owing to the lacunae.

On the *verso* of the papyrus are three columns containing a list of buildings with measurements.

'To his excellency Clodius Culcianus, praefect of Egypt, from Aurelius Demetrius, son of Nilus, late chief priest at Arsinoe. Knowing your care for honest citizens, my lord praefect, I make my petition to you with full confidence that I shall obtain justice from your highness. In the 17th = the 16th = the 9th year of this auspicious reign Aurelius . Sotas, ex-gymnasiarch of Arsinoe, acknowledged in two bonds the receipt of a fully secured deposit from me, the first bond, which was made in the month of Tybi, being for two talents of silver; the second, which was made in Phamenoth, for twenty talents of silver. These sums he, by the terms of the aforesaid contracts, undertook to repay without an action at law or any delay or quibble. When therefore I asked him for the money while Heron was strategus, he attempted, owing to my being illiterate, to commit a fraud to my detriment. When he was detected in this and was in danger of being prosecuted before your highness, he entreated to be allowed to settle his debts without the trouble of an action. Up to the present moment he is still putting off the payment, taking a mean advantage of my forbearance, while I am in debt to the most sacred treasury not only on account of the deficit in connexion with the duty which I have performed as superintendent of the corn-supply, but also in connexion with both my private estate and the municipal post which I undertook, and I have no other resources than this money in question. On all these counts therefore I beg and entreat you to instruct, if you will, the strategus or any other magistrate whom you may sanction, that Sotas shall be compelled by seizure of the securities provided in his written bonds now at length to make repayment, or that, if he is recalcitrant, he shall be summoned before your highness to answer for his previous fraud also. So I shall be enabled to recover my property and acknowledge my gratitude to your excellency. Farewell. I, Aurelius Demetrius presented this petition. The 19th = 18th year, Phamenoth 4.

'To his excellency Clodius Culcianus, praefect of Egypt, from the most noble Aurelia..., an inhabitant of Arsinoe. You extend help to all, my lord praefect, and you render to all their due, but especially to women on account of their natural weakness. Therefore I myself make petition to your highness in the full confidence that I shall obtain assistance from you. Having large estates in the Arsinoite nome, and paying a considerable sum in taxes (I refer to payments for public purposes and supplies for the soldiers), and being a defenceless widow woman, for my sons are in the army and absent upon foreign service, I engaged as my assistant and business-manager first one Secundus

and subsequently Tyrannus besides, thinking that they would preserve my good name. But they behaved dishonestly and robbed me . . .'

LXXII. PROPERTY RETURN.

40.8 × 9.6 cm. A.D. 90.

Return of property $(\partial \pi \sigma \gamma \rho a \phi \dot{\eta})$ addressed to the keepers of the archives by Zoilus, reporting on behalf of Marcus Porcius, who was away, the purchase of a piece of land. There is a duplicate copy of the $\partial \pi \sigma \gamma \rho a \phi \dot{\eta}$ (lxxii A), written in a different hand, but the signatures in both documents are by the same person.

LXXIII. REGISTRATION OF A SLAVE.

22.7 × 7.1 cm. A. D. 94.

The following papyrus is like the last an $\partial \pi \sigma \gamma \rho \alpha \phi \dot{\eta}$, but is concerned with a slave. Instead of being in the form of a letter addressed to an official, it is written in the style of a contract made in the presence of the agoranomi. In it Thamounion, daughter of Adrastus, with her husband Dionysius as $\kappa \dot{\nu} \rho \iota \sigma s$, registers as her property a slave whom she had declared to belong to her in a previously written $\dot{\nu}\pi \dot{\sigma}\mu\nu\eta\mu\alpha$. Her ownership of the slave seems to have been also guaranteed by a contract written six years previously, the mention of which (30–35) was added after the document had been finished.

LXXVIII. CORRECTION OF THE OFFICIAL TAXING LISTS. 23.3×6.8 cm. Third century.

This papyrus contains two documents which are written in different hands and have no certain connexion with each other. The first is apparently an extract from an official taxing list containing amounts of land belonging to Apolinaria, partly her individual property, partly held jointly by her with others. The second document is an abstract or copy, probably made in the record-office, of a letter from Aurelius Sarapas calling attention to the fact that a piece of land (?) which he had recently bought and registered in the usual manner was still reckoned in the official taxing lists as belonging to its previous owner, a woman whose name is not given but who may have been the Apolinaria mentioned in the first document. The copy of Sarapas' letter stops at the point when it was about to give a detailed description of the property in question, and does not seem to have been finished.

11 sqq. 'From Aurelius Sarapas. Having lately bought from some one the hereinafter described land (?), and having registered it in accordance with the command of his

excellency Marcellus and the most high Sallustarius, I find in the taxing list which has just been issued that this land is still entered in the name of the previous holder. Therefore, to prevent the appearance of my having taken advantage of the tax-collector's ignorance, I send you this memorandum in order that you may . . . tell him what steps ought to be taken to rectify the error.'

13. The abbreviation sides perhaps be resolved as $\tau(o\hat{v})$, the name being omitted.

The document is clearly either a rough draft or an abstract; cf. the omission of the

offices held by Marcellus and Sallustarius in 15 and 16.

14. διασημοτάτου Μαρκέλλου: διασημότατος (perfectissimus) is the epithet of the praefect in the later empire, cf. lxxi. I. 1, lxxxvii. 9; κράτιστος is that of the dioecetes, cf. lxi. 15. Judging by the handwriting however the papyrus can hardly be later than the beginning of Diocletian's reign.

LXXIX. NOTIFICATION OF DEATH. MORAL PRECEPTS.

The recto of this papyrus contains a declaration addressed to the village scribe by Cephalas, stating that his son Panechotes had died.

'To Julius, village-scribe of Sesphtha, from Cephalas, son of Leontas and Ploutarche, of the same village of Sesphtha. My son who is here indicated, Panechotes, son of Cephalas, son of Leontas, his mother being Herais, of the same village of Sesphtha, died childless in Athyr of the present year. I therefore send this announcement and ask that his name be entered in the list of the dead, as is fitting, and I swear by the Emperor Caesar Marcus Aurelius Commodus Antoninus Augustus that the above statements are correct.'

On the verso of the papyrus are thirteen much corrected lines in a rude hand, which begin with moral advice to do nothing ignoble, and proceed to refer in a mysterious manner to the death and burial of some one. The

document is not like a private letter; perhaps it is a school composition (cf. cxxiv), in which case Alexander in line I is probably Alexander the Great.

LXXXIII. DECLARATION BY AN EGG-SELLER.

 26.2×9.6 cm. A.D. 327.

Declaration on oath addressed to the logistes by Aurelius Nilus, an egg-seller, by which he binds himself to sell eggs only in the public market.

There is a duplicate copy of this papyrus, which is less complete and is written in a different hand except the signature, which is by the second hand of lxxiii. The dating in both documents is by the consuls, but in lxxiii their names are lost. In the duplicate copy however the ends of two lines containing their names are preserved, $]\iota ov \mid$ and $]v \; Ma\xi (\mu ov)$; and this taken in conjunction with the handwriting which is of the early fourth century, and the fact that there was at the time one Augustus and more than one Caesar (v. 6-7), points to the year of the consulship of Constantius and Maximus, 327, as the date of the papyrus.

LXXXV. DECLARATIONS BY GUILDS OF WORKMEN.

23.5 × 22 cm. A.D. 338.

Part of a series of declarations addressed by various guilds of workmen to the logistes, Flavius Eusebius, stating the value (at their own assessment) of the goods in stock at the end of the month. In all, parts of six declarations are preserved on two pieces of papyrus which do not join. The formula is the same throughout. We give transcripts below of the second, which is from the coppersmiths, and fourth, which is from the beer-sellers. Of the first declaration only a few letters at the ends of lines are left. The third is practically complete, and is a declaration from the bakers $(\mathring{a}\rho\tau\sigma\kappa\acute{a}\pi\sigma\iota)$, who return their stock as $\sigma\acute{\iota}\tau\sigma\upsilon$ $\mu\acute{\epsilon}\tau\rho\varphi$ $\delta\epsilon\kappa\acute{a}\tau\varphi$ $(\mathring{a}\rho\tau\acute{a}\beta\iota\iota)$ $\mathring{a}\tau a\lambda($) $\kappa\delta$. For the 'tenth measure' cf. note on ix verso 8; G. P. II. lvii. 17 $\mu\acute{\epsilon}\tau\rho\varphi$ $\mathring{o}\gamma\delta\acute{o}\varphi$ $\theta\eta\sigma\alpha\upsilon\rhoο\hat{\upsilon}$ $\tau\mathring{\eta}s$ $\kappa\acute{\omega}\mu\eta s$; and Corp. Pap. Raineri xxxviii. 19 $\mu\acute{\epsilon}\tau\rho\varphi$ $\mathring{\epsilon}\kappa\tau\varphi$.

The fifth and sixth declarations, of which only the beginnings are preserved, are from the oil-sellers ($\hat{\epsilon}\lambda\alpha\iota\sigma\pi\hat{\omega}\lambda\alpha\iota$) and bee-keepers ($\mu\epsilon\lambda\iota\sigma\sigma\sigma\nu\rho\gamma\iota$).

LXXXVI. COMPLAINT OF A PILOT.

25·3 × 10 cm. A. D. 338.

Letter addressed to Flavius Eusebius (cf. the preceding papyrus) on behalf of Aurelius Papnouthis, steersman of a public boat, by his wife Helena, complaining that a certain Eustochius, who had been requested by Papnouthis to provide a sailor for the boat, refused to do so. On this λειτουργία of providing crews for state vessels cf. G. P. II. lxxx-lxxxiii, a series of docu-

ments, dating from the beginning of the fifth century, concerning Aurelius Senouthes, who was burdened with the hereditary $\lambda \epsilon \iota \tau o \nu \rho \gamma \iota a$ of either serving as a rower in the galley of the governor of the Thebaid, or of paying for a substitute.

10. The province of Augustamnica was created early in the fourth century and consisted of the eastern part of the Delta; cf. Ammian. Marcell. xxii. 16. 1. By a curious coincidence the earliest mention hitherto of the name occurs in Cod. Theod. XII. Tit. I. xxxiv, a constitutio addressed in the same year 342, a month later than the papyrus, ad Auxentium praesid. Augustamnicae, who must be identical with the 'Flavius Julius Ausonius' of line 11.

'Chosion, son of Sarapion, son of Harpocration, his mother being Sarapias, of Oxyrhynchus, to Tanenteris, daughter of Thonis, son of Thonis, her mother being Zoilous, of the same city, with her guardian Demetrius, son of Horion and Arsinoe, of the same city, greeting. I acknowledge the receipt from you through Heliodorus and his associate overseers of the bank at the Serapeum near the city of Oxyrhynchus, for which Epimachus made the promise of payment, of four hundred drachmae in imperial coin for wages, oil, clothes and all other expenses during the two years in which my slave Sarapias nursed your daughter Helena, known as her father's child; who when you took her back had been weaned and had received every attention; and I acknowledge that I neither have nor shall have any complaint or charge to make against you either in connexion with this transaction or any other matter whatever up to the present time. This receipt is valid.'

17. χρηματίζουσαν έξ οὖ: possibly ην has dropped out before ην. The meaning in any case seems to be that the writer of the contract did not know who the father was.

XCII. ORDER FOR PAYMENT OF WINE.

6.2 × 25.2 cm. A. D. 335 (?)

Order from Aphthonius to Ofellius to pay ten jars of new wine 'for the service of the landowner's house,' and one jar to Amethystus (?) a veterinary surgeon. The chief interest of the papyrus, which belongs to the middle of the fourth century, lies in the date, which is apparently calculated by the years of the Emperor Constantine and Constantius Caesar, there being no reference to the years of Constantinus Caesar. But the reading of the date is not certain; in line $4 \lambda \epsilon$ may be read instead of λa , and what we have taken to be $\delta \iota$ might be $\delta \varsigma$ (i. e. $\delta \epsilon \tau ovs$). In that case the thirty-fifth and fourth years would be dates by the two eras starting from 324 and 355 A.D. which are frequently found in the Oxyrhynchus papyri; cf. xciii. 4 and introd. to cxxv. But then the 'thirteenth year' must be explained as a third era in use at Oxyrhynchus

starting from 347; and in the absence of further evidence this does not seem likely.

5.8 × 15.8 cm. A.D. 362.

Order, addressed by Eutrygius to Dioscorus, his assistant, requesting him to pay two artabae of corn to Gorgonius the 'hydraulic-organ player.' The papyrus is dated by the two eras starting from 324 and 355 A.D., which are commonly found in the Byzantine papyri from Oxyrhynchus; cf. introd. to cxxv.

XCIV. AGREEMENT FOR SALE OF SLAVES.

36.5 × 10.5 cm. A.D. 83.

Agreement between Marcus Antonius Ptolemaeus and Dionysius, son of Theon, by the terms of which Dionysius undertakes to put up for sale two slaves belonging to Ptolemaeus, Diogas, also called Nilus, aged forty years, and another Diogas, aged thirty years; and to pay over the price received for one or both of them (12. $\eta \tau \sigma \iota \psi \dot{\psi} \dot{\psi} \dot{\psi} \dot{\eta} \kappa a \theta' \dot{\epsilon} \nu a$, cf. 16–17) to Ptolemaeus. The papyrus is written in the fine semi-uncial hand which characterizes so many of the first century papyri from Oxyrhynchus. A few alterations have been made in a more cursive hand.

'The 13th year of the Emperor Caesar Trajanus Hadrianus Augustus, Payni 29, at Oxyrhynchus in the Thebaid. Agathodaemon also called Dionysius, son of Dionysius, son of Dionysius, his mother being Hermione, of Oxyrhynchus, agrees with Gaius Julius Germanus, son of Gaius Julius Domitianus, (the agreement being executed in the street) that he hereby assents to the autograph contract, made on Tybi 25 of the present 13th year, for the sale to Julius Germanus of a slave named Dioscorous, about 25 years old, with no distinguishing marks, which slave was his by purchase, having previously belonged to Heraclides also called Theon, son of Machon, son of Sosicosmius also called Althaeeus. This slave Julius Germanus then took from him just as she was, free from blemish except epilepsy and marks of punishment (?), at the price of 1200 drachmae of silver, which sum Agathodaemon also called Dionysius thereupon received from Julius Germanus in full together with the autograph contract. In consequence of this contract Julius Germanus paid the tax upon the sale of the said slave Dioscorous on Phamenoth 3 of the same year, in accordance with the receipt issued to him. Agathodaemon also called Dionysius is the guarantor of the said slave Dioscorous in all respects, as the autograph contract states. If the terms of it should be broken or it in any other way be rendered invalid, Julius Germanus has the right to demand . . .

XCVI. PAYMENT OF TAX ON SALES.

25.5 × 8 cm. A.D. 180.

Order addressed to the public bank of Oxyrhynchus by Diogenes, an official concerned with the tax upon sales, authorizing the bank to receive 52 drachmae, the tax (probably 10 per cent. of the price, cf. introd. to xcix) payable by Chaeremonis on the purchase of a slave.

XCVII. APPOINTMENT OF A REPRESENTATIVE.

 $15 \times 11.6 \ cm$. A. D. 115-6.

Agreement between two brothers, Diogenes and Nicanor, concerning a journey to be undertaken by the latter. The brothers had been engaged in a lawsuit with Menestheus, son of Horus, about the ownership of a slave called Thaisous or Thaësis, whom they claimed as part of an inheritance from their mother. The case had come before the strategus of the nome, Apollonius, who referred it to the praefect, Rutilius Lupus. The papyrus is an agreement signed by the two brothers, to the effect that Nicanor, the younger, should attend the praefect's court and have full power to act as his brother's representative.

The papyrus is joined to another document which is much mutilated but preserves the date, the nineteenth year of Trajan. The present text evidently belongs to the same year, since Rutilius Lupus, who is mentioned in 1. 16, is known from C. I. G. 4948 to have been praefect in the eighteenth and nineteenth years of that Emperor.

I acknowledge the receipt from you, through the bank of Heraclides and his partners at the Serapeum near the city of Oxyrhynchus, of a hundred and sixty-eight drachmae of silver, being the balance owing to me from you of the seven hundred drachmae of silver which I lent you by the terms of a contract executed through the bank in the month of Athyr in the twenty-second year of the deified Hadrian which is the first year of our sovereign Antoninus Caesar, the payment of the sum covering 50 months dating from the month Hadrianus of that same year at the rate of 15 drachmae each month. The present payment follows upon the instalment of the seven hundred drachmae, namely five hundred and thirty-two drachmae, which I previously received from you as I acknowledged in the written receipt which I gave you through the said bank in the month of Athyr of the past fourth year '

16–17. Fifty payments of 15 drachmae make 750 drachmae; it is not clear what is the relation of this number to the 700 drachmae mentioned in 15, nor why the singular καταβολ̂η is used instead of the plural.

XCIX. SALE OF HOUSE PROPERTY.

23 × 44 cm. A. D. 55.

Sale of half a house by Pnepheros, son of Papontos, to Tryphon, son of Dionysius (cf. xxxviii, xxxix), in the second year of Nero, for 32 talents of copper. At the end is a docket showing that the tax on the sale had been paid to the bank of Sarapion, and resembling the dockets of the royal bank found on Ptolemaic contracts. The amount of the tax $(\tau \hat{o} \ \hat{e} \gamma \kappa \hat{\nu} \kappa \lambda \iota o \nu)$, cf. xcv and xcvi) was 3 talents 1200 drachmae, i.e. a tenth of the price, the same proportion as that under the later Ptolemies, in addition to a further charge, the nature of which is obscure.

'Copy. The second year of Nero Claudius Caesar Augustus Germanicus Imperator, on the 6th of the month Audnaeus=Sebastus, at Oxyrhynchus in the Thebaid, before the agoranomi Andromachus and Diogenes. Tryphon, son of Dionysius, about . . years old, of middle height, fair, with a long face and a slight squint, and having a scar on his right wrist, has bought from his mother Thamounis' cousin, Pnepheros, son of Papontos, also an inhabitant of Oxyrhynchus, about 65 years old, of middle height, fair, having a long face and a scar above his . . . eyebrow and another on his right knee, (the document being drawn up in the street) one half of a three-storied house inherited from his mother, together with all its entrances and exits and appurtenances, situated by the Serapeum at Oxyrhynchus in the southern part of the street called Temgenouthis to the west of the lane leading to "Shepherds' Street," its boundaries being, on the south and east, public roads, on the north, the house of the aforesaid Thamounis, mother of Tryphon the buyer, on the west, the house of Tausiris, sister of Pnepheros the seller, separated by a blind alley, for the sum of 32 talents of copper; and Pnepheros undertakes to guarantee the half share which is sold perpetually in every respect with every guarantee.'

C. SALE OF LAND.

27.3 × 15.8 cm. A. D. 133.

Declaration on oath addressed to the agoranomi by Marcus Antonius Dius, announcing the sale of four plots of ground in the Cretan and Jewish quarter of Oxyrhynchus to three parties jointly, Adrastus, son of Chaeremon, Tanabateius also called Althaeeus, and Dionysius, son of Horus, with his two brothers, for 2200 drachmae, and declaring the land to be free from mortgage.

Dionysia, daughter of Chaeremon, with her guardian who is her son Apion also called Dionysius, son of Diogenes, both of Oxyrhynchus, has leased to Psenamounis, son of Thonis and Seoëris, from Paberke in the eastern toparchy, a Persian of the Epigone, for six years dating from the present sixth year of our sovereign Antoninus Caesar, 38 arourae belonging to her and previously cultivated by Psenamounis under another lease, on these conditions. For the first five years fixed by the agreement the lessee may sow and gather whatever crops he chooses with the exception of woad and coriander(?); in the last year he shall sow and gather the same crops as those appointed for him in the last year of the previous lease. The rent of the whole leasehold during the six years is fixed at 190 artabae of wheat a year and a money-payment of 12 drachmae a year, which shall all be free of every risk, the land-tax being paid by the lessor, who shall also be the owner of the crops until the rent is paid. If in-any of the years there should be a failure of water, an allowance shall be made to the lessee. He shall also, when the lease is guaranteed to him, measure into the public granary from the amount fixed as the rent for the year the yearly corn tax on the buildings, at his own expense, and he shall pay this deposit to the lessor free of all adulteration every year at the time of the first measuring, an equivalent allowance being made to him. The remainder of the yearly rent together with the money-payment he shall always pay to the lessor in the month of Payni at the granary of Paberke, new, clean, unadulterated, sifted wheat, with no barley in it, similar to that which is delivered at the public granary, measured by the bronze-rimmed measure containing four choenices used for payments to the lessor or her agents. Any arrears owed by the lessee shall be paid with the addition of half their amount. The lessor shall have the right of execution upon both the person and all the property of the lessee, and the lessor shall not be permitted to let the property to any one else or to cultivate it herself within the six years. This lease is valid. The sixth year of the Emperor Caesar Titus Aelius Hadrianus Antoninus Augustus Pius, Phaophi 5.

I, Psenamounis, son of Thonis, have taken the land on lease for the six years at a yearly rental of 190 artabae of wheat and a money-payment of 12 drachmae, and I will make all the payments aforesaid. I, Theon, son of Theon and Ophelia, signed for him, as he is

illiterate, on the same date.

5. Πέρση τῆς ἐπιγονῆς: i.e. a descendant of a Persian settler who had married an Egyptian-wife.

27-34. The sense of this passage is that the lessee was to pay the taxes on the land on behalf of the landlord who was to make an equivalent deduction from the rent.

40. μέτρω τετραχοινίκω: υ. note on ix. verso 8.

CII. LEASE OF LAND.

25 × 14 cm. A. D. 306.

Lease of nine arourae near the village of Sestoplelo in the middle toparchy by Aurelia Antiochia to Aurelius Dioscorus for one year. The land was to be sown with flax, and the rent was I talent 3,500 drachmae for each aroura. Of the total rent the lessor acknowledges the receipt of 4 talents, while the balance was to be paid in the following Epeiph, after the harvest.

The papyrus is dated in two ways, first (1-2) by the consuls, the Augusti Constantius and Maximianus (Galerius) for the sixth time, and secondly (21-23) by the regnal year of the Augusti and Caesars. It is noteworthy that though the papyrus was written on Oct. 3, 306, and Constantius, who had died in Gaul, had been succeeded by his son Constantine on July 25, 306, Constantius is spoken of as being in his fifteenth year, to which he of course never attained. The explanation probably is that the scribe was still in ignorance of Constantius' death; cf. introd. to cxxxv, and G. P. I. lxxviii dated in Phamenoth (Feb.-March) of 306-7, in which the date is correctly given as the fifteenth year (of Galerius) = the third (of Severus and Maximinus) = the second (of Constantine).

CIII. LEASE OF LAND.

26 × 16 cm. A.D. 316.

Lease of an aroura of land near the village of Isionpanga by Aurelius Themistocles, gymnasiarch and prytanis of Oxyrhynchus, to Aurelius Leonidas and Aurelius Dioscorus, for one year. The land was to be sown with flax, and the crop was to be divided equally between landlord and tenant.

The papyrus is dated Phaophi 16 (Oct. 13) in the consulship of Sabinus and Rufinus (316), and incidentally mentions in 6 the current twelfth = ninth year (the reading ιβ is fairly certain, though the letters are mutilated). The twelfth year is that of Constantine, who is known to have begun his second year on Aug. 29, 306 (Pap. de Genève I. 10; v. Mommsen Hermes xxxii. pp. 545–7), and the ninth year must be that of Licinius whose second year accordingly dates from Aug. 29, 309. His elevation to the position of Augustus must therefore have taken place after Aug. 28, 308. This is an inference of much importance, since the year in which Licinius became Augustus has long been a vexed question, some ancient authorities placing it in 307, others in 308; cf. Mommsen l. c. p. 543; the arguments there brought forward in favour of 308 are confirmed by this papyrus.

CIV. WILL.

17 × 16.3 cm. A. D. 96.

Will of Soëris, daughter of Harpocras, executed in the sixteenth year of Domitian. After the customary introduction the testatrix bequeaths to her

son Areotes or his heirs her house and all its appurtenances, on condition that her husband Atreus should have the right to live in it, and receive from Areotes 48 drachmae a year until the payments reached the total of 300 drachmae, this being the balance of 600 drachmae owed by the testatrix to Atreus. On the death of Atreus Areotes was to pay 40 drachmae to his sister Tnepheros, who also has a dwelling-place appointed for her in the event of a separation from her husband.

'The .. year of the Emperor Trajanus Hadrianus Augustus, Tybi 13, at Oxy-

rhynchus in the Thebaid; for good luck.

This is the will, made in the street, of Pekusis, son of Hermes and Didyme, daughter of Philotas, an inhabitant of Oxyrhynchus, being sane and in his right mind. So long as I survive, I am to have power over my property, to and to alter my will. But if I die with this will unchanged, I leave my daughter Ammonous whose mother is Ptolema, if she survive me, but if not, then her children, heir to my shares in the common house, court and rooms situated in the Cretan quarter. All the furniture, movables and household stock and other property whatsoever that I shall leave, I bequeath to the mother of my children and my wife, Ptolema, the freedwoman of Demetrius, son of Hermippus, with the condition that she shall have for her lifetime the right of using, dwelling in, and building in the said house, court and rooms. If Ammonous should die without children and intestate, the share of the fixtures shall belong to her half-brother on the mother's side, Antas, if he survive, but if not, to No one shall violate the terms of this my will under pain of paying to my daughter and heir Ammonous a fine of 1000 drachmae and (to the treasury an equal sum?)' There follow the signatures of the testator and witnesses.

14. σφραγὶς Διονύσου: a seal with a representation of Dionysus, cf. 15 and 18 where Sarapis and Harpocrates occur; for the latter cf. B. G. U. 463. The other seals are obscure, as is ἐπὶ κιβωρτωι in 18, which seems to be a mistake for κιβωτῷ οτ κιβωρίῳ.

CVI. REVOCATION OF A WILL.

30.5 × 8.1 cm. A.D. 135.

Letter addressed to the agonaromi by Apollonius, one of their assistants, stating that in accordance with the instructions of the strategus he had given back to Ptolema the will which she had made thirty years previously and deposited in the archives, and which she now wished to revoke.

'To the agoranomi of Oxyrhynchus from Apollonius, son of Ptolemaeus, assistant. I beg to inform you that the strategus of the nome, Demetrius, instructed me to give up to Ptolema, daughter of Straton and Dionysia, of Oxyrhynchus, the will which you drew up for her in Mecheir of the 9th year of the deified Trajan under seals, in compliance with her own request; and that she has accordingly received back the will through me. The 19th year of the Emperor Caesar Trajanus Hadrianus Augustus, Pharmouthi 25.
I, Ptolema, daughter of Straton, have received my aforesaid will with the seals intact.

I. Pedon, son of Callicornus, have been registered as her guardian, and signed for her as

she was unable to write, at the same date.'

13. τοῦτο refers to the giving back, not to the making of the will.

3. akpa might be tails, ears, or any other extremities. But as they are generally provided in pairs like kidneys, they are here probably 'trotters.'

CX. INVITATION TO DINNER.

 4.4×6.3 cm. Second century.

Formal invitation from Chaeremon to a person whose name is not mentioned to a dinner at the Serapeum.

4. $\omega_{Pas} \bar{\theta}$: early in the afternoon, but in the absence of the month it is impossible to fix the hour. It seems to have been the fashionable time, cf. cxi. 4.

CXI. INVITATION TO A WEDDING FEAST.

Formal invitation to a dinner in celebration of a marriage. As in the preceding example, the name of the guest invited is not given.

'Corbolon to Heraclides, greeting. I send you the key by Horion and the piece of the lock by Onnophris, the camel-driver of Apollonius. I enclosed in the former packet a pattern of white-violet colour. I beg you to be good enough to match it and buy me two drachmas' weight, and send it to me at once by any messenger you can find, for the tunic is to be woven immediately. I received everything you told me to expect by Onnophris safely. I send you by the same Onnophris six quarts of good apples. I thank all the gods to think that I came upon Plution in the Oxyrhynchite nome. Do not think that I took no trouble about the key. The reason is that the smith is a long way from us. I wonder that you did not see your way to let me have what I asked you to send by Corbolon, especially when I wanted it for a festival. I beg you to buy me a silver seal and to send it me with all speed. Take care that Onnophris buys me what Irene's mother told him. I told him that Syntrophus said that nothing more should be given to Amarantus on my account. Let me know what you have given him that I may settle accounts with him. Otherwise I and my son will come for this purpose. I had the large cheeses from Corbolon. I did not however want large ones, but small. Let me know of anything that

you want and I will gladly do it. Farewell. Payni the 1st. (PS.) Send me an obol's worth of cake for my nephew.'

12. τοῦ αὐτοῦ, which should follow διά, has been inserted in the margin; cf. 13, 14. 26. μήτ(ηρ) Εἰρήνης, added above the line, was apparently intended to follow εἴρηκεν.

31. κοπτῶν: cf. Hesych. κοπτά, μελίπηκτα.

CXIV. LETTER CONCERNING PROPERTY IN PAWN.

 11.4×16.5 cm. Second or third century.

Latter part of a letter from Eunoea giving instructions to a friend to redeem a number of articles, chiefly of dress (cf. cix), which had been pawned. Several of the terms are new and the meaning of them is generally obscure.

of incense-wood, and another of onyx, a tunic, a white veil with a real purple (border?), a handkerchief, a tunic with a Laconian stripe, a garment of purple linen, 2 armlets, a necklace, a coverlet, a figure of Aphrodite, a cup, a big tin flask and a wine-jar. From Onetor get the 2 bracelets. They have been pledged since Tybi of last year for eight . . . at the rate of a stater per mina. If the cash is insufficient owing to the carelessness of Theagenis, if, I say, it is insufficient, sell the bracelets to make up the money. Many salutations to Aia and Eutychia and Alexandra. Xanthilla salutes Aia and all her friends. I pray for your health.'

1. μακαλας: perhaps for μαλακάς, μεγάλας, or μακέλλας.

2, παρά Σαραπίωνα; here and in 10 the accusative is used in place of the genitive. 4. The interest is 4 per cent., presumably for a month, a very exorbitant rate.

5. δερματικομαφόρτιν: μαφόρτιον, or μαφόρτης as it is called in cix. 18, is explained by old glossaries as a veil or hood of some kind. δερματικο- ought perhaps to be altered to δελματικο-; cf. cix, 24. But how can any kind of μαφόρτιον be of incense-wood and onyx?

7. φακιάριον or φακιόλιον=faciale, v. Ducange s.v.

λακωνόσημον: the word is clearly formed on the analogy of πλατύσημον, cf. cix. 10.

11. κλάλια: probably for κλάρια, a form found occasionally instead of κλάνια. χέρας is a puzzle, as the name of a coin would be expected; cf. 3.

'Irene to Taonnophris and Philo. I have given to Calocaerus for Dionysius 340 drachmae, as he wrote to me to give him whatever he wanted. So please give this money to our workman Parammon, and if he requires anything further give him whatever he wants and send him off quickly. I send you by Calocaerus in my portmanteau a measure of dates from Ombos and twenty-five pomegranates, under seal. Please send me back in it two drachmas' weight of purgative, of which I am in urgent need. I send you by the said Calocaerus a box of grapes . . . and a basket of good dates under seal. Farewell. CXVII. LETTER.

 17.7×16.3 cm. Second or third century.

Letter from Chaereas to his brother Dionysius, giving directions about some business transactions, and telling him to expect some melon seeds and pieces of cloth.

The writer styles himself in the address on the *verso* $\lambda \iota \mu \nu \iota^{\alpha} \rho \chi os$, a new title, meaning apparently a 'superintendent of lakes' and the reclaiming of them. Possibly he was employed in the Fayûm, where was the $\lambda \iota \mu \nu \eta$ par excellence, Lake Moeris.

I have already urged you in person to have the horoscope (?) in the archives prepared and also the sale of the slaves' children, and to sell the wine that comes from both the near and the far vineyard, keeping the money in a safe place until I come. I send you some good melon seeds through Diogenes the friend of Chaereas the citizen, and two strips of cloth sealed with my seal, one of which please give to your children. CXVIII verso. LETTER.

 32.9×9.5 cm. Late third century.

Letter from Saras and Eudaemon to Diogenes, containing instructions to have a boat sent for their conveyance, and making other requests.

On the *recto* is part of a late third century account, with four transverse lines, partly effaced, in the hand of the letter on the *verso*, though not forming part of it.

We accordingly send you this message, in order that, if they consent to send while you are there, you may procure what is necessary, and if not, that you may despatch a report to the strategus and the guardians of the peace. You know what hospitality requires, so get a little...from the priests and buy some incense and... We hear that you have been two days at Heracleopolis. Make haste back to look after your charge, when you have obtained what you went for. It is no use if a person comes too late for what required his presence. Ammonas and Dioscorus the cooks have gone to the Oxyrhynchite nome on the understanding that they would return at once. As they are delaying, and might be wanted, please send them off immediately.'

CXIX. A Boy's Letter.

'Hermias to his sister, greeting. What remains to write to you about I do not know, for I have told you of everything till I am tired, and yet you pay no attention. When a man finds himself in adversity he ought to give way and not fight stubbornly against fate. We fail to realize the inferiority and wretchedness to which we are born. Well, so far nothing at all has been done; make it your business to send some one to me, either Gunthus or Ammonius, to stay with me until I know the position of my affairs. Am I to be distracted and oppressed until Heaven takes pity on me? Hermias is anxious to come to you. I requested him to stay, but he refused, saying that he had pressing business and that he must go, and that his son Gennadius was unable to attend to the property, especially as he was a stranger to the place and was engaged at his post. See that matters are properly conducted on your own part, or our disasters will be complete. We are resolved not to continue in misfortune (?). Farewell; I wish you all prosperity.'

Verso.

'Hermias to his son Gunthus, greeting. Unless Ammonius comes to me at once, put off everything or let him do your work and come yourself. Whatever you do, do not fail me in my trouble. Let me know how it was with Didymus. Can time accomplish everything after all? I pray for your health.'

Recto

18. ἀξιώσαs is a nominativus pendens; the writer probably intended to say οὐκ ἔπεισα,

for which, by a conversion of object to subject, he substitutes οὐκ ἐβουλήθη.

23. It seems on the whole easier to suppose ὅντα to be a mistake for ὧν (cf. verso 6 ποιοῦντα) than to connect καὶ . . . ὄντα with what follows, taking παρὰ τῆ τάξει as equivalent to παρὰ τὴν τάξειν.

25, 26. έχειν τι δυστυχοῦντες :? for έχουσίν τι δυστυχείν.

'Isidorus to his brother Aurelius, many greetings. I told you about the two acanthus trees, that they were to give them to us; let them be dug round to-day. Let Phanias himself have them dug round. If he refuses, write to let me know. I shall perhaps come to-morrow for the sealing; so make haste with this in order that I may know. As to the bulls, make them work; don't allow them to be entirely idle. Carry all the branches into the road and have them tied together by threes and dragged along. You will find this of service. Don't make over anything to their masters. I shall perhaps give him nothing.

I am causing them much trouble (?). Don't allow the carpenters to be altogether idle; worry them. I pray for your health.'

21. προσποιήσης perhaps has the sense of the middle 'don't make any pretence.'
23. αὐτῶν are apparently the bulls; but who is αὐτῷ in 24? αὐτοῖς in 25 are probably the κύριοι.

CXXII. LETTER TO A PRAEFECT.

 25.8×18 cm. Late third or fourth century.

Letter to Agenor, praefect (probably of a legion), from Gaianus, whose high rank is indicated by the fact that he places his own name before that of the praefect, and by the familiar tone of his remarks, as well as by the mention of the soldiers under his command. The letter is an apology for not having been able to procure some wild animals which Agenor required—a subject which recalls the correspondence between Cicero and Caelius.

That Gaianus was more accustomed to Latin than Greek is very evident from his handwriting, which is marked by a thoroughly Latin appearance throughout, and by an occasional obtrusion of Latin forms of letters, e.g. m. The use of the rough breathing (cf. critical note) in a cursive document is also remarkable.

I have been much surprised, my son, at not receiving hitherto a letter from you to tell me how you are. Nevertheless, sir, answer me with all speed, for I am quite distressed at having heard nothing from you. Please go to my brother Theodorus and make him look after Timotheus and tell him to get ready for going in to attend. Already the notaries of the other towns have acquainted their colleagues, and they have come in. Let him remember when he enters that he must wear the proper dress, that he may enter prepared. Take care they do not allow us to fail in coming to an understanding with each other (?), as we know that the same rule applies to us all. For the orders which we received were to wear cloaks when we entered. Therefore let Timotheus, when he comes, come prepared to attend. I salute my sweetest daughter Macaria and my Mistress your mother and all the family by name. I pray for your lasting health, my son. Epeiph 23.'

CXXIV. Schoolboy's Exercise. The Story of Adrastus.

 8×13.7 cm. Third century.

A schoolboy's exercise, written on the *verso* of a piece of papyrus containing on the *recto* part of a second or third century account. The exercise on the *verso*, written in large sprawling uncials, is the beginning of a story concerning Adrastus, king of Argos, and his daughters. Cf. the somewhat similar exercise in G. P. II. lxxxiv ¹.

"Αδραστος ὁ τοῦ "Αργους βασιλεὺς

¹ The iambic line which ends that papyrus, ἄ $\langle \gamma \rangle$ ει τὸ θεῖον τοὺς κακοὺς πρὸς τὴν δίκην, is a $\gamma ν \dot{\omega} \mu \eta$ of Menander (ed. Meineke, p. 311).

'Adrastus, king of Argos, married one of his own rank and had two daughters, Deïpyle and Aegialia, who, though not ugly, were unlucky as to marriage; for no suitors offered themselves. Adrastus therefore sent to Delphi and inquired the cause.'

2. γήμας ἐκ τῶν ὁμοίων: the wife of Adrastus was Amphithea, his niece.

3. δύο: the name of a third daughter, Argeia, is recorded.

4. For $\lambda l \gamma \iota \acute{\alpha} \lambda \epsilon \iota a$ (or $\lambda l \gamma \iota \acute{\alpha} \lambda \eta$) cf. Homer, Il. v. 412; some authorities made her the granddaughter of Adrastus (cf. Apollod. i. 8, 6, 3). According to the legends Aegialea consoled herself in after life for the lack of admirers from which, if we may believe the papyrus, she suffered before her marriage.

8. The story was perhaps continued in a second column, but of this no traces remain.

Deipyle subsequently became the wife of Tydeus, and Aegialea of Diomedes.

CXXV. INDEMNITY OF A SURETY.

Gizeh Museum, 10,062. 22 × 24·3 cm. A.D. 560.

Declaration on oath made by Aurelius Pambechis to the chief of the treasury of Oxyrhynchus, ensuring the latter against any loss or annoyance which he might incur by becoming surety for Pambechis on his appointment to succeed to a subordinate official post. Some guarantee, perhaps that of a public officer, was no doubt a condition of the appointment required by law, cf. lxxxii. 8. The object of the law was therefore practically defeated by this private arrangement by which the person giving the necessary security was himself secured by the person to whom it was given against any possible loss. For another and more direct evasion of legal enactments by private contract cf. cxxxvi. 37–39, note.

The papyrus is dated Choiak 17 in the thirty-fourth year of Justinian, the nineteenth year after the consulate of Basil, ninth indiction, i. e. A. D. 560; and in line 9 'the current 237th=206th year' is mentioned. These two eras dating from 324 and 355 respectively, of which an early example was noticed in xciii, occur constantly in the following sixth and seventh century papyri. From a comparison of the different instances it appears that the new year according to the two eras began, like the ordinary Egyptian year, on Thoth 1.

Neither era is known to have been used outside Oxyrhynchus, and it

may therefore be doubted whether the choice of the particular years 324–5 and 355–6 as epochs was due to the occurrence of an event of more than local importance. If, however, we are to look for an explanation outside the history of the town, the era dating from 324–5 may be connected with the Council of Nicaea which took place in that year. But the year 355–6 was marked by no event in general Roman history of sufficient importance to be a natural starting-point of an era.

The Oxyrhynchus scribes of the Byzantine period were, as a rule, more particular in dating their documents than their brethren in the Fayûm. It rarely happens that a business document from Oxyrhynchus fails to have a fixed date, either by the year of the Emperor or by the two eras, while Fayûm papyri are very often dated by the indiction alone. For determining the palaeography of this period there is now an immense store of dated material.

'In the 34th year of the reign of our most godly and pious sovereign Fl. Justinian, eternal Augustus and Imperator, which is the 19th year after the consulship of Fl. Basilius the most illustrious, Choiak the 17th, the 9th indiction. To his worshipful lordship the superintendent of the public treasury-office of this city of Oxyrhynchus, the son of the sainted Abraham of the illustrious city of Oxyrhynchus, from Aurelius Pambechis, son of the sainted Menas and Maxima, whose own signature follows, of the same city, greeting. Whereas I presented an appeal to your worship to become my surety with the most illustrious Apphouas, assistant of the village of Sephtha, if he accepted me as his deputy for one year reckoned from the present month Choiak of the current 237th=the 206th year, and of the present 9th indiction, and whereas your worship did this in accordance with my request, your worship at the same time made the reasonable demand to receive from me a written agreement proper to such an appeal. I have accordingly been con-

strained to enter upon the present appellant's agreement, wherein I agree not to permit your worship to suffer any damage, loss, annoyance, or trouble on my account in this connexion, whether in court or out of court, but on the contrary to guarantee you against annoyance, trouble, loss and damage. But if the contingency which I deprecate should occur, and your worship should suffer loss or annoyance or trouble, or I should permit you to be reminded of your suretyship for me by any person whatsoever, you are to have the power to distrain upon all my property, personal and real, until you have received satisfaction. To all this I swear the oath by Heaven and the Emperor, that I will abide by and observe these conditions and will in no wise break them; and I pledge for the observance of this appellant's agreement my property present and future, whether held by myself or my family.....'

2. There is much confusion with regard to the years of the consulships of Justin;

cf. cxxxiv. 4, cxcv, cxcix, and introd. to cxxxv.

4. μερίδος καὶ οἴκου: οἶκος has here the wide sense which appears in a still more extended form in cxxvii, <math>δ οἶκος 'Οξυρυγχιτῶν, where it is apparently equivalent to πόλις. Cf. cxxxiii. 8, where a village is said to be παγαρχουμένη by the οἶκος of Flavius Apion.

κύρου is probably for κυρίου: cf. cxxv. 3, note.

9. ἐμβολῆς καὶ χρυσικῶν: under these two terms the annual imposts to which John was liable seem to be summed up. The ἐμβολή was a contribution of corn which before the division of the Empire was sent to Rome, and was at this period sent to Constantinople. Some part of it was appropriated to the use of Alexandria. Justinian's Lex de Alexandr. et Aeg. Provinciis (edict. xiii) is chiefly concerned with the regulation of this corn-supply. Cf. Cod. Theodos. lib. xi, and cxii. 11 and cxlii in this volume. Payments for the ἐμβολή were sometimes in money; cf. cxxvii. 2. The χρυσικά are subdivided in 12 and 14 into κανονικά and ἀρκαρικά, the 'regular' payments and the payments to the imperial fiscus. These are made respectively to the ἐθνικός, a term not elsewhere applied to a collector, and to the 'arcarius or embolator'; from which it is to be inferred that the ἐμβολή and ἀρκαρικά were payable to the same official.

10. ἐπινεμήσεωs: 'indiction.' ἐπινέμησις, which is not infrequent in literary writers, is almost as common as ἐνδικτίων in the Oxyrhynchus papyri, the only distinction between them apparently being that ἐπινέμησις is not put in the date at the head of a document. It is remarkable that the term has not been found in Byzantine documents from the Fayûm.

13. χρυσῶν ἢ χρυσοῦ: 'in one or more gold pieces.' The normal νόμισμα or solidus contained twenty-four gold κεράτια, the coinage of this period being on a purely gold basis. But though excluded from accounts, silver must have been used for the smaller divisions of the νόμισμα.

14. δημοσίω ζυγώ: three kinds of ζυγόν or standard are mentioned in these papyri,

δημόσιον, ἰδιωτικόν, and ᾿Αλεξανδρείας. For the relation between them cf. notes on cliv.

15, 16. $22\frac{1}{2}$ κεράτια of pure gold (δβρυζιακά) are to be paid as the equivalent of 24 κεράτια (= 1 νόμισμα) on the 'public' standard (δημοσίφ, sc. ζυγφ̂). The δημόσιον νόμισμα was therefore debased to the extent of $1\frac{1}{2}$ κεράτια. Apparently not much attention was paid to the law of Justinian (edict. xi), which was especially directed against the Egyptian distinction between pure and impure gold, an abuse which it is there stated was of recent growth and for the most part confined to Alexandria; cf. cxliv. 8, note.

33. The word before $a \mid \pi \phi$ does not appear to be $\epsilon \pi \iota \mu \lceil \epsilon \rceil \lambda \lceil \eta(\tau \eta s)$.

1. οἶκ(ος): cf. CXXVi. 4 μερίδος καὶ οἴκου.

καν(κέλλ $\dot{\omega}$): Lat. cancellus; but it is not quite clear what is the meaning of the term as applied to σίτος. That some particular kind of measure was involved is shown by cxxxiii. 17 κανκέλλ $\dot{\omega}$ καὶ παρειλήφαμεν; cf. cxlii. 4. Both the forms σίτος καγκέλλ $\dot{\omega}$ από σίτος καγκέλλου occur; for the variation in case cf. the μέτρον έξαχοίνικον δρόμ $\dot{\omega}$ or δρόμου. An adjective καγκελλάριος is also found, applied to both corn and wine, e.g. B. G. U. 687. 3, 692. 3.

2. διαγράφου τοῦ τηγάνου: the meaning of this expression is very obscure; τήγανου usually means a frying-pan.

We could not however persuade him to listen to our request in any other way than by offering and pledging ourselves to refer his case by letter to your excellency. He insists that he is unable to bear such a strain, and begs to be bidden to come to your excellency's feet in order that you may judge of his present condition. Let your excellency therefore be pleased to write back your wishes, either persuading his worship to stay at his post and do his regular work or ordering him to come to your excellency's feet. In the forefront of this letter we would place our due and fitting obeisance to your excellency.'

15. κομιτοτριβ(οῦνος), if that is right, is a curious title; τριβοῦνος occurs not infrequently in Byzantine papyri, e.g. B. G. U. 303. 4.

CXXIX. REPUDIATION OF A BETROTHAL.

Gizeh Museum, 10,082. 25.7 × 40.8 cm. Sixth century.

Formal notice written by a certain John, breaking off the engagement between his daughter Euphemia and his intended son-in-law, Phoebammon, on account of the latter's misconduct. The signature of the father, in sloping uncials, is placed at the end.

The document is not quite complete at the beginning, though not more than part of the date has been lost; possibly line I is the original first line.

Forasmuch as it has come to my ears that you are giving yourself over to lawless deeds, which are pleasing to neither God nor man, and are not fit to be put into writing, I think it well that the engagement between you and her, my daughter Euphemia, should be dissolved, seeing that, as is aforesaid, I have heard that you are giving yourself over to lawless deeds and that I wish my daughter to lead a peaceful and quiet life. CXXX. PETITION FOR RELIEF.

Gizeh Museum, 10,072. 31.8 x,24 cm. Sixth century.

Letter to Apion, patrician and *dux* of the Thebaid, from Anoup, asking for indulgence in respect of a debt which he declares himself for the present unable to pay.

It is possible that the person here addressed should be identified with the Flavius Apion who occurs so frequently in the Oxyrhynchus papyri from 550-570 (cf. cxxxiii-ix). But Flavius Apion though regularly called patrician, is not elsewhere given the title of dux, which is applied to the Apion of this letter; and the Strategius mentioned in 23 (v. note ad loc.) was more probably the elder brother or the father of Flavius Apion than his son.

'To Apion my kind lord, lover of Christ and the poor, all-esteemed and most magnificent patrician and dux of the Thebaid, from Anoup, your miserable slave upon your estate called Phakra. No injustice or wickedness has ever attached to the glorious house of my kind lord, but it is ever full of mercy and overflowing to supply the needs of others. Therefore I, your miserable slave, desire by this petition for mercy to bring it to your lordship's knowledge that I serve my kind lord as my fathers and forefathers did and pay the taxes every year. But by the will of God in the past 10th and 11th indiction years my cattle died, and I borrowed a considerable sum—amounting to 15 solidi—in order to be able to buy the same number of cattle again. Yet when I approached my kind lord and asked for pity in my straits, the servants of my lord refused to do my kind lord's bidding. For unless your pity extends to me, my lord, I cannot stay on my holding and serve the interests of the estate. But I beseech and urge your lordship to command that mercy should be shown me because of the disaster that has overtaken me. For I have no other refuge than in the Lord Christ and your eminence. And I will send up unceasing hymns to the Lord Christ for the life of your lordship and that of your most magnificent son, my lord Strategius.'

23. Στρατηγίω: this person is perhaps the Flavius Strategius addressed in Gizeh Museum, No. 10,031, under the titles ἀπὸ ὑπάτων στρατηλάτης εὐκλεέστατος πατρίκιος πρωτεύων κατά τε τὴν Ἡρακλέους καὶ κατὰ ταύτην τὴν λαμπρὰν Ὁξ. πόλιν. The document, which is dated in the year 535, is an acknowledgement of the receipt through a μυλοκόπος of a basket (κάλαθος) required for a mill (μυλαῖον) belonging to Strategius; and it follows precisely the formula used in the similar receipts addressed to Flavius Apion (διὰ Μηνᾶ οἰκέτου κ.τ.λ.) of which cxxxvii is an example. There is therefore reason to connect the Strategius of No. 10,031 with the house of Flavius Apion, and the Strategius of the present text is the son of an Apion. As the Flavius Apion papyri do not begin until about 15 years later than No. 10,031, Strategius was probably his elder brother or even, possibly, his father.

CXXXI. A DISPUTED INHERITANCE.

Gizeh Museum, 10,063. 36.4×25.3 cm. Sixth or seventh century.

Petition sent by a certain Sousneus to an unnamed person, who is asked to intervene in a dispute which had arisen between Sousneus and his younger brother about the division of their father's property.

The Jewish descent of the writer, indicated by the names which he mentions, is also traceable in the style of this letter, which has a decidedly Hebraistic turn.

"To my kind lord next to God, entreaty and supplication, from me, Sousneus, your miserable slave, of Patani. I beg to inform my kind lord of my case, which is as follows. When my father was alive, he summoned me and my brothers and sisters and said, "One of you shall possess the land of your mother Jo...aphe, while the others get their livelihood from my land"; and he raised up David my younger brother and assigned to him the estate of my mother. And when he was on the point of death my father ordered David to be given half an aroura out of his own land, saying that that was enough for him, since he had his mother's estate. And lo, it is to-day three years since he died. Immediately after his death I went to Abraham, the overseer of Claudianus, and he brought the witnesses who were appointed to act for my father, that is, Julius the elder and Apollos. And he caused everything to be done in accordance with the word of my father; and year by year I sowed my land and David my brother sowed the land of my mother and his own half-aroura. But to-day Abraham suborned (?) by this David lay in wait for me, and said that my brother must have for himself my mother's land and the half-aroura which my father gave him, and that all that my father left me must be divided again between himself and me. Now my father gave to my mother 110 solidi to divide between me and my brothers and sisters, and this she gave to Elizabeth my elder sister.

And I beseech my kind lord to see that my rights are maintained in accordance with my father's word.'

14. $\mu\epsilon$ ίζονα Κλανδιανοῦ: it is more probable that $\mu\epsilon$ ίζων here is a title than that it means 'elder son,' notwithstanding $\mu\epsilon$ ιζοτέρα ἀδελφ $\hat{\eta}$ in 25. Cf. cxxxii. 1. 10, clvi. 5, clviii. 2, and B. G. U. 367. 5, and 368. 10 κόμετι καὶ $\mu\epsilon$ ιζοτέρω Στρατηγίου τοῦ πανευφ. πατρικ.

15. $\epsilon \pi \acute{a}\nu \omega$: the use of the preposition is peculiar. $\epsilon \pi \acute{a}\nu \omega$ is frequent in late Greek as an equivalent of $\epsilon \acute{\pi} \acute{\iota}$ in the senses of 'upon' and 'over,' i. e. having authority over. But

neither of these meanings is very satisfactory in the present case.

19. πορδουλεσθείς: ? from πορδή or from δούλος.

20. ἐὰν μὴ κ.τ.λ.: apparently the apodosis, which was to give the consequences of a refusal, is forgotten. Another way of taking the passage would be to alter ὡς ἐὰν μὴ λάβη to ὡσεὶ μὴ ἔλαβεν, keeping μερισθῆναι.

CXXXII. DIVISION OF PROPERTY.

Gizeh Museum, 10,133. 33.5×23.5 cm. Late sixth or early seventh century.

Memorandum of the division of a sum of money left by one Paulus among his heirs. The money amounting to 360 gold solidi was shared in different proportions by Serenus, the son of Paulus, and two other individuals on behalf of their wives, who were no doubt daughters of Paulus.

5. παραστάθμ(ον): παράσταθμον νόμισμα in Cod. Just. x. 27, 2 means a νόμισμα below its normal weight; and on this analogy the amounts mentioned here as paid ὑπὲρ παραστάθμον may be supposed to have made up the deficiency in weight of the sums with which they are connected; i.e. the 360 νομίσματα were παρά so and so many κεράτια. But if this is meant, it is rather strange that the νομίσματα are not described at the outset in 3 as being under weight.

10. $γαμετο(\hat{v})$: γαμέτης or γαμετός for γαμετή is not found elsewhere.

CXXXIII. ADVANCE OF SEED CORN.

Gizeh Museum, 10,056. 32.5 × 30.7 cm. A.D. 550.

The following documents (cxxxiii-cxxxix) are all concerned with the affairs of Flavius Apion, his heirs, or his son, Flavius Apion the younger. The family evidently possessed much wealth and power, and it figures in a considerable proportion of the Oxyrhynchus papyri of this period.

The present text is an acknowledgement of receipt given to Flavius Apion by the officials of the village of Takona, for 200 artabae of seed-corn.

The body of the document and the Latin signature are by the hand of cxl.

'In the 24th year of the reign of our most godly and pious sovereign Fl. Justinian, the eternal Augustus and Imperator, which is the 8th year after the consulship of Fl. Basilius the most illustrious, Phaophi 22, 14th indiction, in the city of Oxyrhynchus.

To Flavius Apion the all-honoured and most magnificent, of consular rank, a landowner at this illustrious city of Oxyrhynchus, through Menas his servant who is acting on his behalf and assuming for his master the same all-honoured Apion the conduct and responsibility of the transaction, from the council of the chief men of the village of Takona, in the Oxyrhynchite nome, which village is dependent upon your honour's house, through us, Aurelius Phoebammon, overseer, son of Pekusius, Aurelius Anoup, son of Aritsi, Aurelius Menas, his brother, Aurelius Koulaeth, son of John, Aurelius Anoup, son of Priscus, Aurelius Heraclides, son of Palmas, Aurelius Phib, son of Julius, and the other officials of this village, greeting. We acknowledge that we have received from your honour on loan and have had measured out to us from the harvest of the present 14th indiction as seed for the crops of our lands in the approaching (D. V.) 15th indiction, two hundred artabae of uncleansed corn by measure, given to us by the heirs of the sainted Menas, son of Osklas, captain of a boat belonging to your honoured house, total 200 artab. corn. We will pay back without fail to your honour the same amount of corn, new and sifted, according to the measure by which we received it, along with the tax payable by us, in the month Payni of the current 227th=the 196th year and of the present 14th indiction, out of the new crops of the coming (D.V.) 15th indiction, without delay and on the security of all our property which is thereto pledged. This bond, of which this copy only is made, is valid, and in reply to the formal question we have given our assent. (Second hand.) The council of the chief men of the village of Takona in the Oxyrhynchite nome, through the names herein above written, (has given) to your honour this bond for two hundred artabae of uncleansed corn by measure, total 200 artab. uncl. corn, which we will pay back at the date fixed; and we agree to all that is herein contained as it is above written, and in answer to the formal question have given our consent and discharge. I, Aurelius Heraclides, scribe of the village of Takona, signed for them at their request, as they were illiterate. Executed by me, Philoxenus.

2. $\tau \delta i \tau \delta \eta$: the year is really the ninth, not the eighth, after the consulship of Basilius (541); the same mistake occurs in cxl. In cxxv. 2 the number of years after Basilius' consulship is correctly given. Cf. note on cxxvi. 2, and introd. to cxxxv.

5. ἐπερωτῶντος: the correlative to ἐπερωτηθέντες in 21.

9. μείζονος: cf. cxxxi. 14, note.

14. ἐκτὸς διαπίσματος: cf. clviii, from which it appears that a διάπισμα could be sealed. But what part it played in the measuring and whether it had anything to do with the κάγκελλος (cxxvii. 1, note) is obscure.

23. Some such verb as ἐποιήσαμεν must be supplied.

28. The κ with the stroke of abbreviation should somehow represent *lvdiktlovos*; cf. cxxxviii. 49 and cxl. 32.

CXXXIV. CONTRACT OF A STONEMASON.

Gizeh Museum, 10,053. 31.5 × 10.3 cm. A.D. 569.

Acknowledgement given to Flavius Apion by John, chief of the stone-masons, for the receipt of one gold solidus, for which sum he engages to transport 200 blocks of stone to a $\lambda\acute{a}\kappa\kappa\sigma$ s or cistern on Flavius Apion's estate.

There are some ancient stone quarries which are still worked at a short distance to the north of Oxyrhynchus.

CXXXV. DEED OF SURETY.

Gizeh Museum, 10,018. 32 x 19.5 cm. A.D. 579.

Deed by which Aurelius Pamouthius, a worker in lead, became surety to the heirs of Flavius Apion that Aurelius Abraham, a labourer, would remain with his wife and family on an estate belonging to the heirs.

The papyrus is dated Phamenoth 25 (March 21) in the fourth year of the Emperor Tiberius Constantinus, 12th indiction. There is, as so often happens, an inconsistency between the two halves of the date. Tiberius reckons the beginning of his reign from the time when he was made Caesar by Justin (cf. G. P. I. lx. 2, note), and this event is placed by historians in Dec. 574, so that his fourth year was Dec. 577–578. But since Justin did not die till October 578, the fourth year of Tiberius' sole reign was of only two months' duration and in March 578 Justin was still Emperor. Moreover the 12th indiction on the ordinary reckoning was 578–9, and it could not have begun so early as Phamenoth (cf. note on cxl. 10). Probably therefore ϵ should be read for δ in line 3.

The dates found in papyri belonging to the reigns of Tiberius Constantinus and Maurice are a constant source of difficulty. Although in exliv the year of the Emperor and the indiction coincide with the received theory, exciii, exeviii and ecii are dated in Phaophi (October) of the 8th year of Tiberius, 1st indiction. This is so far consistent that, reckoning from Dec. 574 as the beginning of Tiberius' reign,

the indiction and the year of the Emperor agree in making the date of these papyri Oct. 582. But the accession of Maurice took place in August 582, so we must suppose that in October the scribes were still ignorant of Tiberius' death; cf. a similar case in cii. In cxxxvii, dated in the 3rd year of Maurice, 2nd indiction, January, the year of the Emperor is wrong; cf. note on G. P. II. lxxxvi. 5 and B. G. U. 395.

The years of the consulships are also frequently inconsistent. In exciii, exerviii and ceii the 4th consulship of Tiberius coincides with the 8th year of his reign, while cxliv, cxxxvi and cxxxvii give a regular series of dates 'after the consulship' of Tiberius, which is placed by them in 578. For similar difficulties respecting the consulships of Basil and Justin cf. cxxxiii. 2 and cxxvi. 2.

'In the 4th year of the reign of our most godly and pious sovereign and greatest benefactor Fl. Tiberius Constantinus, eternal Augustus and Imperator, Phamenoth 25, 12th indiction.

To the most magnificent heirs of Apion, of glorious memory, patrician, landholders in this illustrious city of Oxyrhynchus, through Menas their servant who is acting on their behalf and assuming for his masters, the said all-esteemed persons, the conduct and responsibility of the transaction, from Aurelius Pamouthius, lead-worker, son of George and Anniana, coming from the city of Oxyrhynchus. I agree of my own free will and with the oath by Heaven and the Emperor to be surety and pledge to your magnificence, through your representatives, for Aurelius Abraham, son of Herminus and Herais, who comes from the estate Great Tarouthinus belonging to your magnificence in the Oxyrhynchite nome, and is entered as your labourer. I engage that he shall continually abide and stay on his holding along with his friends and wife and herds and all his possessions, and be responsible for all that regards his person or the fortunes of him who has been entered as a cultivator; and that he shall in no wise leave his holding or remove to another place, and if he is required of me by your magnificence through your representatives at any date or for any reason whatsoever, I will bring him forward and produce him in a public place without any attempt at flight or excuse, in the keeping of your same honoured house just as he is now when I become his surety. If I do not do this I agree to forfeit for his non-appearance and my failure to produce him 8 gold solidi, actual payment of which is to be enforced. This pledge, of which only this copy is made, is valid, and in answer to the formal question I have given by assent.

Executed by me, Anastasius.'

The terms of the agreement are (11 sqq.):—

I, Serenus, deacon, principal party to the contract, of my own free will and deliberate choice agree that I have made a contract with your magnificence through your representatives for one year reckoned from the arrears of money payments of the present first indiction and that of the crops and money payments and revenues of the coming (D.V.) second indiction; in which contract I undertake to fill the post of your administrator or steward in the management of the estate of Matreus and your property in and adjacent to the villages of Episemus and Adaeus. I undertake to conduct my dealings with the labourers responsible to me both upon the estate and in the villages and adjacent property in accordance with the requirements notified to me by the worshipful secretaries of your honoured house, so as to collect and pay to your magnificence or to your representatives all that is due, namely, the corn to the official controller of the boats of your honoured house and the money to the most illustrious banker of your said honoured house, in correspondence with the receipts and cheques issued by me to all the labourers under my charge, and in agreement with the performance of my duties and the method of collection adopted by me. And if any deficiency (?) should occur on the estates aforesaid, I am to make it good and it shall be credited to your magnificence in my accounts; and I will gain and collect and pay to the aforesaid owner's account all the dues in full from the outlying properties. I agree further to gain for your magnificence, as compensation for the measure used in receiving payments, fifteen extra artabae on every hundred. I have also contracted and agreed to give to the honoured house of your magnificence the twelve Alexandrian solidi usually paid as a consideration for the said administration; and to accept the same amount of victuals as the administrator before me. I will render accounts of all my stewardship both of receipt and expenditure and I will make up deficiencies when the accounts are balanced if the comparison of my receipts and cheques as aforesaid shows me to be in arrears. I, Victor, surety, do further agree to become surety and bail for the aforesaid Serenus, deacon and administrator, in the discharge and fulfilment of his stewardship; and if he is shown to be in arrears in comparison with his cheques and receipts, to discharge the debt and satisfy your magnificence out of my own private means, renouncing the privilege of sureties, and contrary to the new ordinance issued about sureties and persons accepting responsibility. We both pledge for the observance of this contract all our property present and future, whether held by ourselves or our families, to be security

and to serve as a pledge. The contract, of which two copies are made, is valid, and in reply to the formal question we have given our consent.' (Signatures.)

4. της έν εὐκλεεί: cf. cxxxv. 4, note.

10. ὑπογράφοντες: the construction is ad sensum.

24. ἔκθεσιν: other instances of the use of this word show that it means a payment of some kind, and probably arrears of payment. clxxxix has την ἔχθεσιν ην ὀφείλει ἀποπλη-ρ(οῦν), and Gizeh Museum No. 10,132, which is a list of payments in corn and money, is

headed ἴσον ἐχθέσεων τῶν τῆς φροντίδ(ος) τοῦ δεσπότου ἡμῶν κ.τ.λ. Cf. B. G. U. 539. 1.

37–39. νεαραὶ διατάξεις is the Greek title of the Novellae of Justinian, two of which (4 and 99) are especially concerned with ἐγγνηταί. The natural inference from the clause in the papyrus would be that the law referred to abolished the liability of sureties. But this is neither in accordance with the terms of the Novellae nor with common sense. Perhaps the proviso was inspired by a mistrust of a new law which was imperfectly understood. It is interesting to find the imperial decrees evaded in this way by private contract; cf. cxxv. introd.

CXXXVII. REPAIR OF A WATERWHEEL,

Gizeh Museum, 10,034. 32 x 20 cm. A.D. 584.

Acknowledgement given by Aurelius Ptollion, a cultivator, to the heirs of Flavius Apion, of the receipt of an axle for a waterwheel used in irrigation. A large number of similar documents, of which this one may be taken as a representative, are found among the papers relating to the house of Flavius Apion. Cf. excii-exevii.

There is another inconsistency here (cf. introd. to cxxxv) between the year of the Emperor and the indiction. The 3rd year of Maurice was from Aug. 13, 584–5, while the 2nd indiction came to an end in the summer of 584, long before Tybi 15 (Jan. 10) of Maurice's 3rd year. One of the two numbers must be wrong, and as the date by the year after Tiberius' consulship supports the indiction number (cf. cxxxvii. 4 with cxxxvi. 2 and cxliv. 20), the error probably lies in the year of the Emperor, which should be the 2nd instead of the 3rd. Perhaps the scribe kept to the Egyptian method of reckoning an Emperor's first year as ended on the 5th $\eta\mu\epsilon\rho a \epsilon\pi\alpha\gamma \rho\mu\epsilon\nu\eta$ after his accession (cf. introd. to xxxv. verso); but elsewhere in papyri after the reign of Justinian the years of the Emperor [are reckoned in the ordinary Roman fashion from the day of his accession without reference to the civil year, and there are other inconsistencies in papyri dated in the reign of Maurice, e.g. G. P. II. lxxxvi, which cannot be explained by the recurrence of the scribe to the Egyptian mode of reckoning the years of an Emperor.

After the date and the usual opening formula the papyrus proceeds (l. 13): 'Having lately had occasion to require an axle for the appliance belonging to the landlord under my charge which is called by the name of Gedius Anianus and supplies water to arable land, I went up to the city and asked your magnificence to order the axle to be provided for me. Whereupon your magnificence with due regard for the state of your property credited me in my accounts with the value of a new, proper, serviceable, and satisfactory axle, which I have received as the complement of all the machinery this fifteenth day of Tybi of the present second indiction for the water-supply of the crops of the third indiction by God's help approaching. This axle is to serve the purposes of irrigation for a term of seven years, and the old one has been given to the porter.'

CXXXVIII. CONTRACT FOR THE CHARGE OF A STABLE.

Gizeh Museum, 10,100. 98.8 × 33.5 cm. A.D. 610-11.

Contract between Flavius Apion the younger and John, 'contractor of the racecourse' belonging to Flavius Apion, by which John agreed to undertake for a year the charge of Apion's stable in addition to the racecourse, and to provide him with animals whenever they were required, in return for the payment of one pound of gold (72 solidi).

Judging from the number of references in the papyri to the racecourse at Oxyrhynchus, it was very popular at this period. Cf. cxl, cxlv, cl, clv.

At the top of the document is part of a 'protocol' in brown ink, similar to those frequently met with in long Byzantine papyri. (Cf. Führer Pap. Erz. Rain. p. 17, sqq.)

To Flavius Apion the all-honoured and most magnificent, of consular rank and patrician, landowner at this illustrious city of Oxyrhynchus, through Menas his servant who is acting on his behalf and assuming for his master, the said all-honoured Apion, the conduct and responsibility of the transaction, from John, by the help of God contractor of the racecourse belonging to your honourable house, and of the stable belonging to your said honourable house, son of the sainted Theodorus, coming from the city of Oxyrhynchus.

I make the following contract.

Wishing to take charge of the stable belonging to your honoured house in addition to the racecourse which is under my care, for one year reckoned from Choiak 15 in the present 14th indiction to Choiak 15 in the (D.V.) approaching 15th indiction, I proposed to your magnificence through your representatives that your magnificence should entrust the stable to my care. The representatives of your magnificence accordingly allowed me the charge of it for the one year aforesaid reckoned from Choiak 15 in the present 14th indiction. I agree to undertake this duty and all the services that may arise in connexion with the estate, and to find mounts for the noble superintendents and the most illustrious secretaries and the servants who depart on any service whatsoever connected with the estate, and to give no cause for dissatisfaction, all this being undertaken unequivocally at the risk of myself and my property; and I accept as payment for the said duties for which I have contracted during the year one pound of gold according to the standard of Alexandria, undertaking for my part, as aforesaid, to perform all the duties

attaching to the aforesaid stable, and to provide animals for the needs of the estate, at the risk of myself and my property, as is aforesaid, and to find mounts for the noble super-intendents and the most illustrious secretaries and the servants who depart, as aforesaid, on service connected with the estate. To all this I swear by Almighty God and by the supremacy salvation and preservation of our most pious sovereigns, Flavius Heraclius and Aelia Flavia, that I will abide by and observe these conditions and in nowise break them; and I pledge for the observance of this contract all my property, etc.

8, 9. Ἰωάννης πακτάριος κ.π.λ.: this individual probably recurs in cliv. 10, 11, where he has the additional title of νομικάριος.

όξέως δρόμου: cf. cxl, a contract with a σταβλίτης τοῦ ὀξέως δρόμου. Α χαρτουλάριος

τοῦ ὀξέως δρόμου is mentioned in Constantin. De Adm. Imp. c. 43.

10. βαδιστικοῦ στάβλου: this included presumably any animals used in harness, e.g. donkeys or mules, as well as horses; cf. 29, where ἄλογα need not be confined to horses.

34 sqq. This is the θείος καὶ σεβάσμιος ὅρκος referred to in cxxv. 20, &c.

35. Ai λ ias $\Phi \lambda a \beta$ ias: the first wife of Heraclius is known as Eudocia Fabia, one of these names—the authorities are not agreed which—having been bestowed upon her by the emperor on her marriage. $\Phi \lambda a \beta$ ias would be an easy mistake for $\Phi a \beta$ ias.

CXXXIX. PROMISE TO BE HONEST.

Gizeh Museum, 10,049. 31.8 x 12.1 cm. A. D. 612.

Contract between Aurelius Menas, head-watchman, and Flavius Apion the younger, by which Menas undertakes to pay 24 solidi should he be proved to have been a party to any theft of the agricultural plant under his charge.

The lost commencement of this text is supplied from Gizeh Museum No. 10,090, which is a similar contract with Flavius Apion entered into by two natives of the village of Ophekas on the day before the present one, and written by the same scribe.

CXL. CONTRACT WITH A HORSE-TRAINER.

Gizeh Museum, 10,057. 28.8 × 22.3 cm. A.D. 550.

Contract in which Aurelius Serenus undertakes the superintendence of the racing stable belonging to Flavius Serenus, a *comes*, for one year. The terms of the agreement are:—(1) Aurelius was to discharge his duties regularly and with the utmost care, unless prevented by illness. (2) Aurelius was to receive for himself and the grooms 80 bushels of wheat, 9 gold solidi for barley and vegetables, 80 jars of wine, and half a solidus for green-stuff. (3) A sum of $4\frac{1}{2}$ solidi was paid to Aurelius as earnest-money, which he was to pay back doubled in the event of his retiring from service before the year was out, and to keep if dismissed without just cause.

7. ὀξέως δρόμου: cf. note on cxxxviii. 9.

- 10. $\Pi a \chi \dot{\omega} \nu \ldots \dot{a} \rho \chi \hat{\eta}$: there is an inconsistency here. The double date by the two eras combines with the year of Justinian's reign to fix the year in which the papyrus was written as 550. The 13th 'Egyptian' indiction ended in the summer of 550, and was therefore nearly over on Pachon 1 (April 26), which in the present passage is said to be 'in the beginning of the 13th indiction.' A further difficulty is that though the beginning of the 'Egyptian' indiction-year varied considerably from year to year, being perhaps dependent on the rise of the Nile, there is no instance of an indiction beginning so early as Pachon 1; cf. G. P. II. lxxxi. 14, note. Possibly therefore $\dot{a}\rho\chi\hat{\eta}$ here is a mistake for $\tau \dot{\epsilon}\lambda \epsilon \iota$. But the whole question of indictions bristles with difficulties which fresh discoveries of papyri only tend to increase, cf. G. P. II. exxxvi. 5, note.

CXLI. ORDER FOR PAYMENT OF WINE.

Gizeh Museum, 10,096. 11 × 31.6 cm. A.D. 503.

Order from John, a *comes*, to his butler Phoebammon to make certain payments of wine to various individuals. The amounts are given in $\delta\iota\pi\lambda\hat{a}$, sc. $\kappa\epsilon\rho\dot{a}\mu\iota\alpha$ (cf. B. G. U. 692. 4), and among the recipients are the inhabitants of two villages or hamlets, Sepho and Kesmouchis, who had brought cakes (?), a carpenter, a *stationarius* or policeman, fishermen, the porter of the monastery or church of St. John, and guards who protected estates on the further bank (probably of the Baḥr Yusuf).

Receipt showing that Asclas, a boatman, had received 1485 $\frac{1}{4}$ artabae of wheat from the village of Koma as payment for the $\tilde{\epsilon}\mu\beta$ 0 $\lambda\eta$ of the 13th indiction (cf. note on cxxvi. 9) and 11 solidi, $3\frac{1}{2}$ carats as payment for transport to Alexandria. At the top of the papyrus is a χ ; cf. clv, which has π /in the same position. In the present case, χ may be a number, but π /which recurs in other Byzantine papyri from Oxyrhynchus, e. g. Gizeh Museum Nos. 10,020, 10,046 etc., appears to be an abbreviation.

3. $\epsilon \kappa r \delta s$ $\delta o \pi \eta s$: the meaning of this expression is obscure; the amount allowed for $\delta o \pi \eta$ varies from 10 to 12 per cent. of the number of carats wanting, to which it is added in order to make up the whole amount of the deficiency in weight. Egyptian coin according to the standard of Alexandria, with 45 solidi to make up the deficiency in purity, total 2205 gold solidi. This sum I am prepared to take to Alexandria, apart from accidents sent by Heaven and dangers and mischances by river, and to pay it to John and Simeonius the most illustrious money-changers and to bring a written receipt from the most illustrious agent Theodorus to the effect that the aforesaid sum has been paid in full. For your security or that of the said most distinguished banker I have drawn up the present acknowledgement of deposit written with my own hand this 26th day of Athyr, 14th indiction.'

8 sqq. ἐν ἀπολύτφ Αἰγυπτίφ χαράγματι: cf. The gold ἐν

 $a \pi o \lambda \dot{\nu} \tau \omega$ xapáyµarı appears to mean the ordinary gold solidi on the standard of Alexandria, 24 of which were equivalent to $22\frac{1}{2}$ solidi of pure gold in cxxvi, a proportion of 16 to 15. Here since 45 solidi are paid to make up the deficiency in purity on 720 solidi, the difference between the pure gold and the other is slightly less, the ratio being 17 to 16. As this papyrus was written long after Justinian's reign, his attempt to abolish the distinction between the two kinds of gold coins was, as might be expected, a failure; cf. note on cxxvi. 15.

The *verso* contains a list of receipts and payments, entitled $\gamma \nu \hat{\omega} \sigma(\iota s) \tau \hat{\omega} \nu l \nu \tau \rho o \epsilon (\nu \tau \omega \nu)$, made partly in wheat, partly in money, and of considerable interest as giving the relation of solidi 'on the private standard' $(l \hat{o} \iota \omega \tau \iota \kappa \hat{\varphi} \zeta \nu \gamma \hat{\varphi})$ to solidi on the public standard $(\hat{o} \eta \mu o \sigma \iota \psi)$ and solidi 'on the standard of Alexandria.' 'Given to Andronicus the sailor 70 artabae, and to Anoup and John, lawyers (?) and contractors of the racecourse, as payment for the 11th indiction, 60 artabae; and received through Anoup, administrator of Great Parorium(?), 18 artabae, total 148 artabae of corn, remainder $482\frac{3}{4}$ artabae 1 choenix of corn. This, at 1 solidus less 4 carats on the private standard for every 10 artabae, is equivalent to $48\frac{9}{32}$ solidi less 193 carats on the private standard, that is, less $289\frac{1}{2}$ carats or $12\frac{3}{48}$ solidi on the public standard, making $36\frac{7}{32}$ pure solidi on the public standard, which are equivalent to $36\frac{15}{32}$ solidi on the Alexandrian standard.

To the banker 12 $\frac{1}{8}$ solidi on the Alexandrian standard; also 1 solidus less 4 carats on the private standard, which is equivalent to $\frac{8}{12}$ solidus on the standard of Alexandria, total 13 $\frac{1}{32}$ solidi on the Alexandrian standard, leaving 23 $\frac{1}{12}$ solidi on the Alexandrian standard.

13. $48\frac{9}{32}$ solidi less 193 carats $(40\frac{23}{96}$ solidi) on the private standard are equivalent to $48\frac{9}{32}$ solidi less $289\frac{1}{2}$ carats $(36\frac{7}{32}$ solidi) on the public standard, and to $36\frac{15}{32}$ solidi on the

standard of Alexandria. The ratios between the solidi of the 3 standards (private, public and Alexandrian) are roughly 161: 145: 146. In Gizeh Mus. No. 10,134 verso 3-4 a similar sum occurs; 558\frac{1}{3} solidi less 2313\frac{1}{2} carats on the private standard are equivalent to 558\frac{1}{3} solidi less 3430\frac{1}{4} carats on the public standard, i.e. a ratio of (in round numbers) 461: 415, or 153: 145. In lines 10-13 of the same papyrus there are other instances of conversion from the public to the Alexandrian standard. 23 solidi on the public standard are equivalent to 23 solidi 4 carats on the Alexandrian, 2 solidi $16\frac{1}{2}$ carats to 2 solidi 17 carats, and 9 solidi 6 carats to 9 solidi 7½ carats; the several ratios being 92:93, 129:130, and

444: 447. 15. There is a mistake in this line. As is shown above, a solidus on the private standard was worth only $\frac{146}{161}$ of a solidus on the Alexandrian standard, yet here I solidus less 4 carats, i.e. $\frac{1}{6}$ solidus $l\delta\iota\omega\tau\iota\kappa\hat{\varphi}$, is equivalent to $\frac{87}{9}\frac{7}{6}$ of a solidus on the Alexandrian standard. Two explanations of the inconsistency are possible; first that there was a large amount of variation in the private standard, and that a solidus ιδιωτικώ was worth sometimes more, sometimes less, than a solidus 'Αλεξανδρείαs. This however is in itself unlikely, and finds no support in parallel passages. In addition to the two instances quoted in the previous note, in both of which the relation of a solidus ίδιωτικώ to a solidus 'Αλεξανδρείας was about 161: 146, in line 13 of Gizeh Mus. No. 10,134 $16\frac{6}{9}\frac{6}{8}$ solidi less $49\frac{1}{4}$ carats ($14\frac{2}{3}$ solidi) lδιωτικ $\hat{\varphi}$ are equivalent to 13\frac{17}{4.8} solidi on the Alexandrian standard, giving a ratio of about 141:128. It is more probable therefore that in 15 of the present papyrus $\nu \delta(\mu \iota \sigma \mu a)$ a $\pi(a\rho a)$ δ is a mistake, due perhaps to the occurrence of $\nu \delta(\mu \iota \sigma \mu a)$ a $\pi(a\rho a)$ δ in 13, for $\nu \delta(\mu \iota \sigma \mu a)$ a simply. The ratio between the private standard and the Alexandrian will then be 96:87, which is consistent with the foregoing instances. The private standard does not appear to vary to a greater extent than the other two.

Egypt Exploration Fund.

GRAECO-ROMAN BRANCH.

THE Egypt Exploration Fund, which has conducted archaeological research in Egypt continuously since 1883, has recently established a special department, called the Graeco-Roman Branch, for the discovery and publication of remains of classical antiquity and early Christianity in Egypt.

While it is intended that further exploration shall proceed hand in hand with publication, the first work of the new department will be to publish the large and valuable collection of Greek papyri discovered in 1897 by Messrs. Grenfell and Hunt at Behnesa (the site of the ancient Oxyrhynchus), of which this volume is the first instalment.

The Graeco-Roman Branch issues annual volumes, each of about 300 quarto pages, with facsimile plates of the more important papyri, under the editorship of Messrs. Grenfell and Hunt.

A subscription of one guinea to the Branch entitles subscribers to the annual volume and also to the annual Archaeological Report, which contains a chapter on the progress of Graeco-Roman Egyptology contributed by Mr. F. G. Kenyon. A donation of £25 constitutes life membership. Subscriptions may be sent either to the honorary secretary of the Egypt Exploration Fund, Mr. J. S. COTTON, or to the honorary treasurers—for England, Mr. H. A. GRUEBER; and for America, Mr. F. C. FOSTER.

Offices of the Egypt Exploration Fund: 37, Great Russell Street, London, W.C.; and 59, Temple Street, Boston, Mass., U.S.A.
