Dear Mr. Sloan:

Here are the reprints you asked for. I was especially happy to generate the Hoggatt sequences because of my long correspondence acquaintance with the late Vern Hoggatt. Like all sequences, they have their own personalities. However, I don't need to tell you that.

I am including a third reprint from the IASTED Modelling and Simulation Conference in Suzano in June 1989. It might be of interest to you as one of the methods for searching out recurrences.

I am most appreciative of your naming 8 or 9 sequences I developed in the Fibonacci Quarterly as "Fielder Sequences". I may have written you earlier about that.

Keep up the good work! Your sequence book is one of the most valuable I have in my library when I have to search for sequences and sequences like some in within it. I hope the publishers will keep the price down so that we retired "emeriti" can afford to enjoy our personal copies.

If I can be of further help, don't hesitate to call on me.

With best regards,  
Van Fielder
