AXIORY

How to Install MT4

Only 5 Steps Stand Between You and Having Your MT5 Up and Running.

MT5 for Windows

▶ Double click on the downloaded installation file

▶ Tick the agreement box and click on "Next"

▶ Confirm the installation directory and click on "Next"

▶ Wait, until MT4 has downloaded and installed then click on "Finish"

▶ The installation process is complete, now you can sign in.

MT4 for Mac

▶ Double click downloaded file

▶ Drag & drop the Axiory logo to the applications folder

▶ Click on "Axioryasia.MT4" and then click on "Open"

▶ On the next screen, click "Open" again

▶ The installation process is complete, now you can sign in.

In case the message "Can't open because the developer is unconfirmed" appears to Mac users

1. Click the **"Click to change"** button at the bottom left of the screen.
   You will need to enter a username and password for the administrator account, so be prepared in advance.

2. Select **"Allow all applications"** in **"Perform downloaded applications".**

3. Selecting **"Allow All Applications"** reduces security.
   Click **"Allow all Applications"** as the warning will be displayed.

After changing the above, please install MetaTrader 4 again.
After installation is complete, open this screen again and restore the original settings.
