Journal of Vascular Diseases

A microscopic image showing a cross-section of a blood vessel. The vessel lumen is on the left, and the vessel wall is on the right. The vessel wall shows a thick, irregular structure with a granular texture, possibly indicating atherosclerosis or another vascular disease. The image is in shades of red and pink.

Message from the Editor-in-Chief

Journal of Vascular Diseases (ISSN 2813-2475) is an international, peer-reviewed, open-access journal on the basic, translational and clinical research of cardiovascular, cerebrovascular, and peripheral vascular diseases. It publishes research papers, reviews, editorials, communications, etc. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible.

Editor-in-Chief

Prof. Dr. Hans Henkes

Section Editor-in-Chief

Prof. Dr. Antonello D'Andrea

Aims

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Full details must be provided when publishing an experiment so that the results can be reproduced.

There is, in addition, a unique feature of this journal: it accepts studies showing meaningful but negative results. While there are many journals that focus on vascular diseases, only a few of them actively accept negative results. As a result, most negative data end up not being in the public domain even if the data were meaningfully negative and the study was well designed. By accepting those negative results, our journal encourages scientists to share those data so that others would not need to repeat experiments already carried out.

Scope

Congenital vascular diseases

- Congenital aneurysm
- Congenital arteriovenous fistula
- Congenital hemangioma

Degenerative vascular diseases

- Arteriolosclerosis
- Atherosclerosis
- Medial calcinosis

Functional vascular diseases

- Acrocyanosis
- Erythromelalgia
- Raynaud's syndrome

Inflammatory vascular diseases

- Giant cell arteritis
- Infectious arteritis
- Rheumatic arteritis
- Syphilitic aortitis
- Thromboangiitis obliterans

Neoplastic vascular diseases

- Hemangioendothelioma
- Hemangiopericytoma
- Hemangiosarcoma

Traumatic vascular diseases

- Traumatic aneurysm
- Traumatic arteriovenous fistula

Other vascular diseases including rare diseases

Author Benefits

Open Access

Unlimited and free access for readers

Coverage by Leading Indexing Services

Scopus, EBSCO, and other databases

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Rapid Publication

A first decision is provided to authors approximately 23.3 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the second half of 2024)
