

OpenText Retain Mobile Archiving for Android

OpenText Retain Mobile Archiving delivers secure, encrypted messaging and archiving for iOS, Android, and BlackBerry devices. This solution is for organizations that utilize personal employee and corporate devices to generate and consume business data while meeting regulatory and compliance requirements. processes they need to master modern work

Archive mobile device communication

Archive all mobile communication without the need to tether or sync the device. OpenText Retain Mobile Archiving provides a fully compliant and complete archive for mobile communication.

Product highlights

OpenText™ Retain Mobile Archiving preserves SMS/MMS and phone call logs, all encrypted SMS/text messages, and dedicated business phone number data for Android devices via the secure communications server. There is no need to tether or sync the device and archiving is done in real time. It is the only enterprise-ready archiving solution available for Android devices.

With OpenText Retain Mobile Archiving, you don't lose valuable information and your organization stays compliant. Sensitive data is kept securely within your organization.

How OpenText Retain Mobile Archiving works for Android

The solution operates through a lightweight app that is installed on each device. This app captures all SMS/ MMS and phone call log data. For encrypted communication, it pulls all encrypted SMS/Text messages and dedicated business phone number data from a secure server. The captured data is then automatically sent to and stored in your the archive in the cloud or on-premises.

OpenText Retain Mobile Archiving helps ensure that companies:

- Meet regulatory compliance standards: Dodd-Frank Act, Gramm-Leach-Bliley Act (GLB), SEC, FINRA, FRCP, Sarbanes-Oxley, HIPAA.
- Monitor smartphone usage to ensure compliance with corporate policies.
- Comply with the Dodd-Frank Act (which gives firms 72 hours to comply when trade reconstruction requests are issued)
 - **Fast mobile communication retrieval:** Fast and easy retrieval eases compliance with trade reconstruction request timelines.
 - **Secure, accessible archive:** The secure archive can be searched by legal counsel, auditors, or other named users.

Unified archiving OpenText

Retain Mobile Archiving provides unified archiving of all business communication, including email, social media, and mobile communication data for case assessment, search, and ediscovery. It can be deployed on-premises or in the cloud. This includes email archiving for Microsoft Exchange, Office 365, Gmail, and OpenText GroupWise platforms. Retain mobile archives mobile device communication data for Android, including SMS/text messages, phone call logs, and PIN messages.

“We are doing everything we can to stay compliant with text messages and phone calls. The only way to say it and mean it, is to have a system like Retain Mobile.”

Steve Corder

Asst. Athletic Director for NCAA Compliance
University of Detroit Mercy

Choose Retain and experience a better approach to archiving.

The screenshot displays the Retain Mobile web interface. At the top, the Retain logo is on the left, and the date and time '01-Apr-2015 08:48' along with a user greeting 'Welcome, admin' are on the right. Below the header is a navigation bar with tabs for 'Browse', 'Search', 'Advanced Search', 'Legacy Search', 'Exported Items', 'Tag Definitions', and 'Options'. A toolbar contains icons for 'Delete', 'Forward', 'Export', 'Restore', and 'Print', along with a 'Change Mailbox' button. The left sidebar shows a tree view of folders: 'RickL', 'BlackBerry', 'SMS', 'MMS', 'Phone Calls', and 'BB Messages'. The main content area is a table of messages with columns for 'Type', 'From', and 'Subject'. The table contains ten rows of message data.
