Magic as an Element of Political Debate in the Historiography and Imperial Biography of the 1st-5th Centuries AD

A Study of Tacitus, Suetonius and Ammianus Marcellinus

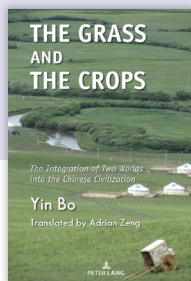

The book explores the hitherto rarely discussed connection of magic with politics in the writings of Tacitus, Suetonius and Ammianus Marcellinus, offering insight into the way language of magic and ritual pollution is used as means of characterization and historiosophical commentary on the nature of power and political struggle. Religious deviation and innovation, theurgy, necromancy, black and erotic magic, the topoi of an emperor-magician, a semi-divine emperor-healer/saviour and a witch/poisoner, all play an important role in the analyzed texts.

Vieilleses en Chine et en France

Mots, textes, images

L'actuel ouvrage s'intéresse aux représentations de la vieillesse en Chine et en France à travers les mots, les discours, la littérature, la peinture et le cinéma. Les images sont complexes selon l'époque, l'aire culturelle et l'auteur, et souvent intimement associées à nos rapports au temps, à la vie et au pouvoir.

E-learning in English Medium Instruction (EMI): Academic language for university students

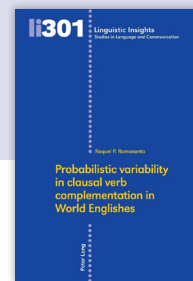

This book focuses on the linguistic needs of university students enrolled in English Medium Instruction (EMI) programmes in which disciplinary subjects are taught in English, a practice that has significantly risen over the last 20 years. It includes seven online, self-study modules (Creating outlines, concept maps, writing definitions, writing summaries, reporting data, the language of presentations and writing abstracts) that were designed after conducting specific research into students' needs in terms of academic genres and language functions. All these modules were piloted with students in different degree programmes.

Kasseler Vorlesungen über Hegels Kunstphilosophie

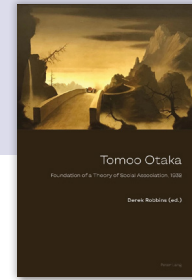

In diesem Buch umreißt der Verfasser sehr konzentriert die Grundlinien einer theoretisch-systematischen Ästhetik, die größtenteils auf Hegels Auffassung der Kunst als der sinnlichen Manifestation der absoluten Idee und auf ihrer Selbstentfaltung als ästhetischem ‚Ideal‘ im System der Kunstformen und -arten basiert. Der Grund dafür ist, dass das reife System der Philosophie Hegels plausibel als der Gipfel der ganzen Entwicklung der neuzeitlichen Philosophie und insbesondere des Deutschen Idealismus betrachtet werden kann. Ihre substanzielle Wahrheit und vernünftige Haltbarkeit schließt aber nicht aus, dass bei Hegels Theorie der romantischen Kunstform einige Antinomien, welche schon dem Scharfsinn Friedrich Theodor Vischers nicht entgangen waren, auftreten.

Ce livre se concentre sur un aspect méconnu de l'héritage militaire : l'immersion de munitions dans les lacs suisses. À travers l'interface science, société et environnement, il s'agit à la fois de comprendre les motivations et raisons de ayant conduit à cette pratique et les enjeux actuels de gestion ou non de ces déchets militaires.

Past Experiences and Contemporary Perspectives

Traduit du russe par Bruno Bisson

The present book's ambitious title *The Completion of Eurasia ?*, which could be subtitled in the face of pressing challenges, explores a concentration of diverse – yet equally complex – issues grouped into four main clusters: organisational and diplomatic competition, logistical and infrastructural challenges, grasping the concept of Eurasia, making sense of historic turns. It provides a multi-dimensional and multi-sectoral understanding of what Eurasia “is” in its essence, despite historical turmoil and pressing insecurity issues.

Dans ce petit ouvrage, Michel Carpentier (1930-2022) raconte ses trente-six ans de vie dans les institutions européennes et sa contribution de visionnaire au lancement de plusieurs politiques. Michel Carpentier a intégré la Commission d'EURATOM le 14 juillet 1959 à Bruxelles, où il fut désigné responsable du service des achats et des marchés. En 1967, lors de la fusion des Commissions, il a rejoint la Direction Générale des Affaires Industrielles, Technologiques et Scientifiques (DG III) où, en 1971, à l'initiative d'Altiero Spinelli, alors commissaire responsable de l'Industrie, il rédigea la première communication de la Commission Européenne sur l'environnement.

The edited volume *Communicators, Audiences, and Strategies: Past Experiences and Contemporary Perspectives* has the ambition to reveal throughout its chapters the relations between particular communicators and their strategies.

Ce cours constitue une introduction à l'étude de la science politique, des relations internationales et des études territoriales, offrant une approche systémique de la dimension spatiale des processus politiques à tous les niveaux et couvrant leurs éléments de base.

Cultural Security

Theory – Selected Aspects – Case
Studies

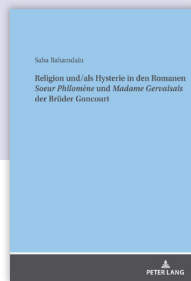

Cultural security is a concept that appeared relatively recently, but the issues within its scope – protection of identity and protection of cultural heritage – have accompanied humans almost since the dawn of time. In this monograph, an attempt is made to analyse cultural security taking into account various research perspectives and showing its multifaceted nature. This volume also constitutes a collection of case studies that focuses on the analysis of the state as the basic subject of cultural security. The authors attempted to define cultural security and the approach to it from various, often very different, research perspectives.

**Stanislas de Boufflers y su obra
narrativa**

Durante la primera década del siglo XIX, Boufflers publicó seis cuentos: La Mode, L'Heureux accident, L'Œuvre de charité, Tamara ou Le Lac des pénitents, Le Derviche y Ah ! si... Estos relatos, de carácter moral, ilustran el deseo del autor de retirarse de la sociedad, que también era el tema de su cuento libertino, La Reine de Golconde (1761).

A Stubborn Ghost

Essays in Honor of Henry W. Sullivan

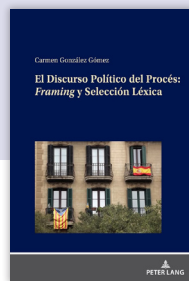

A tribute to Henry W. Sullivan in celebration of his 80th birthday, this volume encompasses a wide spectrum of Hispanic literary scholarship to honor a prolific scholar whose contributions have been extensive, not only as a Golden Age Hispanist but also as a devoted Lacanian scholar, literary critic, translator, poet, novelist, playwright, and composer. The title of the collection comes directly from Sullivan's recent study on tragic drama in the Golden Age of Spain. Even though the "ghost" he attempts to lay there is the critical controversy around defining and classifying tragedy among Spanish classic comedias, the label extends and applies to Sullivan's lifelong commitment to the relevance of Spanish drama of the Golden Age within the universal canon, especially from an English-language perspective.

Justification of Cyber Harassment Among Turkish Youths

Violence and media are important issues in media theories and research. In the research conducted with the participation of 400 university students, the effects of the concepts of digital media literacy, cyber violence and emotional deafness (alexithymia) on the perception of individuals as justification violence are discussed as factors that cause individuals to perceive violence as legitimate through communication tools. It was determined that variables of being cyberbullying victim, being a cyberbully, digital media literacy and alexithymia (emotional deafness) were explanatory effects on the justification of cyber violence. It has come to the point that the use of digital media literacy and conscious internet using are important in order to prevent justification of cyber harassment.
