

# #3776 CENTURY 霞 KASUMI

## The New #3776 CENTURY Fuji Series Fuji Unkei “Kasumi”

In 2023, the “Fuji Unkei” series was born with the concept of expressing that image using various decorative methods, inspired by the beautiful scenery created by the collaboration of Mt. Fuji and the surrounding clouds. As the second product in the series, we will be releasing “Kasumi,” which takes on the challenge of new decoration.

**Kasumi-Mon (Kasumi pattern)**  
Kasumi is a phenomenon in which fine water droplets spread in the air, making the sky and distant scenery blurry, and this pattern expresses the way they are waving. It is used to express a sense of distance or a change in scene.

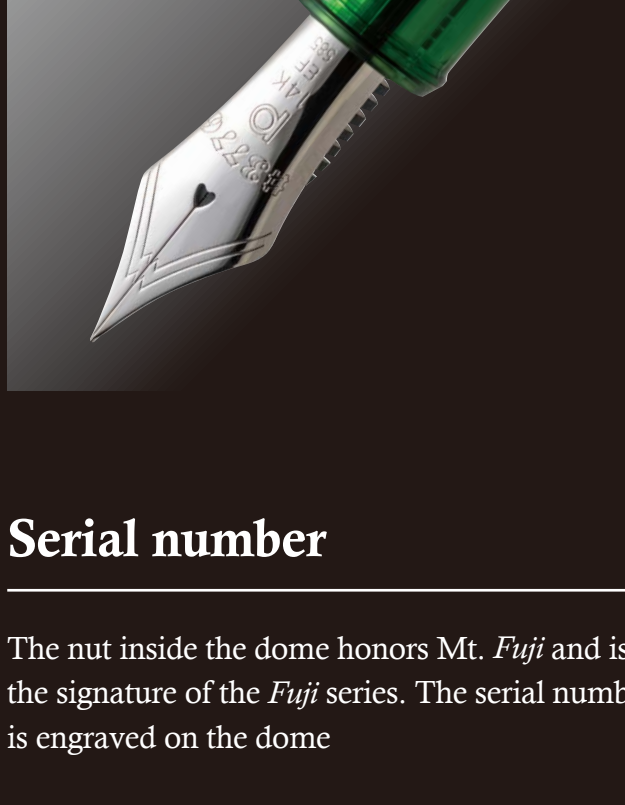

### A new cutting expression inspired by Kasumi-Mon

The barrel is carved to reproduce the Kasumi - Mon (Kasumi pattern) that has been seen on picture scrolls and folding screen paintings since ancient times. By connecting small circular cuts, we expressed the appearance of waving mist. This continuous yet irregularly arranged pattern gives a complex contrast and shine, creating a unique fountain pen never seen before.

### A modern two-tone color scheme

Fuji Unkei “Kasumi” focuses on the rich natural greenery that can be glimpsed at the foot of Mt. Fuji through the mist, and the cap and gripping section are finished in a calming green color.

### Nib and the grip section

The 14K gold nib, plated with rhodium, radiates subtle brilliance. Available in Extra Fine, Fine and Medium Broad sizes. A new color scheme is used for the grip section colored in a translucent green that matches the color of the cap.

### Serial number

The nut inside the dome honors Mt. Fuji and is the signature of the Fuji series. The serial number is engraved on the dome

### Exclusive Box for Kasumi

The special edition packaging features an image of “Kasumi”. The set also includes a converter, an ink cartridge and a special-colored ink called “Fuji-No-Akatsuki.”

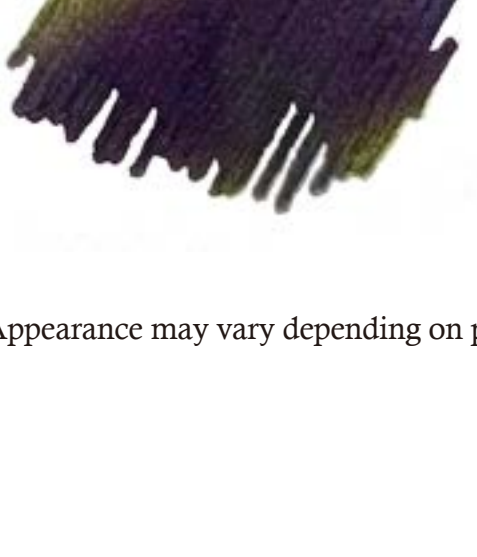

### “Fuji-No-Akatsuki” Ink for the Fuji Unkei series

The #3776 CENTURY Fuji Unkei series comes with a 20ml-bottle of specially blended Fuji-No-Akatsuki ink to commemorate its release. This ink is inspired by the purplish panoramic view of Mt. Fuji seen at dawn. Commemorating its release, this ink can be seen a deep green reflection. It is similar to the way the surrounding trees gradually change color as the sun rises. Please enjoy it together with the main body color of the fountain pen.

The ink bottle cap features a three-dimensional illustration with the motif of Mt. Fuji with clouds.

\*Appearance may vary depending on paper and amount of ink.

Product number	PNB-4000FU		
Color	#44 KASUMI		
Nib	Extra fine	Fine	Medium
JAN Code	4977114-116933	4977114-116940	4977114-116957

<b>Specifications</b>	
Size	139.5mm ( full length) x 15.4mm (max. diameter), average weight 20.8g
Material	Barrel, cap, grip, crown: Resin
	Cap ring, grip ring, upper ring, rear ring: Rhodium plating on brass
	Clip: Rhodium plating on steel
	Nib: Rhodium plating on 14K gold

<b>Accessories</b>	
Box	Exclusive box: 118m m (W) x 200m m (D) x 40m m (H) WEIGHT: approx. 290g)
Cartridge ink	One blue black ink cartridge
Converter	Converter -700A
Bottle ink	Special color 「Fuji-No-Akatsuki」

<b>Refill</b>	
Cartridge ink	SPSQ-400, SPN-100A, SPC-200, SPG-500
Printing / engraving	Not available

Release date	July, 2024
Quantity for sale	Limited edition of 3,000 units worldwide

The #3776 CENTURY series is equipped with the “Slip & Seal Mechanism” that prevents ink from drying out in the pen with a complete airtightness
