

Communication with Stakeholders

Our approach to stakeholder communications

The TEL Group values communication with its stakeholders, who provide support for its corporate activities. We set a variety of communication opportunities, including web-based information provision, the TEL Partners Day and Production Update Briefing for suppliers. We also hold a regular Employee Meeting as a platform for communication between employees and top management, carry out advertising activities highlighting our ties with society, and support both science- and sports-related events.

As part of our ongoing communication efforts, we identify stakeholder expectations for the Group as well as collecting stakeholder feedback. We will continue to make use of such information in our corporate management.

Supporting “The Wonder of Elements” exhibition

Tokyo Electron participated as a special sponsor in an exhibition titled “The Wonder of Elements,” which was held from July 21 to October 8, 2012 at the National Museum of Nature and Science in Tokyo. The exhibition explained both the workings of nature and the application of chemical elements in relation to the production of semiconductors and PV panels, providing the wider public with an opportunity to become familiar with those members of the periodic table that are indispensable to leading-edge technologies.

Employee Meeting

The TEL Group has been holding its Employee Meeting as a platform for communication between employees and top management on an ongoing basis. The meeting is held annually in locations either in or outside Japan chosen alternately. This fiscal year, we held the meeting primarily at Group companies in Japan, namely, Tokyo Electron Tohoku, Miyagi, Yamanashi and Kyushu in Japan and Tokyo Electron Korea in South Korea. The meeting provides an opportunity for two-way communication, with senior management providing an explanation about the Group’s current circumstances along with a message to workers, and employees asking questions and voicing opinions. The TEL Group will continue to promote this communication platform and to incorporate employee feedback into its corporate management.

2013 SEMI Akira Inoue EHS*1 Award

The SEMI Outstanding EHS Achievement Award—Inspired by Akira Inoue is sponsored by the EHS Division of SEMI, a global industry association of major manufacturers of semiconductor/FPD production equipment and materials. SEMI established the award in 2000 to honor the achievements of the late Akira Inoue, who, as well as being a past president of Tokyo Electron Ltd. and former member of the SEMI Board of Directors, was a strong advocate for environment, health and safety. After the screening of nominations by a subcommittee, SEMI grants the award to individuals who have made significant contributions to the semiconductor industry and society at large in the area of EHS.

The 2013 award was presented to Mr. Ajit Manocha, CEO of GLOBAL FOUNDRIES, on July 9, 2013 at SEMICON West 2013 in San Francisco, U.S.A. Under the leadership of Mr. Manocha, GLOBAL FOUNDRIES has made significant EHS achievements. The selection committee recognizes his achievements in:

- Zero-incident safety culture
- Commitment to eco-efficiency in foundry operations
- WSC*2 commitment to best practices for perfluoro-compound (PFC) reduction
- WSC commitment to a “conflict-free supply chain”
