

# QSystem by Apertum

*QSystem is an open source queue management system.*

## About QSystem

Queue automation system "QSystem by Apertum" is a software product for customer flow management. QMS Qsystem brings controlled and fair waiting process. When everything is planned, organization works more efficiently and customers are more satisfied.

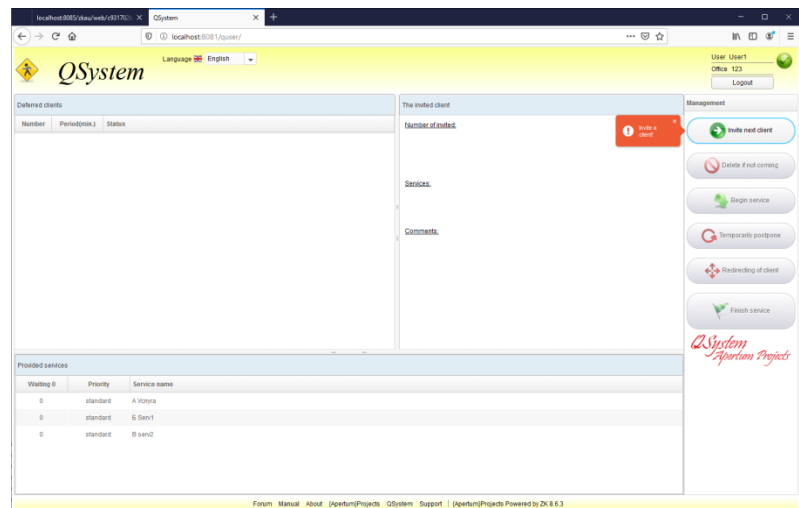

## ZK x QMS

We all have experiences waiting in a queue for some services. The experience can be much more comfortable using QMS software – just take a ticket and wait for an invitation on board.

QSystem is a ZK-powered open source project, it consists of the following technologies:

- Server java8 (standalone app) + Clients java8, JavaFX (standalone app) + Web client plugins for the server (Jetty + ZK).
- A pre-registration module is done by SpringBoot + ZK.

*"I like to work with Java than Javascript. ZK is perfect for me"*

## Why ZK

I have a Java background and I like to work with Java. I am not very experienced in Web GUI development and I do not like to work with Javascript.

ZK is perfect for my background and helps me to start making web apps easily. When using ZK, I like the MVVM design pattern the most; it offers great separation between the controller and view.

## The Result

I have done several modules using ZK in QSystem. Users like the Spring Boot+ZK-based pre-registration module a lot, the administrators think it is very easy to use.

ZK-powered QMS QSystem! - Pre-registration

 ZK-powered QMS QSystem!

To start the pre-registration process fill out the form below. Fields marked with an asterisk (\*) are required. If you specify the email, then on this address will automatically send an mail with information about the appointment.

Personal data	Fill out
Name *	<input type="text"/>
Last Name *	<input type="text"/>
Middle name	<input type="text"/>
E-mail:	<input type="text"/>
Type the letters from the image:	 <input type="text"/> <input type="button" value="Refresh"/>
<input type="button" value="Next"/>
